Gentlemen:

Re: Approval of Proposed Project
Sanitary Landfill Operation
SE 1/4, Section 27 and NE 1/4
Section 34, T.17N., R.13E
Approximately 8 1/2 Miles West
Northwest of Richmond, Wayne County

You are hereby notified that the State Health Commissioner of the State of Indiana has this 27th day of February, 1970, approved the proposal for the operation of a sanitary landfill to serve the citizens of Wayne County for the disposal of residential, commercial and light industrial wastes on a 88-acre tract of land located in the southeast quarter of Section 27 and the northeast quarter of Section 34, Township 17 North, Range 13 East, Wayne County.

This project will include the trench method of sanitary landfill operation. Refuse will be deposited at the sanitary landfill, spread, compacted and covered at the end of each day of operation with at least six inches of compacted earth. The final compacted earth cover will be at least three feet in depth. After the completion of the fill operation the site is anticipated to be used for agricultural purposes. A construction trailer will be provided as an office and control building and will contain bottled drinking water facilities for employees. A separate commercial portable chemical toilet will be made available for employees and public use. Fire protection and dust control will be provided through the use of a 2,000-gallon tank trailer with a pump and sprinkling device. Additional fire protection is available from the Greens Fork's Volunteer Fire Department, approximately two miles from the site.

The operation of this sanitary landfill will be by contract and will be controlled by the provisions of Wayne County Ordinance No. 3-1969.

Wayne County Board of Commissioners February 27, 1970

This approval is given with the following conditions:

1. That all garbage and refuse be disposed of in a manner to prevent contamination of ground water and pollution of surface waters.

2. That no burning of any wastes be conducted at the sanitary landfill site.

3. That no liquid, hazardous chemical, smoldering or hot ash wastes be deposited at this sanitary landfill site.

4. That, if nuisance or pollution conditions are created, immediate corrective action will be taken by the operator.

5. That all necessary local permits, including zoning, be obtained prior to any operation.

6. That the operation of the sanitary landfill be conducted in accordance with the "Standards for Selection, Operation and Maintenance of a Sanitary Landfill," adopted by the Division of Sanitary Engineering, Indiana State Board of Health.

7. That no scavenging or salvaging be permitted at this site.

This proposal was prepared by Henry Gardner, P. E., County Engineer, and Philip Thornburg, County Surveyor, and submitted on January 27 and February 24, 1970.

This approval shall be void if operation is not begun before March 1, 1971.

Sincerely,

A. C. CHUNN, M. D.
STATE HEALTH COMMISSIONER
INDIANA STATE BOARD OF HEALTH
