Re: Self-Disclosure of Potential Violations
Metal Spinners - 914 Wohlert Street, Angola, Indiana, AI ID 115455
Certification of Corrective Action – Solid Waste Profiles

Dear Ms. Wagner:

In connection with the above-referenced Self-Disclosure of Potential Violations (Self-Disclosure), this letter provides our certification that the corrective action for potential violation No. 2, regarding solid waste profiles, has been completed for the Metals Spinners location referenced above.

The Self-Disclosure was submitted to IDEM on July 15, 2021, and under IDEM's Self-Disclosure and Environmental Audit Policy, corrective action must be completed no later than 60 days after the date of disclosure to IDEM, which is September 13, 2021. For the corrective action, updated or new profiles were prepared for certain wastes that had outdated or missing profiles. Copies of these profiles are attached.

Please let me know if you have any questions or require additional information.

Sincerely,

A handwritten signature in black ink that reads "John Lennartz". The signature is written in a cursive style with a large, stylized "J" and "L".

John Lennartz, P.Eng., CEM
Vice President – Environment, Energy & Real Estate
Samuel, Son & Co.

Waste Stream Determination Form

Facility Name: Metal Spinners 914 Wohlert St. Angola, IN 46703
 Person Completing Form: Mike Winkler EH&S Manager

Waste Profile: WH001
 Date: Sept. 07, 2021

1. Waste process and description																																																													
Waste description (including physical description - i.e. liquid, solid, sludge) <u>Annealing Oven Metal Flakes/Slag</u>																																																													
Process generating the waste <u>Annealing oven</u>																																																													
2. Waste Stream Determination																																																													
Waste determination is based on: <input type="checkbox"/> User knowledge (Process evaluation, SDSs, and interview) <input checked="" type="checkbox"/> Waste analysis (List all sampling dates and attach analytical results)																																																													
Sample Date: <u>7/29/2021</u>																																																													
Is the waste a "solid waste" according to §261.2? <i>If no, specify exclusion or exemption by regulatory citation and description:</i>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No																																																												
Is the solid waste excluded under §261.4 or exempt from regulation as a hazardous waste? <i>If yes, specify exclusion or exemption by regulatory citation and describe:</i>	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No																																																												
Is the waste a listed hazardous waste? (Detail rationale, as necessary) F-listed per §261.31 K-listed per §261.32 P-listed per §261.33(e) U-listed per §261.66(f) <i>If yes to any of the above, describe rationale for use of these waste codes:</i>	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No																																																												
Does the SDS, lab analysis, or other information indicate the waste has any of the following characteristics:																																																													
D001 { A liquid with flash point of 140 °F or lower, A non-liquid capable of causing fire, An ignitable compressed gas, or Oxidizer? Ignitable? >	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No																																																												
D002 { A liquid with a pH of 2 or less, A liquid with a pH of 12.5 or greater, or Does the waste corrode steel at a rate greater than 0.25 inches per year at a test temp of 130 degree F? Corrosive? >	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No																																																												
D003 { Unstable under normal conditions, Reacts violently with water, Gives off toxic gases, or Capable of detonation or explosion under normal conditions or when heated. Reactive? >	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No																																																												
Is waste characteristically toxic as indicated by a Toxicity Characteristic Leaching Procedure (TCLP) (SW-846 Method 1311) greater than the following? <i>(Check all that apply (if any))</i>																																																													
<table style="width:100%; border: none;"> <tr> <th style="text-align: left;">Metals (mg/L)</th> <th style="text-align: left;">Volatiles (mg/L)</th> <th style="text-align: left;">Semi-Volatiles (mg/L)</th> <th style="text-align: left;">Pesticides/Herbicides (mg/L)</th> </tr> <tr> <td>D004 <input type="checkbox"/> Arsenic (5.0)</td> <td>D018 <input type="checkbox"/> Benzene (0.5)</td> <td>D023 <input type="checkbox"/> o-Cresol (200.0)</td> <td>D020 <input type="checkbox"/> Chloradane (0.03)</td> </tr> <tr> <td>D005 <input type="checkbox"/> Barium (100.0)</td> <td>D019 <input type="checkbox"/> Carbon Tetrachloride (0.5)</td> <td>D024 <input type="checkbox"/> m-Cresol (200.0)</td> <td>D012 <input type="checkbox"/> Endrin (0.02)</td> </tr> <tr> <td>D006 <input type="checkbox"/> Cadmium (1.0)</td> <td>D021 <input type="checkbox"/> Chlorobenzene (100.0)</td> <td>D025 <input type="checkbox"/> p-Cresol (200.0)</td> <td>D031 <input type="checkbox"/> Heptachlor + epoxide (0.008)</td> </tr> <tr> <td>D007 <input type="checkbox"/> Chromium (5.0)</td> <td>D022 <input type="checkbox"/> Chloroform (6.0)</td> <td>D026 <input type="checkbox"/> Cresol - Waste Stream Determination Form (continued)

3. Conclusions -

Waste is managed as the following, based upon information in this form:

<input type="checkbox"/> Hazardous Waste with:	Federal Waste Codes:	State Waste Codes (if applicable)
<input checked="" type="checkbox"/> Nonhazardous Waste	_____	_____
<input type="checkbox"/> Used Oil	_____	_____
<input type="checkbox"/> Universal Waste	_____	_____

Required labeling:

Exempt because: _____

Other Regulated Waste: _____

Empty Container: _____

State specific requirements:
(applicable to any of the above characterizations)

4. Waste storage, treatment, and disposal

Specific description of waste management from generation point to final disposition:

slag placed in carbon steel dumpster and recycled

Approximate Generation Rate: ~ 40 lbs/month

Are land disposal restrictions (LDR) applicable? Yes No

If yes, specify treatability group:

Wastewater

Nonwastewater

If LDR standards apply, are UHCs present above treatability standards?
(Only applicable to certain characteristically hazardous waste codes specified by regulation.)

NA Yes No

If yes, specify UHCs:

DOT Shipping name:

Non-DOT/Non-RCRA Regulated Solid

IMPORTANT: Attach all supporting documentation (e.g. SDSs, laboratory analysis, generator knowledge, etc.) to this waste stream determination.

The laboratory performing the analytical testing is listed below. Samples are tested in "as-received" condition, and the test results relate only to the sample listed above. The laboratory certifies that the generation of all the results contained here-in was performed minimally meeting the quality system of ISO/IEC 17025:2017 and is in compliance with the listed analytical method, except as otherwise noted within this report.

Page numbers and total number of pages are listed on the bottom of each page. Because each page contains information to the sample in-which any part may be significantly relevant to the other parts of this report; this report shall not be reproduced, except in full, without the written approval of the laboratory's management. Reproduction of this report of any kind, except in full, shall invalidate this report's laboratory approval and all data contained therein.

DATA QUALIFIERS:

Data qualifiers may be utilized when reporting test results as an aid to understanding laboratory method limitations. Data qualifications may be in the form of either a report narrative or/and flagged test results. Data qualifier flag definitions are located on the last page of this report. Holding Time and Preservation recommendation excursions will be narrated within the individual test group or on page 2 of this report.

QUESTIONS AND OPINIONS

Questions regarding this report may be made by contacting the Laboratory Director/Manager or your Project Manager.

Sample Receipt Report

Logged In: 8/4/2021

Received By: gainesi1

Shipping Container Condition: Good

Chain of Custody Record Present: Yes

COC Complete: Yes

Custody Seals Present: No *(on sample or on shipping container)*

Custody Seals Intact: No

Sample Container Condition: Good

Proper Sample Container: Yes

Sample Label Present: No

Sample Label Complete and Matches COC: No

Sample Received On Ice: No

Temperature: 25.0 deg. C Thermometer ID: ECL0003-2-18

Chemically Preserved: No *(documentation review, physical check performed during sample prep if required)*

Within Holding Time: Yes

Sample Receipt Comments: Samples are analyzed on an 'as received' basis. Sample conditions upon arrival such as temperatures and headspace may not be optimal. Deviations from optimal sample conditions, as described by the EPA in SW-846, will be communicated to the customer. Any pH testing done at our lab is outside the bounds of optimal testing; within 15 minutes of the sample being taken.
Sample Collection: 7/29/2021 @ 13:30
Sample Receipt: 8/4/2021 @ 8:15 and @ 11:00

All results are reported as being in "as-received" condition and on a wet-weight basis unless otherwise noted.

Lab ID: ECL210928

SDG: ECL2021-505

Sample Case Narrative

With any exceptions noted as flags and/or narratives detailed below on this page, standard analytical protocols were followed in the preparation and analysis and no problems related to the reported end test results were encountered or anomalies observed. The sample was analyzed with the intent to achieve a lower limit of Limit of Quantitation (LOQ) sufficient to meet the needs of the intended purpose of the test as understood by the laboratory. In some cases, either due to matrix interference or analytes present at high concentrations, samples may be diluted. For diluted samples or for samples that were received with insufficient amount, the reporting limits (RL) and LOQ are adjusted relative to the dilution volume.

All EPA recommended holding times specified in SW-846 Chapters 3 and 4 were met unless otherwise detailed in the individual sections below.

SAMPLE RECEIPT

The laboratory reports test results in as-received condition. The condition of this sample at time of receipt is detailed in the Sample Receipt Report located on page 2 of this report.

SAMPLE ANALYSIS

As related to the final reported values in this test report, all method and laboratory established quality control criteria were met except as detailed below. If no anomalies are listed it can be assumed that all quality control criteria related to the values presented were in control.

The laboratory establishes limits for sample quality control checks (matrix spike and surrogates) from the laboratory's control samples (LCSs) which utilize a clean control matrix. This allows the user to assess differences between analyte precision and bias in their sample against limits established from a known laboratory control.

EPA-6020

OCER211006 *Other-Narrate

ICV for Ba recovered outside control limits, low. ICB for Ag and Ba recovered outside control limits. MB for Ag and Ba recovered outside control limits, high. Both bracketing CCV s for Ba recovered outside control limits, low. Both bracketing CCBs for Ag and Ba recovered outside control limits, high. LCS data recovered within control limits for all elements.

All results are reported as being in "as-received" condition and on a wet-weight basis unless otherwise noted.

NOTE: Regulatory limits are provided as a best-faith effort courtesy. The client is solely responsible for ensuring that these limits are correct for their sample.

**** END OF TEST GROUP ****

All results are reported as being in "as-received" condition and on a wet-weight basis unless otherwise noted.

NOTE: Regulatory limits are provided as a best-faith effort courtesy. The client is solely responsible for ensuring that these limits are correct for their sample.

Client ID: Annealing Oven
Metal Flakes

Lab ID: ECL210928

SDG: ECL2021-505

REPORTING LIMITS AND ACRONYMS

RL Reporting Limit - The lowest level that the laboratory reports down to for that specific test parameter/method combination. The RL is set to be at or above the method detection limit (MDL) as determined in a clean control matrix and is adjusted for dilutions. The RL will match the associated LLOQ if the MDL is not routinely verified. Under NELAP, routine MDL studies are only required when reporting a value below LLOQ. Values reported between the LLOQ and the RL are always considered estimated. RL is not applicable for some tests.

LLOQ Lower Limit of Quantitation - The lowest verified point that a value can be reported that is within a known level of confidence, adjusted for sample digestate/extract dilution. LOQ is not applicable for some tests.

REPORTING FLAGS

B Denotes a sample test result analyte that is above the RL was also found in the associated laboratory method blank at a concentration that was above the RL.

T Denotes that the reported analyte that is at or above the RL was only tentatively identified and not confirmed where the test method requires such confirmation be performed. This code is present because some data clients do not require the laboratory to perform the confirmation in order for the test result to be usable.

ND or < Analyte was not detected at or above the RL.

> Analyte was greater than the reported value.

J Estimated Value - Denotes that the reported analyte that is at or below the RL has an increased level of potential bias.

E Estimated Value - Denotes that a positive numeric value is an estimated value. Used when the reported value is greater than the highest instrument calibration point in the curve or above the instrument's verified upper linear dynamic range.

UJ RL and LLOQ Estimated - Denotes the RL and LOQ has an increased level of potential bias. Used in non-detect values as necessary.

NR Not Run - Denotes that the listed analyte was not run or was not reported.

SURROGATE LIMIT GENERATION

It is important to note that when surrogates are used as part of the test method, statistical control limits (when employed) are derived from the LCS results in an appropriate QC matrix (typically ottawa sand for solid matrix samples, reagent water for aqueous matrix samples, TCLP solution for TCLP extracts, and mineral oil for non-aqueous liquid concentrated waste samples). These limits therefore are representative of the process by which RL and LLOQ are established and verified. This allows the data user to assess matrix effects related to surrogate recovery against a known laboratory control.

**** END OF TEST REPORT ****

All results are reported as being in "as-received" condition and on a wet-weight basis unless otherwise noted.

NOTE: Regulatory limits are provided as a best-faith effort courtesy. The client is solely responsible for ensuring that these limits are correct for their sample.

Waste Stream Determination Form

Facility Name: Metal Spinners 914 Wohlert St. Angola, IN 46703
 Person Completing Form: Mike Winkler EH&S Manager

Waste Profile: WH002
 Date: Sept. 07, 2021

1. Waste process and description																																																													
Waste description (including physical description - i.e. liquid, solid, sludge) <u>Laser Air Filter- Solids</u>																																																													
Process generating the waste <u>Laser Cutting of Metals</u>																																																													
2. Waste Stream Determination																																																													
Waste determination is based on: <input type="checkbox"/> User knowledge (Process evaluation, SDSs, and interview) <input checked="" type="checkbox"/> Waste analysis (List all sampling dates and attach analytical results)																																																													
Sample Date: <u>1/23/2017</u>																																																													
Is the waste a "solid waste" according to §261.2? <i>If no, specify exclusion or exemption by regulatory citation and description:</i>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No																																																												
Is the solid waste excluded under §261.4 or exempt from regulation as a hazardous waste? <i>If yes, specify exclusion or exemption by regulatory citation and describe:</i>	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No																																																												
Is the waste a listed hazardous waste? (Detail rationale, as necessary) F-listed per §261.31 K-listed per §261.32 P-listed per §261.33(e) U-listed per §261.66(f) <i>If yes to any of the above, describe rationale for use of these waste codes:</i>	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No																																																												
Does the SDS, lab analysis, or other information indicate the waste has any of the following characteristics:																																																													
D001 { A liquid with flash point of 140 °F or lower, A non-liquid capable of causing fire, An ignitable compressed gas, or Oxidizer? Ignitable? >	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No																																																												
D002 { A liquid with a pH of 2 or less, A liquid with a pH of 12.5 or greater, or Does the waste corrode steel at a rate greater than 0.25 inches per year at a test temp of 130 degree F? Corrosive? >	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No																																																												
D003 { Unstable under normal conditions, Reacts violently with water, Gives off toxic gases, or Capable of detonation or explosion under normal conditions or when heated. Reactive? >	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No																																																												
Is waste characteristically toxic as indicated by a Toxicity Characteristic Leaching Procedure (TCLP) (SW-846 Method 1311) greater than the following? <i>(Check all that apply (if any))</i>																																																													
<table border="0" style="width:100%;"> <tr> <td style="width:25%;">Metals (mg/L)</td> <td style="width:25%;">Volatiles (mg/L)</td> <td style="width:25%;">Semi-Volatiles (mg/L)</td> <td style="width:25%;">Pesticides/ Herbicides (mg/L)</td> </tr> <tr> <td>D004 <input type="checkbox"/> Arsenic (5.0)</td> <td>D018 <input type="checkbox"/> Benzene (0.5)</td> <td>D023 <input type="checkbox"/> o-Cresol (200.0)</td> <td>D020 <input type="checkbox"/> Chloradane (0.03)</td> </tr> <tr> <td>D005 <input type="checkbox"/> Barium (100.0)</td> <td>D019 <input type="checkbox"/> Carbon Tetrachloride (0.5)</td> <td>D024 <input type="checkbox"/> m-Cresol (200.0)</td> <td>D012 <input type="checkbox"/> Endrin (0.02)</td> </tr> <tr> <td>D006 <input type="checkbox"/> Cadmium (1.0)</td> <td>D021 <input type="checkbox"/> Chlorobenzeze (100.0)</td> <td>D025 <input type="checkbox"/> p-Cresol (200.0)</td> <td>D031 <input type="checkbox"/> Heptachlor + epoxide (0.008)</td> </tr> <tr> <td>D007 <input type="checkbox"/> Chromium (5.0)</td> <td>D022 <input type="checkbox"/> Chloroform (6.0)</td> <td>D026 <input type="checkbox"/> Cresol - Is the waste PCB-contaminated? <i>If yes, verify RCRA status at §261.B. (TSCA regulations may apply.)</i>	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No																																																												
RCRA waste determination <input type="checkbox"/> Hazardous with waste codes: _____ <input checked="" type="checkbox"/> Non hazardous <input type="checkbox"/> Exempt because: _____ <input type="checkbox"/> Used Oil <input type="checkbox"/> Universal waste																																																													

Waste Stream Determination Form (continued)

3. Conclusions -		
Waste is managed as the following, based upon information in this form:		
<input type="checkbox"/> Hazardous Waste with:	Federal Waste Codes:	State Waste Codes (if applicable)
<input checked="" type="checkbox"/> Nonhazardous Waste	_____	_____
<input type="checkbox"/> Used Oil	_____	_____
<input type="checkbox"/> Universal Waste	_____	_____
<i>Required labeling:</i>		
<input type="checkbox"/> Exempt because:	_____	
<input type="checkbox"/> Other Regulated Waste:	_____	
<input type="checkbox"/> Empty Container:	_____	
State specific requirements: (applicable to any of the above characterizations)		

4. Waste storage, treatment, and disposal	
Specific description of waste management from generation point to final disposition:	
Recycled by 3rd party _____	
Approximate Generation Rate: Filter Change Every 5 years _____	
Are land disposal restrictions (LDR) applicable?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
If yes, specify treatability group:	
<input type="checkbox"/> Wastewater	
<input type="checkbox"/> Nonwastewater	
If LDR standards apply, are UHCs present above treatability standards? <i>[Only applicable to certain characteristically hazardous waste codes specified by regulation.]</i>	<input checked="" type="checkbox"/> NA <input type="checkbox"/> Yes <input type="checkbox"/> No
If yes, specify UHCs:	

DOT Shipping name: Non-DOT/Non-RCRA Regulated Solid _____	
IMPORTANT: Attach all supporting documentation (e.g. SDSs, laboratory analysis, generator knowledge, etc.) to this waste stream determination.	

Source: McCoy and Associates, Inc., as adapted by Fath Infrastructure & Environment, LLC.

Notes:	Analysis to be updated once waste is next generated.
