Re: Town of Farmersburg – Wastewater Compliance Plan Update
Agreed Order – Case No. 2016-23833-W

Dear Aletha:

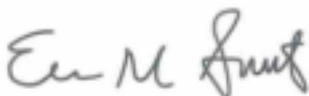

As directed by your department and based on communication in December 2023, the Compliance Plan for the Town of Farmersburg has been revised to include the proposed work in a recently funded storm water improvements project. The following summarizes the current status of each major item relative to the plan's required schedule.

Design	February 2024	Status – All design work was completed in early February as required to bid the project in late February.
Bidding	March 2024	Status – Bids were received for the project on February 29, 2024. HWC has reviewed the bids and is in the process of providing a recommendation to the Town with respect to award of a contract.
Construction	September 2024	Status – No Activity. Given the pending award of a construction contract, it is anticipated that work will start in early May.

Additionally, as part of the storm water project, HWC completed GIS mapping of the Town's wastewater and stormwater infrastructure. While completing this work some sewers were located which were not known to exist and which had structural problems. This rehabilitation is in the process of being completed by the Town and will no doubt help with wet weather flow impacts on the system.

We appreciate IDEM's continued assistance and cooperation in this matter as the Town works to address the issues in its sanitary system. If you have any questions or concerns regarding this information, please contact me at 812-234-2551 Ext. 410, or esmith@hwcengineering.com

Sincerely,

Eric M. Smith, P.E.
Vice President/Director Water Resources
