**Zip Code:** 478749124

**Comments:** Caller is reporting at their waste treatment plant that their line from the waste treatment is not running at this time. The waste treatment plant Drinking water process uses sodium hydroxide. In the waste treatment process they use sodium bicarbonate. The supplier brought in sodium hydroxide and put it in the waste treatment process that uses sodium bicarbonate. They don't believe the water from the waste treatment process got into the Wabash River. Their line from the waste treatment was plugged due to the 2 chemicals mixing and at this time the line is not running.

### Actions

Task	Staff Assigned	Start Date	Due Date	Completed Date	Hours Spent
Conduct Follow-up	Peters, Jason			03/07/2024	
<p>Comments: Contacted Mr. Slinker. At the time of contact no change in current status. He was going to check on outfall first thing in the AM to confirm no fish kill. If fish kill, he was going to report back to OSC or spill line. Mr. Slinker advise they are going to receive another shipment of Sodium Bicarbonate on 3/8/2024.</p> <p>Mr. Palin was notified of incident and is going to have one of there staff make a site visit on 3/8/2024.</p>
