Brenda,

I officially request that our permit be voided.

If we distribute biosolids in the future, I will submit another application for a permit to do so.

Thanks,

Todd Boyle

Todd,

Hi. Please note that Section G.2. of your Marketing and Distribution permit requires you to submit a report 30 days following the end of each calendar month for the term of your permit. The report must indicate either no marketing and/or distribution occurred (no attachments required) or include the required information for when biosolids are distributed. Attached are instructions for e-mail submittal of reports.

If you do not want to continue to submit reports, you can request your permit be voided. Otherwise, you are required to submit a report until your permit expires on June 30, 2027.

Thank you  
brenda

Ms. Stettler,

As stated in the email sent with the April 2024 land application report, Fall Creek Regional Waste District is no longer producing nor distributing biosolids. We have had no biosolids in our storage barn since April, with no intention in the near future to produce more. We are currently sending cake to a landfill.

Our current RDP system is extremely worn and we are longer using it to produce biosolids. Also, our potential plans to replace our RDP system with a new biosolids producing machine have been put on hold by our board until 2025. The odds of this project being approved by our board in 2025 are very much uncertain.

Therefore, you will not be receiving monthly land application reports from us for the time being. If this changes, you'll be the first to know.

Thanks,

Todd Boyle
