Re: Inspection Summary/Violation Letter

Dear Johnathan Bautista:

Unfortunately, I never received the notice via email on 06/22/2022. Based on the inspection on June 15, 2022, Howard Materials have added additional measures to control the fugitive dust. Please see below as well as the attached.

- Purchased a Sweeper truck to be used to help clean up S. Tibbs Ave and around our facility (see the attached proof of purchase)
- Purchased a Water truck to help mitigate the dust from the plant (see the attached proof of purchase). Every 35 minutes, during business hours, the water truck goes around the facility.
- Purchased a DSS (Dust suppression system) trailer. This is a machine that will mist water during business hours.
- While we are operating our sprinklers are running to help control dust.

I attached our current fugitive dust control plan from our current permit. (FESOP No. F097-37596-00082)

Howard Materials is committed to holding a high standard to stay in compliance with all aspects of our Air Quality Control.

Sincerely,

A handwritten signature in black ink, appearing to read 'Chandler Wilson', with a long, sweeping horizontal stroke extending to the right.

Chandler Wilson
VP of Howard Materials
Howard Materials, LLC

Attachment A
Fugitive Dust Control Plan

FESOP No. F097-37596-00082

1. Fugitive particulate matter (dust) emissions from paved roads, unpaved roads, and parking lots shall be controlled by one or more of the following measures:
 - A. Paved roads and parking lots:
 - a. Cleaning by vacuum sweeping on an as needed basis (monthly at a minimum).
 - b. Flushing.
 - c. An equivalent alternate measure.
 - B. Unpaved roads and parking lots:
 - a. Paving with asphalt or concrete.
 - b. Treating with a suitable and effective oil or chemical dust suppressant on an as needed basis.
 - c. Spraying with water on an as needed basis.
 - d. Double chip and seal the road surface and maintain on an as needed basis.
 - e. An equivalent alternate measure.
2. Fugitive particulate matter (dust) emissions from aggregate stockpiles shall be controlled by one or more of the following measures.
 - A. Cleaning around the perimeter of aggregate piles.
 - B. Application of a suitable and effective oil or other dust suppressant on an as needed basis.
 - C. An equivalent alternate measure.
3. Fugitive particulate matter (dust) emission from outdoor conveying of aggregates shall be controlled by one or more of the following measure:
 - A. Enclose the conveyor belt totally on the top and sides as needed to minimize visible emissions. If needed, exhaust emissions to particulate control equipment during operation of conveyor.
 - B. Apply water or suitable and effective chemical dust suppressant at the feed and the intermediate points on an as needed basis to minimize visible emissions.
 - C. An equivalent alternate measure.
4. Fugitive particulate matter (dust) emissions resulting from the transferring of aggregates shall be controlled by one or more of the following measures:
 - A. Minimize the vehicular distance between the transfer points.
 - B. Enclose the transfer points, and if needed, exhaust to particulate control equipment during operation of the transferring system.
 - C. Apply water or suitable and effective chemical dust suppressant on transfer points on an as needed basis.
 - D. An equivalent alternate measure.
