Michelle,

Bynum Fanyo Utilities became the Operator in charge for the Town of Winslow in mid-November. The previous operator abruptly left his post at the end of October. The staff that remained was not instructed on how and when sampling was to occur. We have searched the files and laboratory for missing information and have submitted what we found for the months of October and November. We currently are on a weekly visit and have secured proper sampling procedures and record keeping that is required within the NPDES permit. The November report was overdue because we had still been searching for possible lab results.

All lab work is now being performed by our staff at BFU and is being performed in our lab.

The ammonia violations were obviously not during our time with the town. We will be monitoring the effluent and making any possible adjustments needed for any future violations of the ammonia, pH, and suspended solids as needed. We are in the process of training town staff to perform the lab work in-house for the future and hopefully getting them trained to become future operators as well.

Mr. Chuck Krieg is the operator of record and makes a site visit weekly. BFU is working with town officials on securing funding for current operations and maintenance needs for the WWTP as well as the collection system. Feel free to call me with any questions or concerns.

Thanks,

Jeff S. Farmer
