---

Ms. Gau,

IDEM has reviewed the submittal for the Reworld Solutions, LLC (Reworld) (formerly Covanta Environmental Solutions, LLC) solid waste processing facility dated July 22, 2024 (VFC #83676932). This was submitted to comply with the Requirement D1 of the facility's permit approved July 17, 2024 (VFC #83669210), which required submittal of the facility's Combustible Dust Safety Plan to IDEM for approval within 60 days of receiving the current permit renewal.

The Combustible Dust Program Standard Operating Procedures revised July 22, 2024, and submitted August 1, 2024, meets Requirement D1 of the permit renewal approved July 17, 2024, and the requirements of IAC 11-13.5-7. The permittee must follow this plan.

The updated financial assurance required by Required D2 was provided on August 1, 2024, under a separate submittal.

Thanks,

Jackson Moore  
Environmental Engineer | Engineering Section  
Permits Branch | Office of Land Quality  
Indiana Department of Environmental Management
