---

Hi Mr. Lienhart,

I want to check with you to determine if the facility submitted any document(s) since your email of August 22, 2023 (VFC # [83526312](#)), which includes well installation photos, for the Haber Land Co. Facility (SW Program ID 89-up-05).

I recently reviewed my files, including IDEM's virtual file cabinet (VFC). I am unable to locate any groundwater monitoring reports or correspondence submitted since your email or any other recent document submissions. In addition, IDEM's solid waste permit manager Ms. Juliana Fracetti is unaware of any submittals since your email.

IDEM previously received a report dated August 1, 2023 (VFC # [83515954](#)), detailing the June 15, 2023, groundwater monitoring event. We state in our review letter dated September 6, 2023 (Letter) (VFC # [83529475](#)), that the report was generally acceptable and in compliance with *Approval of the Amended Risk-Based Closure Work Plan (Approval)* dated July 7, 2022 (VFC # [83339281](#)). Additionally, the Letter includes comments regarding the June 2023 event, the upcoming groundwater monitoring event proposed during fall 2023, and sample collection on a quarterly schedule in addition to other comments. Please note Requirement C4 of the *Approval* identifies the submission of documentation for groundwater monitoring events is to occur within 60 days after the event.

If the facility submitted any document(s) since your email of August 22, 2023, then please provide the submission date and to whom the facility submitted the document(s) so we can correct any defect in our document intake process. In addition, please provide a digital copy of the document(s) within 10 days so we can upload the document(s) to VFC.

If the facility has not submitted any documents, please contact me ASAP. In addition, if you have other questions, then please feel free to contact me at the number or email identified below.

Thanks,  
Scott
