Scott,

Environmental Management Consultants (EMC) sampled GDP-2, GDP-31, GDP-37, and GDP-38 on June 28, 2024. The results were as follows:

	CH4	CO2	O2
GDP-2	82.2%	9.8%	0.1%
GDP-31	0.0%	2.4%	17.2%
GDP-37	6.6%	6.2%	5.1%
GDP-38	0.0%	10.1%	3.0%

The methane concentration identified at GDP-37 continues to exceed 25% percent of the LEL. EMC confirmed the locations of the methane alarms as described in the revised MMP. As previously discussed, EMC will monitor the gas detection probes on a weekly basis. EMC is currently preparing to implement the proposed methane mitigation plan. IDEM will be notified prior to implementation. Let me know if you have any questions.

Sincerely,

Matt Feller, LPG, PG, Regional Director
