I believe this site is actually Waste No Energy since RAKR Farms does not have a digester, but Mr. Roach is connected with Waste NO Energy. Since the site is under the SW Program I have included Kelly in my response to you.

Hello

Got a call from Richard Roach in Monticello, White County, that his anaerobic digester was foaming. They are releasing digester contents to his lagoon to lower the level in the digester. Some foam has overflowed and they are sucking it up with vac trucks. All material is on their property and no waterways are affected.

Is this something you guys want to look at?
