**Re: Phase I Environmental Site Assessment Report**  
Smiley Property  
520 New York Avenue and Emerson Avenue  
New Castle, Henry County, Indiana 47362  
SES Project No.: 2024-0494

Dear Ms. Faulds:

At your request, SES Environmental (SES) completed a Phase I Environmental Site Assessment (ESA) of the above referenced subject property in general accordance with the United States EPA Standards and Practices for All Appropriate Inquiries (AAI), 40 CFR Part 312} and guidelines established by the ASTM Standard Practice E 1527-21.

The results of this assessment indicate no *recognized environmental conditions* (RECs) are associated with the subject property. Please refer to the Executive Summary and report text for a complete listing of the Phase I ESA findings and corresponding opinions.

We appreciate the opportunity to assist you with this project. If you should have any questions or concerns regarding this report, or if we can be of any further service to you in the future, please do not hesitate to call us at (260) 497-7645.

Respectfully Submitted,  
**SES Environmental**

## 1.0 EXECUTIVE SUMMARY

SES Environmental (SES) conducted a Phase I Environmental Site Assessment (ESA) of a 3.227 acre property located at 520 New York Avenue and along Emerson Avenue in New Castle, Henry County, Indiana (herein after referred to as the “*subject property*”). The assessment was performed for the **Indiana Brownfields Program**, the **City of New Castle**, and **RealAmerica Development, LLC** to assess the subject property and surrounding properties for *recognized environmental conditions* or indications of potential environmental risk and liability in order to satisfy the requirements to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations on CERCLA liability.

In summary, this assessment included the following elements:

- A visual inspection of the subject property and limited observations of surrounding properties,
- A review of historical land use,
- A review of regulatory listings, and
- Interviews with persons potentially knowledgeable concerning subject property conditions.

The subject property is irregularly shaped and consists of 3.227-acres located at the northeast corner of New York Avenue and Emerson Avenue, approximately ½ mile northwest of the City of New Castle central business district. Surrounding property usage includes vacant land to the north and east, and commercial properties to the south and west. The local topography slopes down gently to the southeast toward Castle Run.

The subject property is developed with a one-story residential dwelling and detached garage on the southeast portion of the property. The remainder of the property consists of vacant land.

### Inspection Summary

A residential dwelling and garage are located on the south portion of the property. The residential dwelling consists of one-story with a full basement. The main floor consists of finished living space (i.e., kitchen, living room, bathroom, bedrooms). The basement is unfinished and includes storage space, a laundry area, a furnace, and water heater.

An approximately 300-gallon aboveground heating oil storage tank (AST) is located in the southeast portion of the basement. A fill pipe for the AST is located on the south side of the house. A level gauge on the AST indicates it is possibly half full of product (heating oil). Evidence of releases was not observed around the AST or fill pipe.

Pits, ponds, wastewater treatment lagoons, stockpiled soils, surface staining, odors, drums, bulk containers, landfills or dumping, oil or gas wells, water wells, septic systems, or evidence of air or wastewater emissions were not observed at the subject property.

### Historical Summary

The historical research presented in this assessment has established the use of the subject property since 1947. Review of a historical aerial photograph from 1947 indicates the subject property was agricultural land. Records indicate a residential dwelling was constructed on the south portion of the property (520

New York Avenue) in 1948. The remaining portions of the property have consisted of vacant or agricultural land since at least 1947.

### Regulatory Record Summary

The subject property and adjoining properties are not included on the reviewed record sources and databases.

Based on distance, topography, and/or regulatory closure status, none of the listed properties within specified search distances are likely to have current or former releases of hazardous substances and/or petroleum products with the potential to migrate to the subject property.

### Findings and Conclusions

SES identified the following *business environmental risks* (BERs) associated with the subject property during the completion of this Phase I ESA:

- Radon testing was not conducted as a part of this assessment; however, according to the EPA Map of Radon Zones in Indiana, the subject property is located in Zone 1, which is an area with a predicted indoor screening level of greater than 4 pCi/L (highest potential).
- Based on the 1948 construction date of the residential dwelling, asbestos-containing building materials, lead-based paint, and/or lead-containing pipes or plumbing fixtures may be present. Further analysis would be required to determine if asbestos, lead-based paint, or lead in drinking water are present at the subject property.
- An approximately 300-gallon heating oil AST is located in the southeast portion of the basement. A fill pipe for the AST is located on the south side of the house. A level gauge on the AST indicates it is possibly half full of product (heating oil). Evidence of releases was not observed around the AST or fill pipe. The AST and any possible product should be properly removed and disposed if the building is to be demolished.
- Records obtained from the Henry County Health Department indicate that a septic system was present north of the residential dwelling in 1978. Information concerning the closure of the septic system was not found.

SES did not identify any *vapor encroachment conditions* (VECs) associated with the subject property during the completion of this Phase I ESA.

SES did not identify any *historical recognized environmental conditions* (HRECs) associated with the subject property during the completion of this Phase I ESA.

SES did not identify any *controlled recognized environmental conditions* (CRECs) associated with the subject property during the completion of this Phase I ESA.

SES did not identify any *recognized environmental conditions* (RECs) associated with the subject property during the completion of this Phase I ESA.

**Recommendations:** Based on the findings during the completion of this Phase I ESA, no further environmental investigation is warranted at this time.

It is this firm's professional opinion that all appropriate inquiry has been made into the previous ownership and uses of the subject property consistent with good commercial and customary practice in an effort to identify potential environmental liabilities. This summary does not contain all the information found in the full report. The report should be read in its entirety to obtain a more complete understanding of the information provided and to aid in any decisions made or actions taken based on this information.

---

## 2.0 INTRODUCTION

SES Environmental (SES) conducted a Phase I Environmental Site Assessment (ESA) of a 3.227 acre property located at 520 New York Avenue and along Emerson Avenue in New Castle, Henry County, Indiana (herein after referred to as the “*subject property*”). This report details the Phase I ESA methods and findings.

### 2.1 Purpose

The purpose of this assessment is to identify, to the extent feasible, *recognized environmental conditions* (RECs) as defined in the ASTM standard as (1) the presence of *hazardous substances or petroleum products* in, on, or at the *subject property* due to a *release* to the environment; (2) the likely presence of *hazardous substances or petroleum products* in, on, or at the *subject property* due to a *release* or likely *release* to the environment; or (3) the presence of *hazardous substances or petroleum products* in, on or at the *subject property* at conditions the pose a *material threat* of a future *release* to the environment.

Additionally, SES may also identify *historical recognized environmental conditions* (HRECs), *controlled recognized environmental conditions* (CRECs), *vapor encroachment conditions* (VECs), *de minimis* conditions, *business environmental risks* (BERs), significant data gaps, Non-ASTM considerations, environmental liens, and activity/use limitations in connection with the subject property. These terms are defined in Appendix G.

### 2.2 Scope of the Assessment

This Phase I ESA was completed in general accordance with USEPA Standards and Practices for All Appropriate Inquiry (AAI) and ASTM Standard Practice E1527-21, which define good commercial and customary practice. Completion of this Phase I ESA under these standards is intended to permit the *user* to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations on CERCLA liability.

The scope of inquiry included a physical site inspection, historical data review, regulatory agency records review, and interviews with persons potentially familiar with subject property activities.

### 2.3 Significant Assumptions

Information collected for this assessment from public files, third-party providers, and through interviews is assumed to be complete and accurate. This information was not independently verified unless actual knowledge of subject property conditions or history indicated obvious inconsistencies or errors.

### 2.4 Limitations and Expectations

Processes, procedures, and methodologies used in acquiring information and recording data for the assessment were in accordance with procedures outlined in ASTM E1527-21. The assessment was conducted following generally accepted principles and practices of other consultants conducting similar assessments at the same time and in the same geographic area. Intrusive investigation and sampling were not conducted as a part of this assessment.

The assessment resulted in no significant exceptions, deviations, or deletions from the ASTM E1527-21 Standard. Researched and reviewed information was limited to documentation that was reasonably ascertainable and/or practically available from local, State, and Federal government records. Additional limitations are presented in Section 13.0 of this report.

### **2.5 User Reliance**

This Phase I ESA is confidential and prepared for the sole benefit and exclusive use of the **Indiana Brownfields Program**, the **City of New Castle**, and **RealAmerica Development, LLC** to fulfill all appropriate inquiry standards with regard to the presence of *recognized environmental conditions* at the subject property. The referenced entities are hereby authorized to rely on the report contents, subject to any stipulated limitations in the report and in the standard terms and conditions of the assessment contract. No other parties shall have reliance rights, unless provided in writing from SES.

---

## **3.0 USER PROVIDED INFORMATION**

The ASTM Standard defines User as the party seeking to use Practice E 1527 to complete an environmental site assessment of the subject property. A User may include, without limitation, a potential purchaser of the subject property, a potential tenant of the subject property, an owner of the subject property, a lender, or a property manager. The User has specific obligations for completing a successful application of this practice as outlined in Section 6 of the ASTM Standard E 1527-21.

In order to qualify for one of the Landowner Liability Protections offered by the Small Business Liability relief and Brownfield's Revitalization Act of 2001 (if desired), the User must provide certain information (if available) included on the User Questionnaire to the Environmental Professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Ms. Meghann Thannikkunnath, Development Associate with RealAmerica Development, LLC, the User of this report, completed a Phase I ESA User Questionnaire. A copy of the questionnaire is presented in Appendix E. Provided information is summarized in the following sections.

### **3.1 Title Information**

A search of land title records was not conducted during this assessment. According to assessment records, the subject property is currently owned by Jeffrey and Mary Kathleen Smiley and the Jeffrey and Mary Kathleen Smiley Revocable Trust.

### **3.2 Environmental Liens or Activity and Use Limitations**

A search of land title records for environmental liens or activity and use limitations was not conducted during this assessment.

Ms. Thannikkunnath indicated she was unaware of any environmental liens, engineering controls, land use restrictions, or institutional controls recorded against the subject property under federal, tribal, state or local law.

SES reviewed the [Indiana Institutional Controls Registry](#) and did not identify any institutional controls for the subject property.

### **3.3 Specialized Knowledge of User**

Ms. Thannikkunnath did not provide any specialized knowledge or experience related to the subject property or nearby properties.

### **3.4 Commonly Known or Reasonably Ascertainable Information**

Ms. Thannikkunnath indicated the subject property is vacant land. She was not aware of any chemicals, hazardous substances, or petroleum products that are present or were once present at the property. She was not aware of any spills or other releases that have taken place at the property, and she was not aware of any environmental cleanups that have taken place at the property. She indicated she was not aware of any obvious indicators that point to the presence or likely presence of contamination at the property.

### **3.5 Valuation Reduction for Environmental Issues**

Ms. Thannikkunnath was not aware of any valuation reduction for environmental issues associated with the subject property.

### **3.6 Reason for Performing Phase I ESA**

This Phase I ESA was conducted to satisfy environmental due diligence in association with a real estate transaction and property development.

### **3.7 Other Provided Information**

No other information was provided for review.

---

## **4.0 SUBJECT PROPERTY DESCRIPTION**

### **4.1 Subject Property Location and Legal Description**

The subject property consists of approximately 3.227 acres located at the northeast corner of intersection of New York Avenue and Emerson Avenue in New Castle, Henry County, Indiana. Geographically, the subject property is located at approximately 39.9360600° north latitude and 85.3787820° west longitude. The subject property includes a 0.34 acre parcel located at 520 New York Avenue (Parcel Number 33-12-10-320-103.000-016) and a portion of a 7.97 acre parcel located on Emerson Avenue (Parcel Number 33-12-10-320-109.000-016). Abbreviated legal descriptions (Appendix H) of the property parcels obtained from Henry County Assessor's Office records are as follows:

Parcel Number 33-12-10-320-103.000-016: Part of the East ½ of the Southwest ¼ of Section 10, Henry Township, Henry County, Indiana

Parcel Number 33-12-10-320-109.000-016: Part of the Northeast ¼ of the Southwest ¼ of Section 10, Henry Township, Henry County, Indiana

The elevation of this subject property is approximately 978 feet above mean sea level as shown on the New Castle West, Indiana USGS 7.5-Minute Quadrangle Map. A Topographic Map and Site Plan are presented as Figures 1 and 2, respectively, in Appendix A.

#### ***4.2 Descriptions of Structures, Roads and Other Improvements***

The subject property is developed with a one-story residential dwelling and detached garage on the southeast portion of the property. The remainder of the property consists of vacant land.

#### ***4.3 Current Use of the Subject Property***

The residential dwelling is currently rented to a private individual. The remainder of the property is vacant land.

#### ***4.4 Current Uses of Adjoining Properties***

Properties immediately adjoining to the subject property are described below. Details and orientations of these properties are depicted on the Site Plan presented in Appendix A.

- North: The north adjoining property consists of vacant land. This property is located topographically crossgradient from the subject property. Potential environmental concerns were not observed on this property.
- East: The east adjoining properties consist of a paved parking lot, vacant land, and a stormwater retention pond. These properties are located topographically downgradient from the subject property. Potential concerns were not observed on these properties.
- South: New York Avenue is located south of the subject property with commercial facilities including Preppy Puppy and Indiana Department of Child Services (501 New York Avenue) and Galyen & Row Law Offices (595 New York Avenue) beyond. These properties are located topographically crossgradient from the subject property. Potential environmental concerns were not observed on these properties.
- West: Emerson Avenue is located west of the subject property with commercial facilities including Smiley Enterprises (422 New York Avenue) and Fresenius Medical Care (101 Emerson Avenue) beyond. These properties are located topographically crossgradient from the subject property. Potential environmental concerns were not observed on these properties.

#### ***4.5 Physical Setting***

##### ***4.5.1 Surface-Water Characteristics***

No surface water features were observed at the subject property. The nearest surface-water feature consists of Castle Run located approximately 250 feet southeast of the subject property.

Review of a FEMA Flood Insurance Rate Map (FIRM) indicates the subject property is located in an area of minimal flood hazard (Zone X). A copy of the FIRM is presented in Appendix H.

#### 4.5.2 Published Soil and Geological Characteristics

A United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Custom Soil Resource Report for Henry County, Indiana, shows soil beneath the subject property consists of Westland silt loam, which consists of silt, clay, gravelly sandy clay loam, and gravelly coarse sand. Details concerning the specific soil types identified on the property are provided in a custom soil report presented in Appendix H.

Review of three water well logs (Appendix H) for water wells located within ½ mile of the subject property indicates soil stratigraphy beneath the subject property area consists of alternating layers of clay, gravel, and sand from the near surface to a depth of 363 feet below ground surface (bgs) followed by shale bedrock.

#### 4.5.3 Groundwater Characteristics

Review of three water well logs (Appendix H) for water wells located within ½ mile of the subject property indicates the static groundwater level beneath the property area is measured at depths of 12 and 20 feet bgs.

The local topographic surface slopes gently down to the southeast toward Castle Run. Area topography can indicate the shallow groundwater gradient, although variations in subsurface structural and geological conditions and other factors can affect groundwater conditions. In cases where contamination is suspected, the groundwater gradient should be analyzed using actual subsurface data to accurately evaluate groundwater conditions.

---

## **5.0 HISTORICAL REVIEW**

### **5.1 Aerial Photographs**

Aerial photographs from the years 1947 through 2020 were obtained from Environmental Data Resources, Inc. (EDR). Copies of the aerial photographs are presented in Appendix C. The aerial photographs are described in the following table.

<b>Photograph Year</b>	<b>Subject Property Observations</b>	<b>Adjoining Property Usage</b>
1947	The subject property consists of agricultural land.	New York Avenue is located to the south. Adjoining property usage consists of agricultural land in all directions.
1957	The existing residential dwelling was constructed on the southeast portion of the property. The remaining portions are agricultural land.	A commercial building was constructed to the southwest. Adjoining properties to the north, south, east, and west are vacant or agricultural land.
1959	The subject property is relatively unchanged since the previous aerial photograph.	Adjoining property usage is relatively unchanged since the previous aerial photograph; however, an addition was constructed to the commercial building to the southwest.
1979	The subject property is relatively unchanged since the previous aerial photograph.	Adjoining property usage consists of vacant or agricultural land to the north, east, and west, and a commercial building to the south.

Photograph Year	Subject Property Observations	Adjoining Property Usage
1988	The subject property is relatively unchanged since the previous aerial photograph.	Adjoining property usage consists of commercial facilities to the south and west and vacant land to the north and east.
1992	The subject property is relatively unchanged since the previous aerial photograph.	Adjoining property usage is relatively unchanged since the previous aerial photograph.
1998	The subject property is relatively unchanged since the previous aerial photograph.	Adjoining property usage is relatively unchanged since the previous aerial photograph.
2007	The subject property is relatively unchanged since the previous aerial photograph, except a cleared drive is located on the west portion.	Emerson Avenue was constructed to the west. Adjoining property usage is otherwise unchanged.
2012	The subject property is relatively unchanged since the previous aerial photograph.	Adjoining property usage consists of vacant land to the north, vacant land and a parking lot to the east, and commercial facilities to the south and west.
2016	The subject property is relatively unchanged since the previous aerial photograph.	Adjoining property usage is relatively unchanged since the previous aerial photograph, except the parking lot to the east was expanded.
2020	The subject property is relatively unchanged since the previous aerial photograph.	Adjoining property usage is relatively unchanged since the previous aerial photograph.

### 5.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were requested from EDR for the subject property and adjoining properties. Maps from the years 1892 through 1960 were reviewed. Copies of the maps are presented in Appendix C and are described in the following table.

Map Year	Subject Property Observations	Adjoining Property Usage
1892-1924	The subject property is not shown on these maps.	Adjoining properties are not shown on these maps.
1949	The subject property is not shown on this map.	New York Avenue is located to the south. Adjacent properties are not shown on the map; however, a creek and residences are located farther to the southeast.
1960	The subject property is not shown on this map.	Adjoining properties to the north, east, and west are not included on this map. Commercial properties are located south of New York Avenue, including a folding door factory and auto repair garage to the southwest. Residences and a contractor's warehouse are located farther to the southeast.

### 5.3 Historical Topographic Maps

Historical topographic maps from the years 1949 through 2019 were obtained from the USGS [TopoView](#) website. The maps are described in the following table. Copies of the maps are provided in Appendix C.

Topo Map Year	Subject Property Observations	Adjoining Property Usage
1949	The subject property is developed with a residence.	Adjoining properties consist of vacant land. An intermittent stream is located to the southeast.

Topo Map Year	Subject Property Observations	Adjoining Property Usage
1960	The subject property is developed with a residence.	Commercial buildings are located to the south across New York Avenue. Adjoining properties to the north, east, and west are vacant land.
1979	The subject property is unchanged since the previous map.	Adjoining property usage is unchanged since the previous map.
1982	The subject property is unchanged since the previous map.	Adjoining property usage is unchanged since the previous map, except additional commercial buildings were constructed to the south.
2010-2019	No developments are shown at the subject property.	No developments are shown on the adjoining properties.

**5.4 City Directories**

Historical city directories from 1926 through 2020 were obtained from EDR. City directories were researched at approximate 5-year intervals, when available. Listed occupants of the subject property and adjoining properties are listed as follows:

**Subject Property: 520 New York Avenue**  
 1960-2020 Residential

**Adjoining Properties**

**North: Undeveloped land**

**East: Undeveloped land/parking lot**

**South:**

**501 New York Avenue**

- 2010-2017 Hillcroft Center Inc.
- 2005 Indiana Automotive Fasteners
- 1949-1992 WH Joyner & Sons
- 1984-1987 Val Corporation Warehouse #2
- 1964-1968 New Castle Products (Plant No. 3)
- 1964 Splendor Corp. folding door manufacturer

**503 New York Avenue**

- 2010-2020 Henry County Family & Children/Department of Child Services

**595 New York Avenue**

- 1984-2020 Galyen Law Office/Jeffrey Galyen/Clark Allen Attorney

**West:**

**422 New York Avenue**

- 2020 Jeffrey Smiley

**426 New York Avenue**

2010-2020	Small Wonders Gymnastics
2010	Learning Active Preschool
1987-1995	Straight Status Inc.
1984-1987	McClurg Electric Heating & Cooling
1984	Neal Roger Construction & Excavating
1968	Indiana Gas Co. Inc. (Division Office)

**101 Emerson Avenue**

2010-2020	Rai Care Center/Fresenius Care/ Ball Dialysis
-----------	---

A summary of the information obtained from the directories reviewed is presented in Appendix C.

**5.6 Local Agency Contacts**

**5.6.1 Assessing Department**

Information obtained from the Henry County GIS/Assessor’s Office website indicates the subject property consists of one 0.34 acre parcel located at 520 New York Avenue (Parcel Number 33-12-10-320-103.000-016) and a portion of a 7.97 acre parcel located on Emerson Avenue (Parcel Number 33-12-10-320-109.000-016). The property located at 520 New York Avenue is developed with a one-story residential dwelling containing approximately 1,044 square feet of floor space and a 406 square foot detached garage. Both structures were constructed in 1948. The properties are owned by Jeffrey and Mary Kathleen Smiley and the Jeffrey and Mary Kathleen Smiley Revocable Trust.

Copies of the current property record cards are presented in Appendix H.

**5.6.2 Building, Planning, and/or Zoning Departments**

SES contacted the New Castle Building Department on May 30, 2024 for building records associated with the subject property. A response received on June 10, 2024 indicates no buildings were found for the subject property; however, permits were issued for construction of an adjoining parking lot and lighting that is part of the parent parcel.

According to the Henry County GIS zoning map (Appendix H), the subject property is zoned “C-2” for commercial use.

**5.6.3 Fire Department**

SES submitted a FOIA request to the City of New Castle’s Fire Department on May 30, 2024 regarding information pertaining to any records of storage tanks, hazardous materials, or other environmental issues associated with the subject property. A response received on June 3, 2024 indicates no records of storage tanks or releases of chemicals or hazardous materials have been reported for the subject property.

#### 5.6.4 Health Department

SES submitted a FOIA request to the Henry County Health Department on May 30, 2024 to determine if storage tanks, hazardous materials, releases of petroleum products or chemicals, water wells, septic systems, or other environmental issues exist for the subject property. A response received on May 31, 2024 indicates a permit was issued in 1978 for a private septic system consisting of a 1,000-gallon tank and a drywell. The septic system was located approximately 46 feet north of the residential dwelling.

#### 5.6.5 Oil and Gas Wells

Review of an oil and gas well map obtained from the Indiana Department of Natural Resources Oil and Gas Well Records WebApp indicates no oil or gas wells were identified on the subject property or on adjoining properties.

Review of the Environmental Data Resources Lightbox website, which includes a summary of oil and gas wells within the subject property area indicates no wells are located within 1 mile of the property.

### **5.7 Summary of Historical Review for the Subject Property**

The historical research presented in this assessment has established the use of the subject property since 1947. Review of a historical aerial photograph from 1947 indicates the subject property was agricultural land. Records indicate a residential dwelling was constructed on the south portion of the property (520 New York Avenue) in 1948. The remaining portions of the property have consisted of vacant or agricultural land since at least 1947.

### **5.8 Summary of Historical Review for the Adjoining Properties**

Historical review indicates the north and east adjoining properties have been vacant or agricultural land since at least 1947. The south adjoining properties were developed by the 1950s and occupants have included manufacturing facilities including New Castle Products and a folding door manufacturer, various warehouses and contractors, and professional offices. The west adjoining property was developed by the 1980s and occupants have consisted of a gymnastics facility, medical offices, contractors, and offices. Emerson Avenue was constructed to the west in the 2000s.

---

## **6.0 STANDARD ENVIRONMENTAL RECORD SOURCES, FEDERAL, STATE, AND LOCAL**

Federal, state, and local agencies have created databases and published reports of facilities known to possess or have the potential to be environmental concerns. These databases and reports were reviewed to assess whether properties within distances of the subject property defined in ASTM E 1527-21, may present environmental concerns for the subject property. The government records search was obtained from Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. A copy of the EDR Radius Map Report is presented in Appendix D.

The following table provides a summary of the agencies, databases, and reports consulted. Descriptions of the databases consulted and acronyms used are provided in the EDR report and in Appendix H.

Type	Regulatory Agency Database	Approximate Minimum Search Distance (AMSD)	Number of Sites within AMSD	Subject Property is Listed
Federal	National Priority List (NPL) Sites	1 mile	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	Delisted National Priority List (DNPL) Sites	½ mile	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	Superfund Enterprise Management System (SEMS) Sites (formerly CERCLIS)	½ mile	2	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	SEMS (formerly CERCLIS) No Further Remediation Action Planned (NFRAP) Sites	½ mile	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	Resource Conservation and Recovery Act (RCRA) Corrective Action Report (CORRACTS) Sites	1 mile	2	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	RCRA non-CORRACTS Treatment, Storage or Disposal (TSD) Sites	½ mile	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	RCRA Large Quantity Generators (LQG) Sites	subject property and adjoining properties	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	RCRA Very Small Quantity Generators (VSQG) Sites	subject property and adjoining properties	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	RCRA Small Quantity Generators (SQG) Sites	subject property and adjoining properties	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	RCRA Non-Generators (NON-GEN) Sites	subject property and adjoining properties	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	U.S. Brownfield Sites	½ mile	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	Institutional Control / Engineering Control Registries	Subject property	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	Environmental Response and Notification System (ERNS)	Subject property	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
State & Tribal	Hazardous Waste Sites (HWS) (equivalents to NPL and CERCLIS)	1 mile	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	Delisted Hazardous Waste Sites (HWS)	1 mile	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	Solid Waste Facilities/Landfill Sites (SWLF)	½ mile	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	Historical Landfill Sites (HIST LF)	½ mile	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	Leaking Underground Storage Tank (LUST) Sites	½ mile	7	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	Registered Underground Storage Tank (UST) Sites	subject property and adjoining properties	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	Registered Above-Ground Storage Tank (AST) Sites	subject property and adjoining properties	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	Institutional Control / Engineering Control Registries	Subject property	0	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	Brownfield Sites	½ mile	2	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	Voluntary Cleanup Program	½ mile	1	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>

Type	Regulatory Agency Database	Approximate Minimum Search Distance (AMSD)	Number of Sites within AMSD	Subject Property is Listed
	State Cleanup Program	½ mile	4	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Other	Unmappable Database Listings (a.k.a. Orphan Sites)	database-dependent	2	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	Manufactured Gas Plant (MGP)	1 mile	2	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	US Brownfields	¼ mile	6	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>

The subject property is not included on the reviewed record sources and databases.

The adjoining properties are not included on the reviewed record sources and databases.

Based on distance, topography, and/or regulatory closure status, none of the listed properties are likely to have current or former releases of hazardous substances and/or petroleum products with the potential to migrate to the subject property.

### 6.1 Regulatory Agency File and Records Review

Review of regulatory files and/or records was conducted on the IDEM Virtual File Cabinet (VFC). No records were found for the subject property or adjoining properties.

---

## 7.0 INTERVIEWS

This section provides a summary of interviews conducted with potentially knowledgeable persons and organizations to obtain information regarding the subject property and surrounding properties.

### 7.1 Interview with Subject Property Owner

Mr. Jeffrey Smiley, the subject property owner, completed a questionnaire (Appendix E) on June 18, 2024 and was interviewed during the inspection on June 19, 2024. Mr. Smiley stated he has owned the property for approximately 25 years. He stated the property has consisted of agricultural land and a residence.

Mr. Smiley was not aware of any chemicals, hazardous substances, or petroleum products that are present or were once present at the property. He was not aware of any spills or other releases that have taken place at the property, and he was not aware of any environmental cleanups that have taken place at the property. Mr. Smiley was not aware of any environmental violations, lawsuits, liens, or deed restrictions associated with the subject property.

Mr. Smiley stated the residence is connected to municipal water and sewer service and currently uses a natural gas furnace for heat. He was not aware of any water wells or septic systems being present at the property.

## **7.2 Key Subject Property Manager**

Please refer to Section 7.1.

## **7.3 Interviews with Occupants**

The occupant of the residential dwelling was not interviewed as part of this assessment.

## **7.4 Interviews with Others**

Additional interviews with local municipal departments and other potential knowledgeable persons are discussed in Section 5.5.

---

## **8.0 SUBJECT PROPERTY INSPECTION**

Mr. Wes Gaines, Senior Project Manager with SES, conducted an inspection of the subject property on June 19, 2024 at approximately 10:00 a.m. Mr. Jeffrey Smiley, the subject property owner, provided access to the subject property. Mr. Gaines was unaccompanied during the inspection.

### **8.1 Methodology and Limiting Conditions**

The inspection consisted of observing the periphery of the subject property and then systematically traversing the interior portions to provide overlapping fields of view of the ground surface whenever possible. Readily accessible areas of building interiors were inspected; however, inaccessible areas (such as crawl spaces, pipe chases, false ceilings, attics, elevator pits, confined spaces etc.) were not inspected as a part of this assessment. Adjoining properties were observed from the subject property, roadways, and public access areas.

No limitations were identified during the subject property inspection.

### **8.2 General Subject Property Setting**

The subject property is irregularly shaped and consists of 3.227-acres located at the northeast corner of New York Avenue and Emerson Avenue, approximately ½ mile northwest of the City of New Castle central business district. Surrounding property usage includes vacant land to the north and east, and commercial properties to the south and west. The local topography slopes down gently to the southeast toward Castle Run.

### **8.3 Subject Property Observations**

The subject property is developed with a one-story residential dwelling and detached garage on the southeast portion of the property. The remainder of the property consists of vacant land. A Site Plan showing details of the subject property is presented as Figure 2 in Appendix A. Photographs of the subject property and the surrounding properties are presented in Appendix B.

Exterior Observations

The residential dwelling is located on the south portion of the property. Building construction consists of a masonry block foundation, metal siding, and an asphalt shingle covered roof. A garage is located on the east side of the house. A metal fill pipe and former coal loading door is located on the south side of the house. Staining, distressed vegetation, or other evidence of releases were not observed around the fill pipe. No other environmental concerns were observed around the residential dwelling.

The remainder of the property consists of undeveloped land covered with grass and vegetation. The topography of the subject property is relatively level, slopy gently to the southeast toward Castle Run.

Pits, ponds, wastewater treatment lagoons, stockpiled soils, surface staining, odors, drums, bulk containers, landfills or dumping, oil or gas wells, water wells, septic systems, or evidence of air or wastewater emissions were not observed at the subject property.

Interior Observations

The residential dwelling consists of one-story with a full basement. The main floor consists of finished living space (i.e., kitchen, living room, bathroom, bedrooms). The basement is unfinished and includes storage space, a laundry area, a furnace, and water heater. A storage room in the southeast portion of the basement contains an aboveground heating oil storage tank (additional details below).

Features and Conditions

The following table summarizes features and conditions observed at the subject property during the inspection. Details concerning the features, activities, uses, and conditions observed on the property at the time of the inspection are discussed below the table.

Feature	Observed	
	YES	NO
Hazardous Substances and Petroleum Products	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Aboveground Storage Tanks (ASTs)	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Underground Storage Tanks (USTs)	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Drums, Totes, and/or Intermediate Bulk Containers	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Unidentified Substance Containers	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Potential PCB-Containing Items (Electrical or Hydraulic Equipment)	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Standing Surface Water or Pools of Liquid	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Strong, Pungent, or Noxious Odors	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Drains or Sumps	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Oil-Water Separators	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Pits, Ponds, Lagoons	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Surface Staining/Stained Soil or Pavement/Corrosion/Pitting	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Stressed Vegetation	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Improper Solid Waste Disposal	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Evidence of fill or dumping, construction or demolition debris, other materials	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Wastewater (including storm water) Drain, Ditch, Underground Injection System	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Wells (Including Monitoring, Dry, Irrigation, or Abandoned Etc.)	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Feature	Observed	
	YES	NO
Septic Systems	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Other	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Hazardous Substances or Petroleum Products

A heating oil AST is located in the basement of the residential dwelling. A level gauge on the tank indicates the tank is possibly half full of product, presumably heating oil. No other hazardous substances or petroleum products were observed at the property.

Aboveground Storage Tanks

An approximately 300-gallon heating oil AST is located in the southeast portion of the basement. A fill pipe for the AST is located on the south side of the house. A level gauge on the AST indicates it is possibly half full of product (heating oil). Evidence of releases was not observed around the AST or fill pipe.

Potential Polychlorinated Biphenyl (PCB) Containing Items

PCBs are chemicals formerly used in coolants and lubricating oils. The manufacture of PCBs stopped in the United States in 1977 because of evidence that PCBs accumulated in the environment and may cause harmful health effects. PCBs are sometimes found in old electrical transformers, electrical panels, hydraulic equipment, and similar equipment.

One pole-mounted electrical transformer is located along the south property boundary. The transformer was not labeled regarding PCB content. The transformer appeared in good condition, and no evidence of leakage or releases from the transformer was observed.

Drains or Sumps

One floor drain and one sump and pump are located in the basement of the residential dwelling. Evidence of improper discharges or waste disposal to the floor drain or sump was not observed.

**8.4 Utilities**

8.4.1 Municipal Water/Water Well(s)

The subject property is currently connected to the New Castle municipal water system. No records of private water wells have been identified through review of reasonably ascertainable information.

8.4.2 Municipal Sanitary Sewer/Septic System(s)

The subject property is currently connected to the New Castle municipal sanitary sewer system. Records obtained from the Henry County Health Department indicate that a septic system was present north of the residential dwelling in 1978. Information concerning the closure of the septic system was not found.

### 8.4.3 Heating and Cooling Source

The residential dwelling is heated using a natural gas-fired furnace and cooled using electric air conditioning units. Natural gas is supplied to the property by Center Point Energy and electricity is supplied by Duke Energy. According to representatives with Center Point Energy, the existing natural gas meter was installed in 1989. Heating oil and coal were likely used prior to natural gas connection.

---

## **9.0 NON-ASTM SCOPE CONSIDERATIONS**

### **9.1 Asbestos Containing Building Materials**

Asbestos is present in a wide variety of typical building material products. Frequently encountered types of asbestos-containing building materials (ACBMs) used in building construction include floor tile, sheet flooring, mastic, ceiling tile, spray-applied acoustical/decorative ceiling materials, plaster, wallboard and wallboard joint compound, insulations, roofing and flashing and many other materials in common use before 1978. Materials that contain over one percent asbestos fibers are considered ACBM and must be handled according to OSHA and USEPA regulations if disturbed.

At the time of the subject property inspection, suspect ACBMs consisted of vinyl flooring, flooring mastics, gypsum board or plaster, and roofing materials. All observed suspect ACBMs appeared in good condition. An asbestos survey is required prior to any demolition or renovation activities.

It should be noted that the screening survey was limited in scope and should not be considered a thorough and comprehensive survey. No attempts were made to locate or observe inaccessible areas (such as crawl spaces, pipe chases, false ceilings, attics, confined spaces etc.) or to uncover hidden materials in buildings or waste piles.

### **9.2 Lead-Based Paint**

Lead was formerly added to paints as pigment and to speed drying, increase durability, retain appearance, and resist moisture. Because of its toxicity, paint containing more than 0.06 percent lead was banned for non-residential use in 1978. Lead is especially dangerous for children under the age of six. The most common exposure pathway is through ingestion of lead dust through normal hand-to-mouth contact. The U. S. Government defines “lead-based paint” as any “paint that contains lead equal to or exceeding one milligram per square centimeter or 0.5 percent by weight.

Painted interiors and exteriors appeared in overall good condition with no observable cracked, peeling or otherwise damaged painted surfaces. Given that the residential dwelling was constructed in 1948, lead-based paint may be present.

### **9.3 Visible Mold and Moisture Damage**

Molds are fungi that can be found both indoors and outdoors. Molds grow well in warm, damp, and humid conditions, and spread and reproduce by making spores. Outdoors they can be found in shady, damp areas or places where leaves or other vegetation are decomposing. Indoors they can be found where humidity levels are high, such as basements or showers. Exposure to molds can cause symptoms

such as nasal stuffiness, eye irritation, wheezing, skin irritation, or more severe reactions. To date, EPA regulations regarding acceptable concentrations and types of molds have not been established.

- An inspection of the exterior surfaces of the subject property building did not reveal any observable indications of suspect mold growth (e.g., bubbling paint, discoloration, odors, etc.).
- An inspection of the interior areas of the subject property building did not generally reveal any indications of suspect mold growth (e.g., bubbling paint, discoloration, odors, etc.) on the walls, ceilings, or flooring.

#### **9.4 Potential Wetlands**

The Clean Water Act defines wetlands as *areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.* A wetland determination is based on the presence of three indicator conditions consisting of wetland hydrology, hydric soils, and hydrophytic vegetation (all three must be present in order to determine an area is a wetland). The presence of wetlands on a property may impede or eliminate the potential for planned site development, including proposed construction or expansion.

SES did not observe any obvious wetland indicator criteria. A review of the U.S. Fish and Wildlife Service National Wetlands Inventory Map (Appendix H) does not depict wetland areas within the subject property boundaries. A formal wetland delineation/determination of areas of proposed new construction, rehabilitation that expands the footprint of the building, or ground disturbance would be necessary to establish the presence of a regulated wetland.

#### **9.5 Radon**

Radon is an invisible, odorless gas formed during radioactive decay of uranium and thorium. Radon is a cancer-causing, radioactive gas that is found throughout the United States. It comes from the natural decay of uranium found in nearly all soils. It typically moves up through the ground and into houses through cracks and holes in the foundation. The EPA has established an action level of 4 picocuries per liter (pCi/L) for radon gas, at which level the EPA recommends taking steps to reduce the amount of radon in the structure.

Radon testing was not conducted as a part of this assessment; however, according to the EPA Map of Radon Zones in Indiana (Appendix H), the subject property is located in Zone 1, which is an area with a predicted indoor screening level of greater than 4 pCi/L (highest potential).

#### **9.6 Lead in Drinking Water**

No sampling or analysis of drinking water for lead was conducted as part of this assessment. The most common sources of lead in drinking water are lead pipes, faucets, and fixtures. The use of lead pipes was banned in 1986; however, regulations allowed piping and fixtures already in place to remain. Based on the 1948 construction date of the residential dwelling, lead piping and fixtures may be present.

## **9.7 Regulatory Compliance**

An environmental compliance audit is beyond the scope of this Phase I ESA and should be conducted to determine if facility operations are in compliance with applicable environmental laws. However, a limited review of operations at the subject property did not identify any obvious non-compliance issues.

## **9.8 Per- and Polyfluoroalkyl Substances (PFAS)**

Per- and polyfluoroalkyl substances (PFAS) are a class of synthetic organic chemicals that contain fluorine. There are more than 3,000 PFAS. Because many PFAS have useful properties, some of them have been used since the 1940s in products like textiles, paper, cookware, firefighting foams, and electronics. PFAS are commonly present at fire training and response sites, certain industrial facilities, landfills, wastewater treatment plants, and in biosolids. PFAS persist in the environment, can bioaccumulate, and are often present in people and in wildlife.

Though U.S. production of some of these chemicals has declined, many are still produced in other countries. Perfluorooctane sulfonic acid (PFOS) and perfluorooctanoic acid (PFOA) have been among the most used PFAS. The U.S. Environmental Protection Agency (U.S. EPA) has added PFAS chemicals to the Toxics Release Inventory and is also developing rules to regulate exposures of certain PFAS chemicals.

Beginning in February 2021, IDEM has begun facilitating PFAS monitoring at all Community Public Water Systems (CWS) throughout the state of Indiana (a CWS regularly serves drinking water to at least 25 year-around residents or has at least 15 service connections for residents). The purpose of the sampling program is to evaluate the statewide occurrence of PFAS compounds in CWS across the state and determine the efficacy of conventional drinking water treatment for PFAS. During the U.S. EPA's Unregulated Contaminant Monitoring Rule (UCMR) sampling completed in 2014 and 2015, no verified PFAS detections were found in Indiana in systems serving a population greater than 10,000.

SES reviewed the current preliminary results of IDEM's PFAS monitoring program. Sampling conducted in June 2023 found no evidence of PFAS in the New Castle Utilities water system.

---

## **10.0 VAPOR ENCROACHMENT**

Pursuant to ASTM E2600-22 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions, SES conducted a Tier 1 evaluation to assess the presence or likely presence of contaminant vapors in soil at the subject property that might result from contaminated soil and/or groundwater either on or near the subject property. SES assessed the following information:

- Existing use of the subject property
- Type of structures existing at the subject property
- Surrounding area
- General physical setting including soil type, and geological, hydrological, hydrogeological, and topographical information
- Federal, state, local, and tribal government records for the subject property and adjoining properties
- Historical aerial photographs, Sanborn maps, city directories
- Regulatory database
- Significant natural or man-made conduits including utility corridors, sewers, storm drains, and Karst terrain

- User-specialized knowledge, experience, and commonly known or reasonably ascertainable information related to the subject property and adjoining properties
- Site inspection
- Interviews with the subject property owner and government agencies.

Based on the above review, SES did not identify any *vapor encroachment conditions* (VECs) associated with the subject property.

---

## 11.0 OPINIONS, CONCLUSIONS, AND RECOMMENDATIONS

### 11.1 Data Gaps

A “data gap” is defined in Section 3 of ASTM Standard Practice E 1527-21, as, “a lack of or inability to obtain information required by this practice (ASTM E1527-21) despite good faith efforts by the environmental professional to gather such information.” A “significant data gap” is defined as, “a data gap that affects the ability of the environmental professional to identify a *recognized environmental condition*.” The following data gap was identified during this Phase I ESA:

- A review of land title records for environmental liens and activity or use limitations was not conducted during this assessment pursuant to ASTM Standard Practice E1527-21. This review is necessary in order to determine if environmental liens and/or activity and use limitations have been recorded at the subject property; however, based on no listings within the EDR Database Report for any Institutional or Engineering Controls and no records of environmental cleanups or investigations at the subject property, this data gap is not considered significant.
- Subject property history was not determined back to 1940 pursuant to ASTM Standard Practice E1527-21. An aerial photograph from 1947, the earliest attainable historical record, shows the property was agricultural land. Potential environmental concerns are not associated with the first known use of the property as agricultural land. As such, this data gap is not considered significant.

### 11.2 Business Environmental Risk Considerations

SES identified the following *business environmental risks* (BERs) associated with the subject property during the completion of this Phase I ESA:

- Radon testing was not conducted as a part of this assessment; however, according to the EPA Map of Radon Zones in Indiana, the subject property is located in Zone 1, which is an area with a predicted indoor screening level of greater than 4 pCi/L (highest potential).
- Based on the 1948 construction date of the residential dwelling, asbestos-containing building materials, lead-based paint, and/or lead-containing pipes or plumbing fixtures may be present. Further analysis would be required to determine if asbestos, lead-based paint, or lead in drinking water are present at the subject property.
- An approximately 300-gallon heating oil AST is located in the southeast portion of the basement. A fill pipe for the AST is located on the south side of the house. A level gauge on the AST indicates it is possibly half full of product (heating oil). Evidence of releases was not observed around the AST or fill pipe. The AST and any possible product should be properly removed and disposed if the building is to be demolished.

- Records obtained from the Henry County Health Department indicate that a septic system was present north of the residential dwelling in 1978. Information concerning the closure of the septic system was not found.

### **11.3 Vapor Encroachment Conditions**

SES did not identify any *vapor encroachment conditions* (VECs) associated with the subject property during the completion of this Phase I ESA.

### **11.4 Historical Recognized Environmental Conditions**

SES did not identify any *historical recognized environmental conditions* (HRECs) associated with the subject property during the completion of this Phase I ESA.

### **11.5 Controlled Recognized Environmental Conditions**

SES did not identify any *controlled recognized environmental conditions* (CRECs) associated with the subject property during the completion of this Phase I ESA.

### **11.6 Recognized Environmental Conditions**

SES did not identify any *recognized environmental conditions* (RECs) associated with the subject property during the completion of this Phase I ESA.

### **11.7 Opinions and Conclusions**

SES has conducted a Phase I ESA in conformance with the scope and limitations of United States EPA Standards and Practices for All Appropriate Inquiries {(AAI), 40 CFR Part 312} and guidelines established by the ASTM Standard Practice E 1527-21 of 23.77 acres located at the northeast corner of Washington Street and North 20<sup>th</sup> Street in New Castle, Henry County, Indiana. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report. No RECs, CRECs, or significant data gaps were identified associated with the subject property during the completion of this Phase I ESA.

### **11.8 Recommendations**

Based on the findings during the completion of this Phase I ESA, no further environmental investigation is warranted at this time.

---

## **12.0 ENVIRONMENTAL PROFESSIONAL STATEMENT**

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

---

Alana Christlieb, CHMM  
Senior Project Manager

---

Wes Gaines  
Senior Project Manager

Qualification summaries for the above-named Environmental Professionals are provided in Appendix F.

---

## 13.0 WARRANTY

SES Environmental warrants that the findings and conclusions contained herein were prepared in general accordance with the methods in ASTM Standard E 1527-21. These methods are described by the standard as representing good commercial and customary practice for conducting an Environmental Site Assessment of a parcel of property to identify recognized environmental conditions. The findings and conclusions contained herein are predicated on the limitations inherent in these methods, which are referred to in the protocol and some of which are more specifically stated below. SES Environmental is not responsible for the independent conclusions, opinions, or recommendations made by others based on the records review, site observations, field exploration, and laboratory test data presented in this report.

There is a possibility that even with proper application of the ASTM methods, conditions may exist on the property that could not be identified within the scope of the assessment or that were not reasonably identifiable from the reasonably available information. SES Environmental believes that the information obtained from the records review and interviews concerning the property are reliable. However, SES Environmental cannot, and does not, warrant or guarantee that the information provided by these sources is accurate or complete. The methods of this assessment are not intended to produce all-inclusive or comprehensive results but, rather, to provide information regarding apparent suspicions of existing and potential adverse environmental conditions related to the subject property.

It should be noted that all environmental evaluations are inherently limited in the sense that conclusions are drawn and recommendations developed from information obtained from limited research and site evaluation. For these types of evaluations, it is often necessary to use information prepared by others. Additionally, the passage of time may result in a change in the environmental characteristics at this site and surrounding properties. This report does not warrant against future operations or conditions, nor does it warrant operations or conditions present of a type or at a location not investigated. This report is not a regulatory compliance audit and is not intended to satisfy the requirements of any federal, state or local real estate laws.

This report is intended for the sole use of **Indiana Brownfields Program**, the **City of New Castle**, and **RealAmerica Development, LLC**. No other company, entity, or person shall have any rights with regard to SES Environmental's contract with the above client, including but not limited to indemnification by SES Environmental, or any rights of reliance on the findings, conclusions, opinions and recommendations of this or any subsequent reports regarding the referenced site. This report may not be used or relied upon by any other party without the written consent of SES Environmental. The scope of services performed in execution of this evaluation may not be appropriate to satisfy the needs of other users, and use or re-use of this document or the findings, conclusions, or recommendations expressed herein is at the sole risk of user.

SES does not warrant the correctness, completeness, merchantability, or fitness of any information related to records review provided in this report. Such information is not the product of an independent review conducted by SES, but is only publicly available environmental information maintained by federal, state and local government agencies.

No other warranties are implied or expressed.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Soil Exploration Services were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

### RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/22/2024 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

### ***Lists of Federal RCRA generators***

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 4 RCRA-VSQG sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 5 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 8 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

Due to poor or inadequate address information, the following sites were not mapped. Count: 2 records.

<u>Site Name</u>	<u>Database(s)</u>
FORMER CONVENIENT CLEANERS	VCP
INDIANA GAS - NEW CASTLE MGP	VCP

# DETAIL MAP - 7667342.2S

-  Target Property
-  Sites at elevations higher than or equal to the target property
-  Sites at elevations lower than the target property
-  Manufactured Gas Plants
-  Sensitive Receptors
-  National Priority List Sites
-  Dept. Defense Sites

-  Indian Reservations BIA
-  Power transmission lines
-  Special Flood Hazard Area (1%)
-  0.2% Annual Chance Flood Hazard
-  National Wetland Inventory
-  State Wetlands

**Hazardous Waste Summary:**

Waste Code: D000  
Waste Description: Not Defined

Waste Code: D001  
Waste Description: Ignitable Waste

Waste Code: F003  
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005  
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

**Environmental Interest/Information System:**

Indiana's Tools For Environmental Management and Protection Organizations (IN-TEMPO) is Indiana's integrated environmental management system.  
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.  
The Indiana Department of Environmental Management (IDEM) implemented the Indiana Facility Registry System (I-FRS), which provides an interface and processes to link facility data monitored by multiple state and EPA program systems. In addition, I-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the network node.

**Environmental Interest/Information System:**

THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.

[Click Here for FRS Facility Detail Report:](#)

**Environmental Interest/Information System:**

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Indiana's Tools For Environmental Management and Protection Organizations (IN-TEMPO) is Indiana's integrated environmental management system.

The Indiana Department of Environmental Management (IDEM) implemented the Indiana Facility Registry System (I-FRS), which provides an interface and processes to link facility data monitored by multiple state and EPA program systems. In addition, I-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the network node.

[Click Here for FRS Facility Detail Report:](#)

**Environmental Interest/Information System:**

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Indiana's Tools For Environmental Management and Protection Organizations (IN-TEMPO) is Indiana's integrated environmental management system.

The Indiana Department of Environmental Management (IDEM) implemented the Indiana Facility Registry System (I-FRS), which provides an interface and processes to link facility data monitored by multiple state and EPA program systems. In addition, I-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the network node.

**Hazardous Waste Summary:**

Waste Code: D000

Waste Description: Not Defined

Waste Code: D001

Waste Description: Ignitable Waste

Waste Code: D002

Waste Description: Corrosive Waste

Waste Code: D003

Waste Description: Reactive Waste

Waste Code: D004

Waste Description: Arsenic

Waste Code: D007

Waste Description: Chromium

Waste Code: D008

Waste Description: Lead

Waste Code: D009

Waste Description: Mercury

Waste Code: D035

Waste Description: Methyl Ethyl Ketone

Waste Code: F001

Waste Description: The Following Spent Halogenated Solvents Used In Degreasing:  
Tetrachloroethylene, Trichloroethylene, Methylene Chloride,  
1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated  
Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing

Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002  
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003  
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005  
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: K061  
Waste Description: Emission Control Dust/Sludge From The Primary Production Of Steel In Electric Furnaces.

Waste Code: K062  
Waste Description: Spent Pickle Liquor From Steel Finishing Operations Of Plants That Produce Iron Or Steel.

Waste Code: K063  
Waste Description: Not Defined

Waste Code: U134  
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 02/29/2024	Source: EPA
Date Data Arrived at EDR: 03/01/2024	Telephone: N/A
Date Made Active in Reports: 03/27/2024	Last EDR Contact: 05/01/2024
Number of Days to Update: 26	Next Scheduled EDR Contact: 07/08/2024
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 02/29/2024	Source: EPA
Date Data Arrived at EDR: 03/01/2024	Telephone: N/A
Date Made Active in Reports: 03/27/2024	Last EDR Contact: 05/01/2024
Number of Days to Update: 26	Next Scheduled EDR Contact: 07/08/2024
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991  
Date Data Arrived at EDR: 02/02/1994

Next Scheduled EDR Contact: 11/28/2011  
Data Release Frequency: No Update Planned

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/29/2024  
Date Data Arrived at EDR: 03/01/2024

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2023  
Date Data Arrived at EDR: 12/20/2023  
Date Made Active in Reports: 01/24/2024  
Number of Days to Update: 35

Next Scheduled EDR Contact: 07/08/2024  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/22/2024  
Date Data Arrived at EDR: 05/01/2024  
Date Made Active in Reports: 05/24/2024

Next Scheduled EDR Contact: 07/22/2024  
Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/04/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/06/2023	Telephone: 312-886-6186

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/04/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/06/2023	Telephone: 312-886-6186

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/14/2024	Source: Department of the Navy
Date Data Arrived at EDR: 02/16/2024	Telephone: 843-820-7326
Date Made Active in Reports: 04/04/2024	Last EDR Contact: 05/17/2024
Number of Days to Update: 48	Next Scheduled EDR Contact: 08/19/2024
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/13/2024	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/21/2024	Telephone: 703-603-0695
Date Made Active in Reports: 04/04/2024	Last EDR Contact: 05/21/2024
Number of Days to Update: 43	Next Scheduled EDR Contact: 09/02/2024
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/13/2024	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/21/2024	Telephone: 703-603-0695
Date Made Active in Reports: 04/04/2024	Last EDR Contact: 05/21/2024
Number of Days to Update: 43	Next Scheduled EDR Contact: 09/02/2024
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/12/2023

Source: National Response Center, United States Coast Guard

Date Data Arrived at EDR: 12/13/2023

Telephone: 202-267-2180

## ***Lists of state- and tribal hazardous waste facilities***

SHWS: List of Hazardous Waste Response Sites Scored Using the Indiana Scoring Model

List of hazardous waste response sites scored utilizing the Indiana Scoring Model. The Indiana Scoring Model is a method of prioritizing, for state response actions, those hazardous substances response sites which are not on the National Priorities List. The ISM serves as the Commissioners management tool to address those sites which pose the most significant threat to human health and the environment in addition to assuring the departments resources are allocated accordingly.

Date of Government Version: 03/01/2007

Source: Department of Environmental Management

Date Data Arrived at EDR: 08/27/2007

## ADDITIONAL ENVIRONMENTAL RECORDS

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

## **Other Ascertainable Records**

### **RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 12/04/2023	Source: Environmental Protection Agency

## EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 04/29/2024
Number of Days to Update: 88	Next Scheduled EDR Contact: 08/12/2024
	Data Release Frequency: No Update Planned

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/08/2018	Telephone: 703-308-4044

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 02/29/2024	Source: EPA
Date Data Arrived at EDR: 03/01/2024	Telephone: 703-416-0223
Date Made Active in Reports: 03/27/2024	Last EDR Contact: 05/01/2024
Number of Days to Update: 26	Next Scheduled EDR Contact: 06/10/2024
	Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 02/01/2024	Source: Environmental Protection Agency

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008

## COAL ASH EPA: Coal Combustion Residues Surface Impoundments List

A listing of coal combustion residues surface impoundments with high hazard potential ratings.

Date of Government Version: 01/12/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/05/2019	Telephone: N/A
Date Made Active in Reports: 11/11/2019	Last EDR Contact: 05/28/2024
Number of Days to Update: 251	Next Scheduled EDR Contact: 09/09/2024
	Data Release Frequency: Varies

## PCB TRANSFORMER: PCB Transformer Registration Database

The database of PCB transformer registrations that includes all PCB registration submittals.

Date of Government Version: 09/13/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/06/2019	Telephone: 202-566-0517
Date Made Active in Reports: 02/10/2020	Last EDR Contact: 05/02/2024
Number of Days to Update: 96	Next Scheduled EDR Contact: 08/12/2024
	Data Release Frequency: Varies

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2019	Telephone: 202-343-9775
Date Made Active in Reports: 09/23/2019	Last EDR Contact: 03/25/2024
Number of Days to Update: 84	Next Scheduled EDR Contact: 07/08/2024
	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/12/2016	Source: EPA
Date Data Arrived at EDR: 10/26/2016	Telephone: 202-564-2496

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

## PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

## PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

## PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

Number of Days to Update: 79	Next Scheduled EDR Contact: 09/02/2024
	Data Release Frequency: Varies

## UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## **OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

#### **CT MANIFEST: Hazardous Waste Manifest Data**

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Version Date:	2022

East Map:	50023702 NEW CASTLE EAST, IN
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
18065C0142D	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
18065C0134D	FEMA FIRM Flood data
18065C0153D	FEMA FIRM Flood data
18065C0165D	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
NEW CASTLE WEST	YES - refer to the Overview Map and Detail Map

## **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

Era: Paleozoic  
System: Silurian  
Series: Middle Silurian (Niagoaran)  
Code: S2 *(decoded above as Era, System & Series)*

#### GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: WESTLAND

Soil Surface Texture: silty clay loam

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Not reported

Hydric Status: Soil meets the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	10 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 2.00 Min: 0.60	Max: 7.30 Min: 6.10
2	10 inches	30 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 2.00 Min: 0.60	Max: 7.30 Min: 6.10
3	30 inches	45 inches	gravelly - sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 7.80 Min: 6.60
4	45 inches	60 inches	gravelly - coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 20.00 Min: 20.00	Max: 8.40 Min: 7.40

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinator soil types may appear within the general area of target property.

Soil Surface Textures: silt loam  
loam  
gravelly - loam  
fine sandy loam  
loamy fine sand  
muck

Surficial Soil Types: silt loam  
loam  
gravelly - loam  
fine sandy loam  
loamy fine sand  
muck

Shallow Soil Types: silty clay loam  
sandy clay loam

Deeper Soil Types: stratified  
sand and gravel  
fine sand

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

marl  
 gravelly - sand  
 unweathered bedrock

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: US Fish & Wildlife Service

Telephone: 703-358-2171

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Public Water Supply Wells

Source: Department of Environmental Management

Telephone: 317-308-3323

Community and non-community drinking water wells.

#### Observation Wells Database

Source: Indiana Geological Survey

Telephone: 812-855-7636

Water Wells for Monitoring Ground Water in Indiana

#### Public Water Supply Wells

Source: Department of Environmental Management

Telephone: 317-308-3323

Community and non-community drinking water wells.

#### Water Wells Database

Source: Indiana Geological Survey

Telephone: 812-855-76

Shows data points that represent water wells contained in the Lithologic database, which is derived from the water well database of the Indiana Department of Natural Resources.

## OTHER STATE DATABASE INFORMATION

### RADON

#### State Database: IN Radon

Source: Department of Health

Telephone: 317-233-7148

Radon Test Results

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

## **APPENDIX E – PROVIDED DOCUMENTATION**

## User Questionnaire

**PHASE I ESA USER'S QUESTIONNAIRE**

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that "*all appropriate inquiries*" is not complete.

Please answer the following questions as completely as possible. Attach additional pages as needed.

**1. Property Information.**

Property Name: \_\_\_\_\_

Property Address: \_\_\_\_\_

City: \_\_\_\_\_ State: \_\_\_\_\_ Zip: \_\_\_\_\_

Property Owner Name: \_\_\_\_\_

**2. Environmental Liens.** Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state, or local law?

\_\_\_\_\_ Yes      \_\_\_\_\_ No      \_\_\_\_\_ Unknown

If yes, describe or attach details of the lien \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**3. Activity and Land Use Limitations.** Did a search of recorded land title records (or judicial records where appropriate) identify any activity and use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state, or local law?

\_\_\_\_\_ Yes      \_\_\_\_\_ No      \_\_\_\_\_ Unknown

If yes, describe or attach details of the limitations \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**4. Specialized Knowledge or Experience.** As the User of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, so that you would have specialized knowledge about chemicals and processes used by this type of business?

\_\_\_\_\_ Yes      \_\_\_\_\_ No

If yes, describe or attach details of your specialized knowledge or experience \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

5. **Relationship of Purchase Price to Fair Market Value of Property.** Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, do you have any reason to believe that the reduced purchase price may be related to contamination known or believed to be present at the property?

\_\_\_\_\_ Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property?

\_\_\_\_\_ No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property?

\_\_\_\_\_ Not applicable. User is not involved in a purchase of the property.

6. **Commonly Known or Reasonably Ascertainable Information.** Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products? For example:

Do you know the past uses of the property?

\_\_\_\_\_ Yes (describe) \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_ No

Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the property?

\_\_\_\_\_ Yes (describe) \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_ No

Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?

\_\_\_\_\_ Yes (describe) \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_ No

Do you know of any environmental cleanups that have taken place at the property?

\_\_\_\_\_ Yes (describe) \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_ No

7. **The Degree of Obviousness of Contamination.** E1527-21 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indicators that point to the presence or likely presence of contamination at the property?

\_\_\_\_\_ Yes (describe) \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_ No

8. **Availability of Previous Environmental Reports.** Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?

\_\_\_\_\_ Yes (please identify and provide copies, if available) \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_ No

## Owner Quesitonnaire

## Owner/Key Site Manager Questionnaire

Subject Property Address: 520 New York Ave

*This questionnaire is designed to be filled out by either the owner or the "key site manager" of the subject property. This is a generic questionnaire that is designed to assist the consultant in performing a comprehensive review of the reasonably ascertainable information for the subject property. Please answer these questions to the best of your knowledge. If you answer "yes" to a question, please provide further explanation in the space provided. If a question does not apply to the subject property, please respond with either a "no" or an "unknown". Please return the completed questionnaire along with any supporting documentation to the project manager within one week of receipt. Questionnaires may be returned via US mail, facsimile, or electronic e-mail.*

1.	Do any of the following documents exist for the subject property?		
	Environmental Site Assessment Reports	Yes	No <input checked="" type="checkbox"/> Unknown
	Environmental Site Investigation Reports	Yes	No <input checked="" type="checkbox"/> Unknown
	Environmental Compliance Audit Reports	Yes	No <input checked="" type="checkbox"/> Unknown
	Environmental Permits (i.e., air or wastewater discharge permits, etc.)	Yes	No <input checked="" type="checkbox"/> Unknown
	Registration of Above and/or Underground Storage Tanks	Yes	No <input checked="" type="checkbox"/> Unknown
	Registrations for underground injection systems	Yes	No <input checked="" type="checkbox"/> Unknown
	Material Safety Data Sheets	Yes	No <input checked="" type="checkbox"/> Unknown
	Community right-to-know plans	Yes	No <input checked="" type="checkbox"/> Unknown
	Safety Plans, Preparedness and Prevention Plans, and /or Spill Prevention, Countermeasure, and Control Plans	Yes	No <input checked="" type="checkbox"/> Unknown
	Hydro/Geologic Studies of the subject property or adjacent properties	Yes	No <input checked="" type="checkbox"/> Unknown
	Reports regarding self-directed or other cleanup activities	Yes	No <input checked="" type="checkbox"/> Unknown
	Notices of violations of environmental laws or environmental liens	Yes	No <input checked="" type="checkbox"/> Unknown
	Hazardous Waste Generator Notices, Violations, or Reports	Yes	No <input checked="" type="checkbox"/> Unknown
	Geotechnical Studies	Yes	No <input checked="" type="checkbox"/> Unknown
	Risk Assessments	Yes	No <input checked="" type="checkbox"/> Unknown
	Recorded activity and use limitations (i.e., Environmental Restrictive Covenants)	Yes	No <input checked="" type="checkbox"/> Unknown
<i>Please provide copies of available documents</i>			
2.	Please state your relationship to the property and indicate how long you have owned or been familiar with the subject property.		
	25 yrs.		

3. Please list any known current or former occupants of the subject property.			
	<b>Name of Occupant</b>	<b>Type of Operation</b>	<b>Years</b>
	Fay Flowers	Renters	15
4.	Is the subject property currently or has the subject property previously been used for an industrial purpose?	Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown
	Explain:		
5.	Is any adjoining property currently or has the adjoining property previously been used for an industrial purpose?	Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown
	Explain:		
6.	Is the subject property currently or has the subject property previously been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility? If so, please identify the type of use and approximate time period(s) below.	Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown
	Farm Ground		
7.	Is any adjoining property currently or has any adjoining property previously been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility? If applicable, please identify the type of use below.	Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown
8.	Are there currently, or have there previously been any damaged or discarded automotive or industrial batteries, or pesticides, paints, or other chemicals in individual containers of greater than 5 gallons (19L) in volume or 50 gallons (190L) in aggregate, stored on or used at the subject property or at the on-site facility?	Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown
9.	Are there currently, or have there previously been any drums (55 gallons), totes, or bulk containers of hazardous substances or petroleum products stored on the subject property? If yes, identify below. (Add additional pages if necessary)	Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown
	<b>Substance</b>	<b>Container Type/Quantity</b>	<b>Locations Stored</b>

10.	Has fill dirt been brought onto the subject property that originated from a contaminated site or that is of an unknown origin? If yes, where was it placed?	Yes	<input checked="" type="radio"/> No	Unknown
11.	Are there currently, or have there previously been any pits, ponds, or lagoons located on the subject property in connection with waste treatment or waste disposal? If yes, when and where is/was the soil located?	Yes	<input checked="" type="radio"/> No	Unknown
12.	Is there currently, or has there previously been any stained soil on the subject property? If yes, when and where is/was the soil located?	Yes	<input checked="" type="radio"/> No	Unknown
13.	Are there currently, or have there previously been any registered or unregistered storage tanks (above or underground) located on the subject property? If yes, specify the location, type, size, and contents of each.	Yes	<input checked="" type="radio"/> No	Unknown
14.	Are there currently, or have there previously been any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the subject property or adjacent to any structure located at the subject property? If yes, where are they located?	Yes	<input checked="" type="radio"/> No	Unknown
15.	Are there currently, or have there previously been any flooring, drains, or walls located within the subject property that are/were stained by substances other than water or are/were emitting foul odors? If yes, please identify the location.	Yes	<input checked="" type="radio"/> No	Unknown
16.	If the subject property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government environmental/health agency?	Yes	<input checked="" type="radio"/> No	Unknown
17.	Does the subject property discharge wastewater onto or adjacent to the property, other than storm water, into a storm water sewer system? If yes, do you have a permit?	Yes	<input checked="" type="radio"/> No	Unknown

19.	Do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried and/or burned on the subject property? If yes, please describe the type of waste and the location where dumping occurred.	Yes	<del>No</del>	Unknown
20.	Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs on the subject property? If yes, where are they located?	Yes	<del>No</del>	Unknown
21.	Has the owner or occupant of the subject property been informed of the past or current existence of hazardous substances or petroleum products or environmental violations with respect to the subject property or any facility located on the subject property? If yes, specify the quantity and location of each.	Yes	<del>No</del>	Unknown
22.	Does the owner or occupant of the subject property know of 1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, at, or from the subject property; 2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, at, or from the subject property; and 3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? If yes, please explain.	Yes	<del>No</del>	Unknown
23.	Does the owner or occupant of the subject property know of any environmental site assessments of the subject property or facility that indicated the presence of hazardous substances or petroleum products on the subject property, contamination of the subject property, or recommended further assessment of the subject property? If yes, please provide a copy.	Yes	<del>No</del>	Unknown
24.	Does the owner or occupant of the subject property have any knowledge of environmental liens or activity and use limitations (AULs) associated with the subject property? If yes, please explain.	Yes	<del>No</del>	Unknown

**Preparer represents that to the best of the preparer's knowledge, the above statements and facts are true and correct, and to the best of the preparer's actual knowledge, no material facts have been suppressed or misstated.**

**APPENDIX F – QUALIFICATIONS of ENVIRONMENTAL PROFESSIONAL(S)**

# Wes Gaines, EP

Senior Project Manager

## GENERAL SUMMARY

Wes Gaines has 20 years of environmental consulting experience.

Mr. Gaines has conducted over 1,000 Phase I Environmental Site Assessments (ESAs), Environmental Transaction Screens, and Records Search with Risk Assessments (RSRAs) throughout the US. Properties inspected have included abandoned airport properties, gasoline stations, equipment rental facilities, business office complexes, various commercial and industrial facilities, multi-tenant residential complexes, and confirmed Brownfield sites.

Mr. Gaines has in-depth project management experience working with complex multi-client redevelopment sites that involve financial institutions, redevelopment firms, architects, municipality contacts and investors.

Other experience includes:

- Presenter for financial and realtor organizations reference due diligence topics
- On-site construction supervisor for excavation of contaminated soil
- Conduct horizontal and vertical surveys for project site maps
- Conduct semi-annual groundwater sampling for operating and closed landfills
- Conduct groundwater sampling for multiple project sites
- Site and groundwater flow map preparation
- Closure sampling for soil treatment cells
- Monitoring and recovery well installation
- Conduct routine remediation system air and water effluent sampling
- Field sampling and documentation for Environmental Protection Agency (EPA), Voluntary Remediation Program (VRP) and Brownfield investigations
- Design site maps in AutoCAD LT for multiple projects including basic site layout, groundwater flow, survey/elevation, wetland delineation/mitigation, phase II investigations and industrial process flow

### Education:

BA, Taylor University

### Registration/Certifications:

AAI Qualified Environmental Professional (EP)

OSHA 40 - Hour HAZWOPER Certification

### Years of Experience:

20 years

### Roles:

Staff Consultant & Project Manager

### Special Training:

Licensed Asbestos Inspector 2004-2007

EDR Commonground University, ASTM E2600-10 Vapor Encroachment Screening, 2012

## Relevant Experience

Mr. Gaines has coordinated multiple Environmental Due Diligence projects encompassing single to multi-property portfolios for several Fortune 500 companies, including GE, Kroger, Michelin and multiple banks.

# Alana Christlieb, CHMM

*Senior Project Manager*

## GENERAL SUMMARY

Alana Christlieb, CHMM, has more than 20 years of environmental consulting experience.

Ms. Christlieb specializes in underground storage tank (UST) removal coordination/management and oversight; Phase II subsurface investigations; corrective action evaluation; coordination/management of pilot testing and corrective action implementation; petroleum spill response activities; developing Spill Prevention Control and Countermeasure (SPCC) plans and Facility Response Plans (FRP); and preparing storm water pollution prevention plans (SWP3).

Ms. Christlieb is the Senior Project Manager for a regional petroleum marketer and responsible for regulatory compliance at over 30 sites including current/former bulk facilities and current/former UST facilities, as well as review of regulatory history and compliance for potential purchase sites. She manages and coordinates field work, remediation activities, data evaluation and report preparation. Other duties include budget management; obtaining permits through municipalities, INDOT, NPDES, and third parties; representing the client, as needed, at municipal and regulatory agency meetings; securing state reimbursable funding; and working with attorneys to obtain insurance recovery monies to fund remediation projects.

In her tenure with SES, Ms. Christlieb has participated in all aspects of environmental site assessments, including but not limited to Phase I Environmental Site Assessment (ESA) inspections, historical document and regulatory compliance review, soil and groundwater sample collection, remediation plan development, preparation of bid specifications and preparation of associated reports.

Her other experience includes:

- Coordinating waste profiling and disposal of contaminated media
- UST system compliance and tracking
- Securing Excess Liability Trust Fund (ELTF) monies for UST clients
- Resource Conservation and Recovery Act (RCRA) site waste removal and cleaning oversight and documentation
- Oversight of field staff and contractors for USEPA Remediation Grant and ensured all site activities were performed in accordance with RWP, QAPP, SAP, and HASP

### Education:

BS, Environmental Science  
Tusculum College

### Registration/Certifications:

Certified Hazardous Materials  
Manager No. 16607  
OSHA 40 - Hour HAZWOPER  
Certification

### Years of Experience:

20 Years

### Roles:

Field Technician, Staff Consultant,  
Project Manager, Senior Project  
Manager

### Special Training:

IDEM UST Level A Certified  
Operator

## RELEVANT EXPERIENCE

### **Project Manager**

#### **Investigation and Remediation of Petroleum Contaminated Sites, St. Joseph County, Indiana**

Provided project management services during the investigation and remediation of Leaking Underground Storage Tank (LUST) / ELTF sites. Prepared requests for proposals to obtain bids from professional service contractors. Reviewed and evaluated proposals, conducted onsite meetings, coordinated oversight of remedial investigations, reviewed initial assessments, final assessment reports, closure reports, technical memorandums, bid specifications, corrective action plans, pilot study reports, quarterly monitoring reports, free product recovery status reports and invoicing for each site. Attended meetings with municipalities, IDEM, attorneys and off-site property owners.

### **Project Manager**

#### **Due Diligence Phase II Subsurface Investigations, Various Sites Throughout Indiana**

Provided project management services to facilitate property transfer due diligence. Reviewed Phase I ESA findings to develop scope of work to adequately address identified recognized environmental conditions (RECs). Prepared the proposed cost estimate and review with client. Coordinated field activities with seller, prospective buyer, and bank representatives. Reviewed investigation results in accordance with regulatory agency guidelines. Provided professional opinion with respect to client's best interest.

### **Team Member**

#### **Expedited, Multi-Site, Phase I ESA Services for International Company**

Served as a member of a site inspection team to complete 111 site visits, within five days, in seven states, with a total project period of 45 days. Performed 13 site inspections throughout northwest Washington. Conducted interviews with site personnel and local authorities in regards to environmental issues. Photo documented site and surrounding area characteristics. Logged inspection findings into master spreadsheet for expedited senior review.

### **Project Manager/Site Management**

#### **RCRA Facility, Waste Removal and Facility Cleaning, Northwest Ohio**

Conducted initial waste material inventory. Coordinated with waste removal contractor to facilitate waste profiles and disposal approval, and with facility cleaning contractors to ensure compliance with scope of work and HASP. Provided oversight and documentation of waste removal and facility cleaning activities. Collected characterization samples of waste generated during cleaning. Provided progress updates to Senior Project Managers and client representatives.

### **Project Manager**

#### **Brownfield Site – Remediation of Former Commercial Property in Indiana**

Responsible for interfacing with the owner and regulatory agency regarding project planning, preparation of required EPA documents (ABCA, CRP, HASP, QAPP, RWP), review and approve QA/QC program, coordination/scheduling of contractors and field staff or remediation activities, prepare remediation progress and completion reports, manage budget.

## **APPENDIX G – ACRONYMS & TERMINOLOGY**

## DEFINITIONS

**Recognized Environmental Condition (REC):** (1) The presence of hazardous substances or petroleum products in, on, or at the subject property due to any release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

**Controlled Recognized Environmental Condition (C-REC):** A REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls.

**Historical Recognized Environmental Condition (H-REC):** A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls.

**Vapor Encroachment Condition (VEC):** The presence or likely presence of chemicals of concern vapors in the sub-surface of the target property caused by the release of vapors from contaminated soil or groundwater either on or near the target property.

**Business Environmental Risk (BER):** A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice.

**Environmental Lien:** A charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products upon a property.

**Activity and Use Limitation (AUL):** Legal or physical restrictions or limitations on the use of, or access to, a site or facility.

- 
- The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on **5/30/2024 at 3:39 PM** and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

# Custom Soil Resource Report for Henry County, Indiana

# Preface

---

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (<http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/>) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (<https://offices.sc.egov.usda.gov/locator/app?agency=nrcs>) or your NRCS State Soil Scientist ([http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2\\_053951](http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951)).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

# How Soil Surveys Are Made

---

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

## Custom Soil Resource Report

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

## Custom Soil Resource Report

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

# Soil Map

---

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

### MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service  
 Web Soil Survey URL:  
 Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Henry County, Indiana  
 Survey Area Data: Version 25, Sep 1, 2023

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jun 19, 2022—Jun 21, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

## Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

## Custom Soil Resource Report

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

## Henry County, Indiana

### We—Westland silt loam

#### Map Unit Setting

*National map unit symbol:* 5k01  
*Elevation:* 680 to 1,250 feet  
*Mean annual precipitation:* 36 to 42 inches  
*Mean annual air temperature:* 49 to 53 degrees F  
*Frost-free period:* 175 to 185 days  
*Farmland classification:* Prime farmland if drained

#### Map Unit Composition

*Westland and similar soils:* 100 percent  
*Estimates are based on observations, descriptions, and transects of the mapunit.*

#### Description of Westland

##### Setting

*Landform:* Depressions on stream terraces, depressions on outwash plains  
*Landform position (two-dimensional):* Footslope, toeslope  
*Landform position (three-dimensional):* Talf  
*Down-slope shape:* Concave  
*Across-slope shape:* Linear  
*Parent material:* Loamy outwash over sandy and gravelly outwash

##### Typical profile

*A - 0 to 10 inches:* silt loam  
*B1 - 10 to 30 inches:* clay loam  
*B2 - 30 to 45 inches:* gravelly sandy clay loam  
*2C - 45 to 60 inches:* gravelly coarse sand

##### Properties and qualities

*Slope:* 0 to 2 percent  
*Depth to restrictive feature:* 30 to 55 inches to strongly contrasting textural stratification  
*Drainage class:* Poorly drained  
*Runoff class:* Negligible  
*Capacity of the most limiting layer to transmit water (Ksat):* Moderately high to high (0.60 to 2.00 in/hr)  
*Depth to water table:* About 0 to 12 inches  
*Frequency of flooding:* None  
*Frequency of ponding:* Frequent  
*Calcium carbonate, maximum content:* 55 percent  
*Available water supply, 0 to 60 inches:* Moderate (about 7.9 inches)

##### Interpretive groups

*Land capability classification (irrigated):* None specified  
*Land capability classification (nonirrigated):* 2w  
*Hydrologic Soil Group:* B/D  
*Ecological site:* R111XA016IN - Outwash Mollisol  
*Other vegetative classification:* Mixed/Transitional (Mixed Native Vegetation)  
*Hydric soil rating:* Yes

# INDIANA - EPA Map of Radon Zones

<http://www.epa.gov/radon/zonemap.html>

The purpose of this map is to assist National, State and local organizations to target their resources and to implement radon-resistant building codes.

This map is not intended to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones.

*All homes should be tested, regardless of zone designation.*

**IMPORTANT:** Consult the publication entitled "Preliminary Geologic Radon Potential Assessment of Indiana" (USGS Open-file Report 93-292-E) before using this map. <http://energy.cr.usgs.gov/radon/grpinfo.html> This document contains information on radon potential variations within counties. EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area.

Zone 1

Zone 2

Zone 3
