Re: Request for Extension of Local Limits (LL) Re-evaluation for Pretreatment Program for the City of Anderson Wastewater Treatment Plant, Anderson IN, Permit No. IN0032476

Dear Mr. Dittmer,

The City of Anderson Water Pollution Control is requesting approval for a ninety (90) day extension of the Local Limits Re-evaluation of the Pretreatment Program. Due to the COVID-19 pandemic some of our staff over the past six months had to be quarantined because of illness/exposure to the virus and we have just recently lost staff to another job opportunity. The sampling required for the local limits re-evaluation has been conducted; however, we are also seeing a delay in receiving our laboratory analysis, due to the laboratories own pandemic issues. Pretreatment personnel are required to social distance, which has been accomplished by staggering the times that employees are in the office or on plant grounds. In addition to being shorthanded, the safety restrictions have created challenges in accomplishing the basic and necessary Pretreatment tasks. As soon as all data can be returned, the City shall begin compiling the data for local limit calculations.

We are all looking forward to receiving the vaccine and to a hopeful end to the COVID-19 pandemic in the not so distant future. If you have any questions, or need any additional information, please contact me at (765) 648-6568.

Sincerely,

Carmen Davis
Industrial Surveillance Manager
City of Anderson Water Pollution Control Utility
