Good Afternoon Lindsey,

I had hoped that this would not be necessary...but, weather was against us this May. We were able to get the majority of the onsite wells sampled in early May....however, we had to return in early June to access the wells in the floodplain. I had hoped we would have all of the analytical data back for the second round of sampling in time for the submittal in early July; but, it still has not been enough time. Our last sample date for both North Ash Pond wells the South Ash Pond wells was June 6, 2024.

Would IDEM accept a due date of August 5, 2024 for both the North and South Pond reports...that way it would be inclusive of all of the wells that were sampled? If not, we can plan on submitting a partial report with the data collected in early May in the next few weeks, and an addendum with the June data sometime in August.

Thank you for your consideration,

Becky
