Re: Repeat Sample Requirements

One (1) routine microbiological sample collected on June 25, 2024, by your system tested positive for Total Coliform. Under the 40 CFR 141.858 incorporated by reference at 327 IAC 8-2-4.1, you must collect three (3) repeat samples within twenty-four (24) hours of notification.

1. The repeat samples must be taken at the locations described in your approved sample siting plan¹ or must be taken as follows: one (1) sample must be taken from the tap where the original positive sample was taken; one (1) sample at a tap within five service connections up-stream; and one (1) sample at a tap within five service connections downstream.

All repeat samples must be taken on the same day and received by the lab within thirty (30) hours of collection time. The Bacteriological Report Form sample type must be marked Repeat (RP). You must provide the original unsatisfactory sample number and date of collection. Please note: A *replacement* sample is required for any sample received over thirty (30) hours of collection time or if a sample is invalidated by the lab.

2. If Total Coliform-positive is detected in any repeat sample, you will be required to complete an assessment. Please contact your assigned compliance staff for questions.
3. If any original or repeat samples are coliform-positive, the result is counted as an unsatisfactory result in compliance calculations. Any coliform-positive sample must also be tested for *E.coli*. Presence of *E.coli* in a repeat sample constitutes an *E. coli* MCL (maximum contaminant level) violation and triggers a Level 2 Assessment.

4. To ensure that your repeat sample results are submitted to IDEM in a timely manner, you may check Drinking Water Watch, the IDEM public database. That database can be found at; <https://myweb.in.gov/IDEM/DWW/>. If your repeat results do not appear in the database within 24-48 hours after you have collected them, please call the analyzing laboratory and inquire as to the status of those results. All labs are required to submit results to IDEM.

If you have any questions concerning the repeat sampling requirements please call Yahira Rosado at (317) 234-7940 or your IDEM Field Inspector, Anna Readle, at (812) 582-0699.

cc: Anna Readle, Field Inspection Staff

¹ If you do not have an approved Total Coliform Site Sampling Plan you will be required to submit one and have it approved.
