Insignificant Permit Modification – June 24, 2024

VFC # [83659518](#)

Duke Energy Indiana, LLC
Gibson Generating Station
RWS I South Landfill
Owensville, Gibson County
SW Program ID 26-06

Lindsey,

I reviewed the *Insignificant Permit Modification* (Permit Mod) dated June 24, 2024. Atlas developed Permit Mod and Duke Energy Indiana LLC and submitted the document via email on June 24, 2024.

The document requests a permit modification to the Solid Waste Land Disposal Facility Permit Renewal dated June 13, 2024 (VFC # [83651745](#)), for the Duke Gibson South RWS I Landfill. Specifically, the Permit Mod contains revised specifications for removing the previously planned installation of Cell 5 and Cell 6 of the landfill based on Duke Energy updating the decommissioning plan for the Gibson Generating Station, resulting in a significant reduction in the projected CCR waste generation and the need for Cell 5 and Cell 6.

Based on my review, the Permit Mod does not appear to contain any specific geologic or groundwater related information for review and comment by Geology Section staff. However, I appreciate being informed of the provided information and specifications for the Gibson RWS I Landfill.

Please also refer to the Engineering Section for technical recommendations from their review of the document.

If you have questions, or would like to discuss my review further, please let me know.

Best regards,

Troy
