October 2022

REVISION DATE:
June 2024

**CONTINGENCY PLAN
DIVET, INC.
2857 JIM NEU DRIVE
PLYMOUTH, INDIANA
AUGUST MACK PROJECT NUMBER JW0487.250**

INTRODUCTION

Purpose

The purpose of this plan is to address the hazards that are most likely to occur or be encountered during the operation of the facility as well as the design capacity of food material storage areas. This plan is not, however, to be constructed as a compilation of all possible emergencies or hazards which could possibly occur or exist at the facility. It is the sole responsibility of Divert's facility operator to ensure that the facility is operated, at a minimum, in conformance with the Occupational Safety and Health Agency (OSHA) regulations detailed in 29 CFR Parts 1900 through 1910, inclusive, and any other pertinent local regulations, so that the health and welfare of all workers is adequately safeguarded.

A clear and complete copy of this plan, along with all pertinent drawings, maps, and lists, including address and phone numbers of all concerned emergency agencies is posted conspicuously at the facility near spill supplies. A copy of this Contingency Plan may be presented to the local fire and police departments.

POTENTIAL HAZARDS

Divert does not accept any hazardous, liquid, putrescible, radioactive, regulated medical, contained gaseous, contaminated soil, or other wastes not specifically identified previously in the solid waste processing application. Loads will be inspected for these and other unauthorized wastes prior to tipping. Therefore, the possibility of a spill of liquid waste is minimized. The hazards for which a potential exists at this facility and which this plan addresses are fire, explosion, equipment breakdown, and plant shutdown.
