Appendix B – Informational Flyers & Public Notice

INTRODUCTION

The Indiana Department of Environmental Management's (IDEM's) Voluntary Remediation Program (VRP) requires a Community Relations Plan (CRP) to be submitted as part of the site's Work Plan (in accordance with the non-rule policy document WASTE-0049-NPD). Geocel Corporation has been very proactive in regards to informing the community and potentially affected parties about the site. Many of these activities occurred as soon as contamination was discovered in the residential area located south of County Road 106 and include:

- 1) Informing residents of the potential for contamination via door-to-door canvassing of the neighborhoods during sampling activities;
- 2) Making telephone calls to residents informing them of their residential water well sampling results;
- 3) Creating an informational website (www.meadowfarmsupdate.com) that potentially affected parties can access to obtain a substantial amount of information regarding the site and submit e-mail questions;
- 4) Creating a telephone hotline that potentially affected parties can use to ask questions or be provided with information;
- 5) Delivering flyers to residents within the neighborhood informing them of the creation of the website, telephone hotline, and the public information forum;
- 6) Holding an open public information forum that included poster presentations and informal question and answer sessions;
- 7) Releasing multiple press releases to local news outlets (newspapers, radio stations, and television stations).

The above activities, along with the basic components of IDEM's CRP described in this plan, create an effective Community Relations Plan for the Geocel site (VRP #6070601).

1.0 POTENTIALLY AFFECTED PROPERTY OWNERS/OCUPANTS

The following table includes properties that had their private water wells sampled, properties where monitoring wells have been installed on their property, and properties adjacent to the Geocel facility. A total of 50 out of the 115 residential properties did not have any detections of volatile organic compounds (VOCs) in their wells during two (2) separate sampling events conducted in 2007.

Address	Street	Name
2502	Marina Drive	Keyline Sales (property owner Ken Lail) (southern adjacent property)
3605	Cooper Drive	Reflex Industries (property owner DNB Enterprises, LLC) (eastern adjacent property)
3604	Cooper Drive	Global Building Products (property owner Cooper Drive LLC) (northeastern adjacent property – across Cooper Drive)
2600	Marina Drive	Chipco, Inc. (property owner Allan Ludwig) (northern adjacent property – across Cooper Drive)
2601	Marina Drive	Phoenix USA (property owner KF Investments, LLC) (northwestern adjacent property – across Marina/Cooper Dr.)
2505	Marina Drive	Shepherd Distribution (property owner Shepherd Real Estate, LLP) (western adjacent property – across Marina Drive)
2507	Decio Drive	Quality Plastics & Engineering (property owner DQ, LLC) (southeastern adjacent property)
2503	Marina Drive	Hadley Inc. (property owner LDL Realty Co. Inc.) (southwestern adjacent property – across Marina Dr.)
2501	Marina Drive	Marine Fasteners (owned by Trustee of Carl Brantley, Jr.)
2500	Marina Drive	ACT (property owner Linken, Inc.) (occupied by a subsidiary of Geocel Corporation)
23254	Broadwood Dr.	Indiana Michigan Power Co. (15-acre electric substation property north of Broadwood Dr.)
23357	Broadwood Dr.	Danny & Pam Kemper
23374	Broadwood Dr.	Steve & Joann Acord
23377	Broadwood Dr.	Christina Hoelyfield

23552	Thistle Ct.	Nira Wright
23557	Timothy Ct.	Tim O'Neill
23558	Timothy Ct.	Ernie & Rhonda Attkisson
23578	Timothy Ct.	Sam & Ellen Dickey
23579	Timothy Ct.	Bobbi McClain
23585	Timothy Ct.	Shonda Null
23586	Timothy Ct.	George Resindez

Some of the property and owner information was obtained from the Elkhart County GIS website (<http://www.sidwellmaps.com/website/elkhartco/viewer.php>). Note that as of early 2008, the industrial park area north of County Road 106 has been officially annexed into the City of Elkhart, which resulted in address changes for these properties.

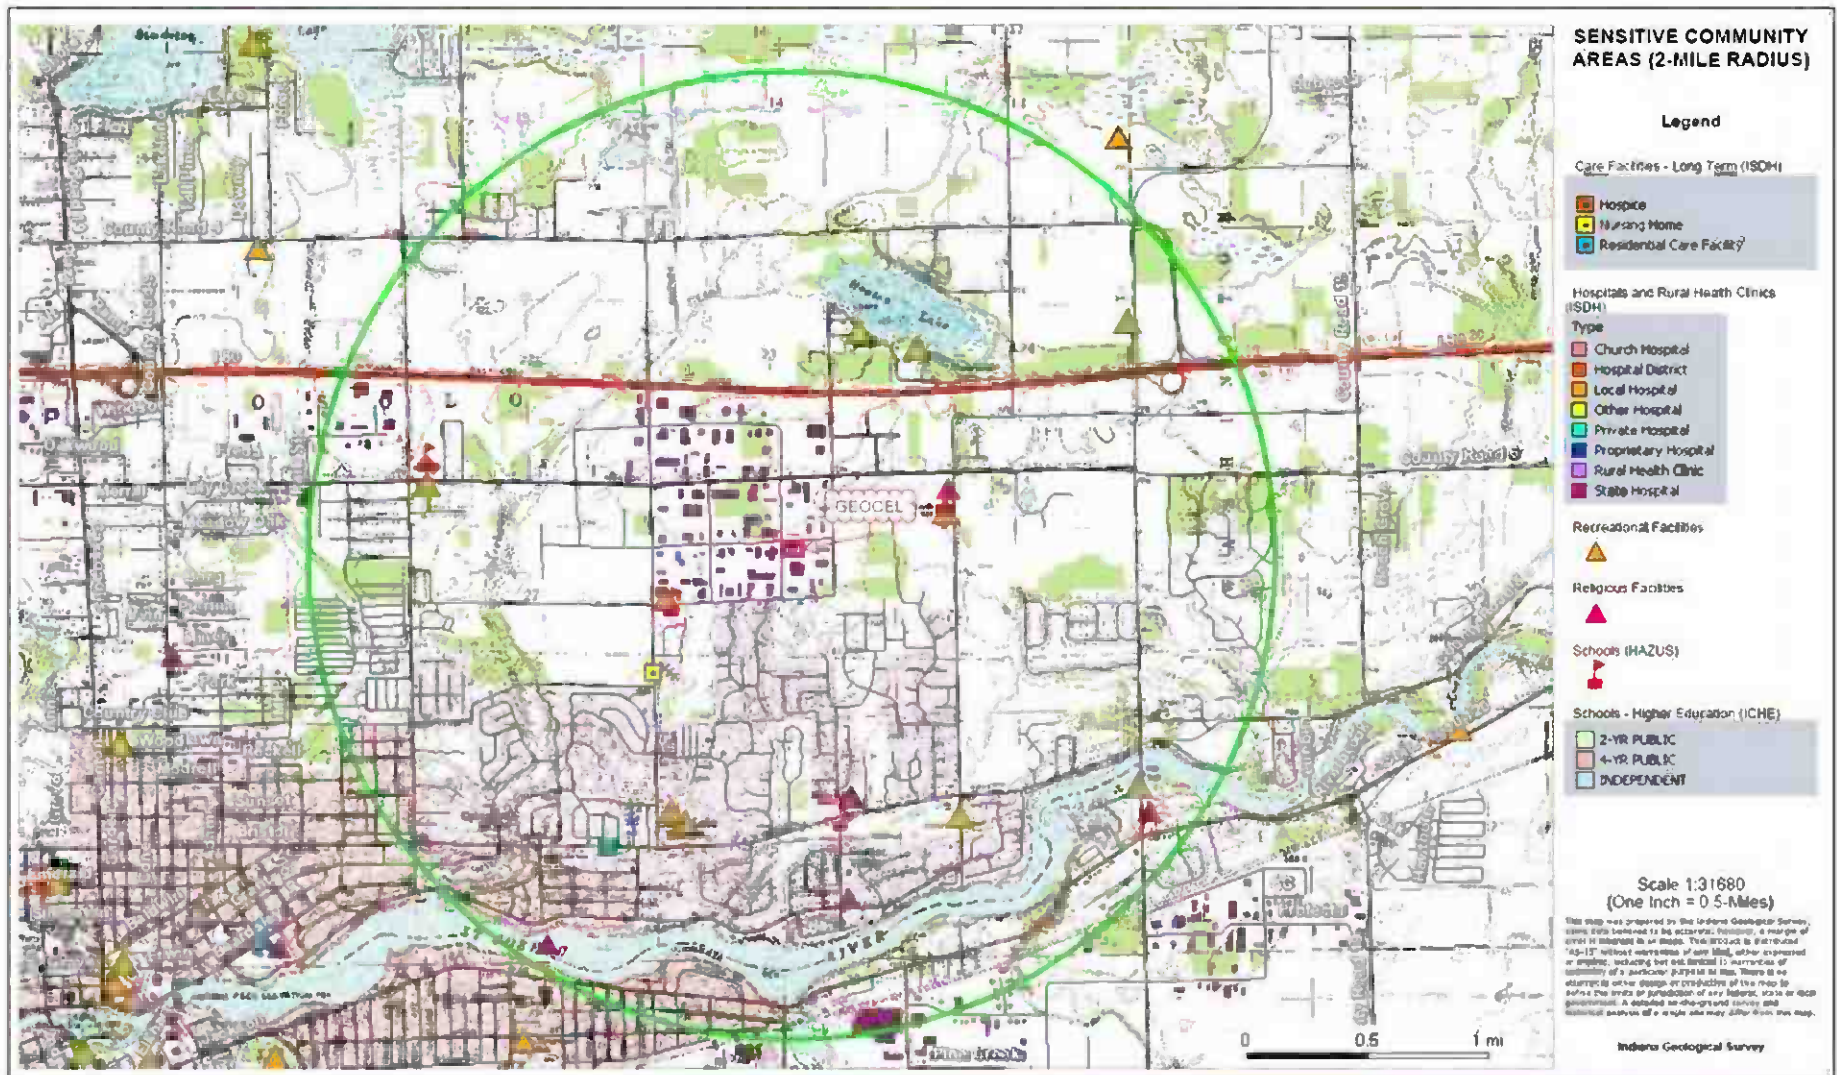

2.0 NEIGHBORHOOD ORGANIZATIONS

The Meadow Farms neighborhood reportedly does not have a neighborhood association or organization. However, the Bacon Hill Neighborhood Association serves the Eastwood Estates neighborhood (southeastern portions of site). Their contact information is:

Bacon Hill Neighborhood Association
Attn: Judy Cook, Officer
23491 Broadwood Drive
Elkhart, IN 46514

3.0 SENSITIVE COMMUNITY INSTITUTIONS

The following figure depicts sensitive community institutions within 2-miles of the site. None of these institutions lie within or near the impacted area of the site. Institutions included on the figure include: schools, nursing homes, parks/playgrounds, child care facilities, churches, health care facilities and other related institutions. The majority of this data was obtained from the Indiana GIS Atlas website.

4.0 WRITTEN NOTICE

The following is a sample written notice that will be sent to property owners/occupants and neighborhood organizations. No sensitive community institutions are located within or near the actual impacted area, therefore no notices will be sent to these institutions.

Dear Resident (Property Owner or Neighborhood Organization):

This notice is being provided to inform you of the presence of a site in your neighborhood that has been accepted into Indiana Department of Environmental Management's (IDEM's) Voluntary Remediation Program (VRP). The specific site is the Geocel Corporation facility (VRP #6070601) located at 2504 Marina Drive. This notice is a requirement of a Community Relations Plan, which has been developed by Geocel Corporation and is a component of the Remediation Work Plan that is available for review at the repository listed below. The Community Relations Plan includes provisions for notifying all neighboring property owners and occupants, neighborhood organizations and other local entities. In addition, the Community Relations Plan may require the applicant to post an informational sign at the subject property or provide other informational opportunities. For additional information about the Community Relations Plan and the Remediation Work Plan please review the documents in the repository or contact the IDEM Project Manager at (317) 234-0973.

The Geocel Corporation facility is located at 2504 Marina Drive in Elkhart, Indiana. Additional information regarding this VRP site may be obtained at www.meadowfarmsupdate.com. Many activities have already been completed at the site, including the installation of municipal water at several properties throughout the area. Additional activities to be performed at the site include periodic monitoring well sampling and remediation.

The Remediation Work Plan for the site is available for public review and comment at:

Elkhart Public Library
Reference Desk
300 South 2nd Street
Elkhart, Indiana

The public comment period will last 30-days. As such, comments are due by November XX, 2008. You may direct your comments by mail to:

Corey Webb, Project Manager
IDEM - Voluntary Remediation Program
MC 66-30V IGCN 1101
Indianapolis, Indiana 46204-2251

Please reference Geocel Corporation (VRP #6070601) in your comments.

Sincerely,
GEOCEL CORPORATION

5.0 LOCAL GOVERNMENT UNITS

Potentially affected government units located within one (1) mile of the site include:

City of Elkhart
Mayor Richard Moore
Municipal Building
229 S. Second St.
Elkhart, IN 46516

Elkhart County
Board of Commissioners
117 North Second Street
Goshen, IN 46526
(with copies to):

Elkhart County Health Department
Environmental Health Services
4230 Elkhart Road
Goshen, IN 46526

6.0 PUBLIC COMMENT PERIOD NOTICE

The primary local newspaper that serves the area of the site is:

Elkhart Truth
421 South 2nd St.
Elkhart, IN 46516

7.0 REMEDIATION WORK PLAN REPOSITORIES

The Elkhart Public Library is the local library that serves the area. The library has indicated that the Remediation Work Plan will be stored and available for public review and comment at the main branch Reference Desk located at:

Elkhart Public Library
Reference Desk
300 South 2nd Street
Elkhart, Indiana 46516

8.0 SIGNAGE

The Geocel Corporation site is clearly identifiable at 2504 Marina Drive with commercial signage (see picture below).

Additionally, the potentially affected parties near the site have already been notified of potential contamination issues through door-to-door canvassing during sampling activities, flyers delivered to their homes, and/or via the public meeting that was held on August 7, 2007 (as described in Section 9.0). The total impacted area covers numerous individual properties over an approximately 24.6-acre area. As such, no additional signage is warranted.

9.0 ADDITIONAL COMMUNITY RELATIONS ACTIVITIES

In addition to the basic components of the CRP described in previous sections, Geocel Corporation has performed several other activities relating to informing nearby potentially affected parties.

- **Initial Private Water Well Sampling** – RES and Elkhart County Health Department (ECHD) personnel sampled 115 residential wells in June/July 2007. As part of these sampling activities, each resident was provided a letter from the ECHD informing them of the potential for contamination. Ninety (90) homes were also re-sampled in August 2007 in order to confirm their initial results. Each resident was informed of the re-sampling event via a door-knob flyer that was left at their home. During each sampling event, residents were notified of their results via a telephone call and/or by supplying the resident with their actual laboratory sampling results. A letter from the ECHD also accompanied the lab results. A copy of the ECHD letters, door-knob flyer, and a map showing the homes that were sampled are provided in Appendix A. Additionally, the private wells associated with the industrial properties located north of County Road 106 were also sampled in 2007. These included: two (2) private water wells at the Keyline Sales property; a private water well at the Marine Fasteners property; an irrigation well at the Hadley property (former Dygert Seating); and an irrigation well at the ACT property.
- **Informational Website** – A website was created in June 2007 to help inform the public about the Geocel VRP site, www.meadowfarmsupdate.com. The website includes general geologic information, contaminant information, history, maps, events, a “what’s new” section, a question/answer section, and a contacts page. Potentially affected parties can also e-mail questions or concerns regarding the site. A toll-free telephone hotline, (800) 699-1493, was also initially established in lieu of those portions of the public who do not have readily available internet access. The toll-free hotline was recently discontinued.
- **Delivery of Flyers** – Informational flyers were delivered to residents in the area on three (3) separate occasions in June, July, and August 2007. Copies of the flyers are provided in Appendix B.
- **Public Information Forum** – A public information forum was held on August 7, 2007, in order to inform potentially affected parties about the Geocel VRP site. Two (2) sessions were held at the Matterhorn Conference Center located on Cassopolis Street in Elkhart from 2pm to 4pm and 6pm to 8pm. The forum included several poster presentations showing site conditions and potential remedial activities. Experts were also available to answer questions from the public, including: a toxicologist, a hydrogeologist, and county/state regulatory agency personnel. Another public information forum was held on April 21, 2008, (6pm at the Hillcrest United Methodist Church) in order to inform residents about upcoming municipal water installations. Engineers were present at this meeting to answer technical questions from the residents regarding the installation of municipal water.

- **Press Releases/Press Coverage** – Numerous press releases have been prepared and submitted to local newspapers, radio, and television media. Newspaper media coverage includes several articles in the *Elkhart Truth* as well as articles in the South Bend Tribune, Indianapolis Star, RV Business Journal, and others. Television news coverage has occurred on all of the local stations (WSBT-22, WNDU-16, and FOX-28). Radio news coverage has also occurred on 960-WSBT and 1340-WTRC.

Aixa Perez, M.D.
Health Officer

June 13, 2007

Dear Resident:

The Elkhart County Health Department's, Environmental Health Services Division is conducting residential water well sampling and testing in your neighborhood. Currently there is no evidence that any residential wells are contaminated. This testing is being conducted due to your homes proximity to an industrial park that has been in existence for many years. The potential exists that such industrial parks may have had unknown historical releases, which could impact neighboring residential areas. This sampling and testing event will help us determine if any such spills or releases may have impacted residential wells.

There is no cost to the occupants or homeowner for this testing event. A representative of the Elkhart County Health Department will be present with proper credentials during all sampling events.

If you find this note attached to your home then please call the Environmental Health Services Division to help us sample your home. You do not need to be present for this to occur however, we do need your permission and some basic information. Please contact John Hulewicz, Environmental Health Supervisor at (574) 875-3391 with any questions or to assure your well is sampled.

Sincerely,

John J. Hulewicz
EHS Supervisor

Flyers to Residents & Notice of Public Informational Forum

MEADOW FARMS UPDATE

In the interest of keeping Meadow Farms residents and neighbors informed as to the ongoing progress of our testing and remediation efforts, Geocel is creating an informational Web site, **MeadowFarmsUpdate.com**.

The site will include Frequently Asked Questions, history of the problem, information regarding the contaminants and a map of the affected area. Please check back often; the site will be updated frequently as we make progress on our remediation efforts.

We plan to have the site running by this Thursday, June 28, 2007. In the meantime, please contact the Elkhart County Health Department at (574) 875-3391 with any questions.

Delivered/Mailed to over
100 residents on or
about June 26, 2008.

MEADOW FARMS UPDATE

Dear resident,

We understand that you may have additional questions surrounding the recently discovered contamination that traveled from the Geocel industrial site into the nearby Meadow Farms neighborhood.

We are committed to making sure that none of your questions go unanswered. This is why we have made several resources available:

Web site: www.MeadowFarmsUpdate.com
E-mail: info@meadowfarmsupdate.com
Hotline: (800) 699-1493

Delivered/Mailed to over
100 residents on or
about July 18, 2008.

It is our goal to keep the MeadowFarmsUpdate.com Web site as up to date as possible; we will continue to issue new information as soon as it is available. We encourage you to call or e-mail us with your questions and suggestions as to how we can improve the quality of information on the site. Please send us an e-mail if you would like to be notified when new information is posted.

For the 13 homes that were found to have contaminants above the Environmental Protection Agency's recommended maximum levels, we have retained a toxicologist to help answer questions. Please call our hotline or send us an e-mail and we will see that your questions are appropriately answered. You may also contact the Agency for Toxic Substances and Disease Registry Region 5 Environmental Hotline at (800) 621-8431, ext. 36086. For all other homes that were tested, there were either no contaminants detected, or they were within levels allowed under the EPA's Safe Drinking Water Act.

We recognize that some of you may prefer one-on-one contact to discuss these issues. With that in mind, we are planning to hold a public information forum on August 7. There will be two sessions: 2 p.m. – 4 p.m. and 6 p.m. – 8 p.m. The location of this meeting is to be determined. In the meantime, please continue to visit our Web site, call or e-mail us to get answers to your questions.

What are we doing now?

We have just been notified by the Indiana Department of Environmental Management (IDEM) that our Voluntary Remediation Application has been approved and we have been assigned a project manager. Next we will be working on the Remediation Work Plan and will be working with IDEM to gain approval for specific tasks so we may begin remediation prior to approval of the official work plan.

Our actions have not stalled during this planning process; our environmental consultant is currently installing monitoring wells, which will be used throughout the remediation process to monitor groundwater chemistry and groundwater fluctuations.

We want to reassure you that we are deeply committed to resolving the issues that result from this contamination, and we continue to work on an aggressive timeline to address the issue.

MEADOW FARMS UPDATE

Public Information Session Announcement

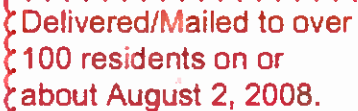

We have planned two public information sessions to answer questions surrounding the recently discovered contamination that traveled underground from the Geocel site into the nearby Meadow Farms neighborhood. The sessions will be from 2 p.m. to 4 p.m. and 6 p.m. to 8 p.m. Aug. 7 at the **Matterhorn Conference Center**, 2041 Cassopolis St.

Community members may attend either session to consult with a variety of different experts in a casual setting. Experts will offer one-on-one and small group discussions in the subject areas of geology and groundwater, remediation and public health risk. There will be no formal registration process, but attendees will have the opportunity to sign up for a mailing list.

Expert participants include Roberts Environmental Services LLC, the Elkhart County Health Department, ENVIRON Corp. and the Indiana Department of Environmental Management.

This is one of our several initiatives in place to reach out to the community to provide information and answer questions. Community members with questions or concerns who are not able to attend the public information sessions can also visit MeadowFarmsUpdate.com, call (800) 699-1493 or e-mail info@meadowfarmsupdate.com.

Thanks, and we look forward to meeting you next week.

Delivered/Mailed to over
100 residents on or
about August 2, 2008.

Geocel Corp. Announces Public Information Sessions Regarding the Meadow Farms Cleanup

*Tuesday, Aug. 7, 2007
Session One: 2 to 4 p.m.
Session Two: 6 to 8 p.m.*

**Matterhorn Conference Center
2041 Cassopolis St.
Elkhart, IN**

These sessions provide an opportunity for community members to consult with a variety of different experts in a casual setting regarding the recently discovered contamination that traveled from the Geocel site into the nearby Meadow Farms neighborhood. Experts will offer one-on-one and small group discussions in the subject areas of geology and groundwater, remediation and public health risk.

PARTICIPANTS:

- Geocel Corp.
- Roberts Environmental Services, LLC
- Elkhart County Health Department
- ENVIRON Corp.
- Indiana Department of Environmental Management

For more information, please consult the following resources:

Web site: www.MeadowFarmsUpdate.com
E-mail: info@meadowfarmsupdate.com
Hotline: (800) 699-1493

If you require special accommodations to attend the meeting, please call the telephone number listed above.

Public Notice - Elkhart Truth, on
or about August 2, 2008.

MEADOW FARMS UPDATE

Dear resident,

We sincerely hope you found the public information session helpful in answering your questions surrounding the recently discovered contamination that traveled from the Geocel site into the nearby Meadow Farms neighborhood.

We are committed to maintaining open dialogue throughout this process. If for any reason your questions weren't answered at today's information session, we want to hear from you. Please utilize the following resources:

Web site: **www.MeadowFarmsUpdate.com**

E-mail: **info@meadowfarmsupdate.com**

Hotline: **(800) 699-1493**

Moving forward, it is important that we maintain this two-way communication. We will strive to keep our Web site updated. Once remediation starts, there may be periods of time where we just don't have much news to put out there. If at any point you are feeling like you would like to hear how things are progressing, please just pick up the phone and call us. We promise that someone will call you back the next business day. Or drop us an e-mail. As a longstanding resident of the neighborhood we share, we want to reassure you that we are here for the long haul.

Sincerely,

Geocel Corporation

Handout at Public
Information Forum held
on August 7, 2008.
