RE: Private Water Well Survey

Twigg Corporation Martinsville, Indiana BCA Project 7403/99-138

Mr. Ridley:

Please find attached for your review the Private Water Well Survey and Sampling Results for the proposed Twigg ERO area in Martinsville, Morgan County, Indiana. Included are:

- an updated Private Water Well Survey Summary;
- a Final Private Well Survey Results Table (through 08/2013);
- a table of analytical results for the 2012 & 2013 private water well sampling events:
- an updated ERO/Plume map plotting survey/sampling results for the 2012 & 2013 events;
- results letters for the six (6) residents whose wells were sampled in 2012/2013; and
- an updated Master Survey Database.

Please review the materials at your convenience. If you have questions regarding the findings or if you need additional information, please do not hesitate to contact me at (317) 578-4233.

We appreciate the opportunity to be of assistance.

Sincerely,

Len Hinrichs Project Manager

cc: Dan McInerny

# Twigg Private Water Well Survey 08/23/2013 Update

Bruce Carter Associates, LLC (BCA) performed a private water well survey of all properties within the proposed Environmental Restrictive Ordinance (ERO) area in Martinsville. The purpose of the survey was to determine:

- if the properties had a private water well, and
- if owners of properties with private water wells would allow BCA to sample and analyze water collected from the wells.

The survey consisted of several phases in order to try to identify and sample as many private water wells as possible:

- 1. The first phase was comprised of a comprehensive mailing on December 18, 2012 to each property owner within the ERO (and tenants if they were able to be determined) consisting of a cover letter explaining the purpose of the survey, a Private Well Survey Form, and a self-addressed, stamped envelope for the owner/tenant to complete and postal mail back to BCA. In addition, information was provided to respondents to allow them to contact BCA via telephone, fax, or internet if it was more convenient. A copy of the cover letter and survey form are attached.
- The second phase consisted of an initial door-to-door Survey (DTD #1) conducted on January 8-9, 2013 for any properties that did not respond to the mailing. If an occupant was not home, a copy of the survey cover letter and Private Well Survey Form were left in their door for them to complete and return to BCA.
- 3. The third phase consisted of telephone calls conducted on January 31, 2013 to owners (and tenants if they were able to be determined) of any non-responsive properties. If possible, messages stating the nature of the inquiry were left if the owners or occupants were not home. Note: current phone numbers were not able to be obtained for some of the owners and occupants of the properties.
- 4. The fourth phase consisted of another round of telephone calls on March 5, 2013 to non-responsive property owners and/or tenants.

- 5. The fifth phase consisted of a second door-to-door Survey (DTD #2) conducted on March 21, 2013 for any remaining non-responsive properties.
- 6. The sixth and final phase consisted of a last attempt on March 27, 2013 to contact by telephone the remaining non-responsive owners and/or tenants of properties for which BCA has contact information.

The data generated from the survey were entered and tracked on a spreadsheet. Responses to the survey were varied. A total of 134 parcels are included in the ERO area.

A summary of the information obtained is provided in the table below:

Number	Response
101	Confirmed that no private water well is located on the property.
16	Owners/Tenants have not responded to contact attempts. Four of the non-responders appear to be unoccupied residences. In addition, three of the non-responders are believed to have private wells based on prior well surveys (two of which were previously sampled).
5	Confirmed that they do have a private well and have given permission to sample in 2013. BCA previously sampled two of the five.
2	Confirmed that they do have a private well and gave permission to sample; however, the well is either damaged or has not been used in so long that it was not able to be sampled.
2	Denied permission to sample. Believed to have well based on previous surveys.
1	Denied permission to sample (BCA previously sampled the well).
5	Parcels are part of the Twigg facility.
1	Parcel is a city park (Victory Park).
1	New parcels added to ERO with no information regarding wells yet.

A copy of the Private Water Well Survey Master Database is attached. In addition to the database, properties that have private water wells were plotted on a map encompassing the entire ERO area (Figure 1). The properties are color coded depending on whether BCA has permission to sample, whether the well integrity allowed sampling, and whether the property owner has denied permission to sample. Also shown are the results of previous testing (1996 to 2012) of known private wells in and adjacent to the proposed ERO area.

BCA completed a round of sampling of the private water wells in May, June, and July, 2013. The results of the sampling are included in the attached Table 1.

Melvin Manley 190 E. South Street Martinsville, IN. 46151

RE: Water Well Sample

Dear Mr. Manley:

With your permission, on July 30, 2013, a sample of water was obtained from the faucet on the north side of your residence. You indicated that the faucet is connected to a private well in your basement and is used for watering the yard and washing the car.

The results indicate that the chlorinated solvent cis-1,2-dichloroethene is present in the water at 114 parts per billion (ppb) which is greater than the Maximum Contaminant Level (MCL) of 70 ppb allowed for drinking water by the U.S. Environmental Protection Agency (EPA) and the Indiana Department of Environmental Management (IDEM). In addition, another chlorinated solvent 1,1,1,-trichloroethane is present in your water at 195 ppb which is just below the MCL of 200 ppb. The water from your well should not be used for drinking, cooking, or showers. City water should be used for drinking and other domestic consumption. A copy of the laboratory report is attached for your records. Please call me at 317-578-4233 if you have any questions.

Very truly yours Bruce Carter Associates, L.L.C.

Maurice Curtis 1060 S. Ohio Street Martinsville, IN. 46151

RE: Water Well Sample

Dear Mr. Curtis:

With your permission, on May 21, 2012, and again on July 5, 2013, samples of water were obtained from the faucet on the north side of your house. You had previously indicated that the faucet is connected to a private well in your basement and is used for watering the yard and washing the car.

The results indicate that several chlorinated solvents are present in the water, but are below the Maximum Contaminant Levels (MCLs) allowed for drinking water by the U.S. Environmental Protection Agency (EPA) and the Indiana Department of Environmental Management (IDEM). It is noteworthy that the concentrations present in your water have continued to diminish with time. Nonetheless, as a precaution, we continue to recommend that the well water not be used for consumption due to the risks associated with shallow driven well point systems. The water from your well should not be used for drinking, cooking, or showers, but may safely be used for watering plants or washing the car. City water should be used for drinking and other domestic consumption. A copy of the laboratory reports are attached for your records. Please call me at 317-578-4233 if you have any questions.

Very truly yours Bruce Carter Associates, L.L.C.

Herb Chandler 1239 S. Marylin Street Martinsville, IN 46151

RE: Water Well Sample

Dear Mr. Chandler:

With your permission, on May 30, 2013, a sample of water was obtained from the faucet on the side of your garage. You indicated that the faucet is connected to a private well in your garage and is used for watering the yard and washing the car.

The results indicate that no chlorinated solvents were detected in the collected sample from your well. Nonetheless, as a precaution, we recommend that the well water not be used for consumption due to the risks associated with shallow driven well point systems. The water from your well should not be used for drinking, cooking, or showers, but may safely be used for watering plants or washing the car. City water should be used for drinking and other domestic consumption. A copy of the laboratory report is attached for your records. Please call me at 317-578-4233 if you have any questions.

Very truly yours Bruce Carter Associates, L.L.C.

Len Hinrichs Project Manager
