Indianapolis, IN 46204-2251

To Whom It May Concern:

In 2000 and 2001 The Bippus Sewer District completed an installation of a gravity sewer collection system and the construction of a wastewater treatment facility for the area of Huntington County called Bippus. The community was formed into a district to provide remedy for perceived surface water contamination by the large number of septic systems in a relative small area.

The area, located in northwest Huntington County is currently comprised of 87 customers. All but 6 of the customers are single family residents. The 6 are a mix of business, government, and not for profit organizations.

The project was funded through the Department of Agriculture/Rural Development which provided a 45% grant and 55% loan. A copy of the latest RD report from is included which shows payments for 2013 and balance due.

At this time there are no plans to expand the sewage collection or treatment system. The number of customers has declined slightly over the years. The numbers for the district has declined because homes have become available and the neighboring property owner has purchased the property and removed the structure.

There are some vacant lots within the district that could be developed at some point in time. The current capacity is more than adequate to handle those minor increases in consumption and flow.

Attached you will find a GIS print out of the areas of both the Bippus Regional Sewer District.

There are no additional outstanding loans for the District..

If you should need any additional information please contact me at the address or telephone number listed below.

Sincerely,

David F. Hacker, District Manager
Norwood Regional Water and Sewer District
