Dear Board of Trustees:

Re: Regional District Plan

Pursuant to Indiana Code (IC) 13-26, and as required in the Order forming the Regional District (District), a district plan (Plan) was required to be submitted by the District to the Indiana Department of Environmental Management (IDEM).

IDEM has received and reviewed the District Plan and determined the Plan to be complete. No further action regarding the Plan is required at this time. Please note that the District should send updates to the Plan to IDEM as they occur.

If you have any questions, please feel free to contact me at 800-451-6027, extension (3-0476) or at lnewlon@idem.in.gov.

Sincerely,

Lynne Newlon

Dear Lynne Newlon:

Re: Regional District Plan

East Enterprise RSD

NPDES Permit No. IN0058041

The East Enterprise Regional Sewer District Treatment Plant and Collection System were built in 1995. Since the completion of the plant and collection system their have been no other projects completed. The district received both a loan and grant for the completion of the plant, and have since been paid off. The board is currently talking about options to upgrade the treatment plant, but no plans are in place at this time. We currently have a Parkson, extended aeration plant with a flow capacity of 100,000 gallons per day. The district currently serves 156 customers. Attached is a map showing the districts boundaries. If you need any additional information, or have any question, please contact the district at the above address.

Thank You,

Keith L. Lesiak

East Enterprise Regional Sewer District
