Dear Mr. Miller:

Re: Monitoring Requirements for
Transient Public Water Systems - New
PWSID #2430113

The Indiana Department of Environmental Management's Drinking Water Branch (DWB) has identified your water system as a transient public water system. **Your system has been assigned a Public Water Supply Identification number (PWSID) of 2430113. Please make sure your PWSID number is included on all correspondence and report forms submitted to the DWB.** It has been determined that you operate a ground water system serving a transient population of twenty-nine (29). There are several drinking water contaminants that you are required to monitor for as a public water system. All samples must be analyzed by a certified laboratory and must be submitted to the DWB within ten (10) days of the end of each monitoring period. A list of certified laboratories has been included for your use.

Total Coliform: You are required to collect samples for Total Coliform **every calendar quarter**. We recommend sampling during the first month of each quarter. The quarters are as follows:

First (1 st) Quarter:	January 1 through March 31
Second (2 nd) Quarter:	April 1 through June 30
Third (3 rd) Quarter:	July 1 through September 30
Fourth (4 th) Quarter:	October 1 through December 31

Based on your population, you are to collect one (1) sample quarterly. **You will need to start sampling immediately for Total Coliform.** If you have any questions concerning your bacteriological monitoring requirements, please contact Mr. Willi de la Rosa at (317) 234-7445.

The revised Total Coliform rule also requires you to submit a site sampling plan. Please contact Ms. Carrie Lowe at (317) 234-7426 for questions on the plan.

Nitrate: You are required to monitor for Nitrate annually. This sample must be collected at the entry point to your distribution system after all treatment, and must represent all source water serving that entry point. **You are to begin sampling for Nitrate in 2016.** If you have any questions concerning monitoring requirements for nitrate, please contact Mr. David Forsee at (317) 234-7442.

Nitrite: You are required to monitor for Nitrite once during 2016. This sample must be collected at each entry point to your distribution system after all treatment, and must represent all source water serving that entry point. If you have any questions concerning monitoring requirements for nitrite, please contact Mr. David Forsee at (317) 234-7442.

Please note: Separate and distinct test kits are required in order to monitor for each contaminant. Analysis shall only be conducted by laboratories that have been certified by EPA or the commissioner.

Small Systems Lab Assistance Program (SSLAP): IDEM has developed the Small System Laboratory Assistance Program designed to provide laboratory analysis for Total Coliform and Nitrate only at no cost for all non-profit systems serving a population of less than or equal to one hundred (≤ 100) persons. Your system is eligible to participate in the program. IDEM has arranged for the Indiana State Department of Health (ISDH) to mail the appropriate sample bottles to your system's physical address. You must follow the sampling schedule from IDEM and the sampling instructions attached to the bottles from ISDH that will be mailed to your system. If your system does not wish to participate in the SSLAP or does not receive bottles, please notify Ms. Sandra DeCastro at (317) 234-7444. Non-participants must choose a laboratory from the enclosed certified lab list.

You will also need to fill out the attached form for Ground Water Under the Direct Influence of Surface Water.

Please send or fax all report forms/correspondence to the following:

Indiana Department of Environmental Management
OWQ Drinking Water – Mail Code 66-34
100 North Senate Avenue, Room 1255
Indianapolis, Indiana 46204-2251
(FAX) (317) 234-7436

If you have any further questions on the drinking water requirements for your public water system, please contact any member of the compliance staff or your field inspector, Mr. Lucio Ternieden, at (574) 274-5610.

Sincerely,

Mary E. Hollingsworth, Branch Chief
Drinking Water Branch
Office of Water Quality

This system has not had 25 pop until now. Please activate them as a TR. They will be submitting an After-the-fact construction permit.

Mr. Miller will be sending me Mr. Schwartz's information. He did, but it was deleted on my latest phone change.

Thank you!
