Dear Mr. Tabedh:

Re: Change from Nontransient Noncommunity to
Transient Public Water System
PWSID #2300875

The Indiana Department of Environmental Management's Drinking Water Branch (DWB) changed your facility's classification from a nontransient noncommunity to a transient public water on October 6, 2016. **Your system has the same Public Water Supply Identification number (PWSID) of 2300875. Please make sure your PWSID number is included on all correspondence and report forms submitted to the DWB.** It has been determined that you are a ground water system serving a transient population of forty (40) and a nontransient population of twenty (20) for a total population of sixty (60). Based on this change, you are no longer required to monitor for certain contaminants, but must continue to monitor for the contaminants listed below. All samples must be analyzed by a certified laboratory and must be submitted to the DWB within ten (10) days of the end of each monitoring period. A list of certified laboratories has been included for your use.

Total Coliform: We require that you continue to sample quarterly for Total Coliform. Based on your population, we require that you continue to collect one (1) sample quarterly. **Your next sample is due in the 4th Quarter (October 1 – December 31) of 2016.** If you have any questions concerning your bacteriological monitoring requirements, please contact Mr. Wili de la Rosa at (317) 234-7445.

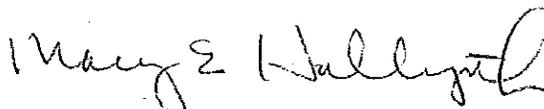

Nitrate: We require that you continue to monitor for Nitrate annually. This sample must be collected at the entry point to your distribution system after all treatment, and must represent all source water serving that entry point. **Your next sample is due in 2016.** If you have any questions concerning monitoring requirements for nitrate, please contact Mr. David Forsee at (317) 234-7442.

Please send or fax all report forms/correspondence to the following:

Indiana Department of Environmental Management

Subject: Request for Updated Inventory Information

The Drinking Water Branch is again requesting your input on any inventory changes at your facility.

It is important that we have your system's most current inventory information to assist us in our ongoing efforts to ensure that your drinking water is safe. Please review the information we have on file for you and mark down any changes. If all the information is accurate, please circle "No Changes." Then mail or fax the information back to us at 317/234-7436 as soon as possible.

A pre-addressed stamped return envelope has also been enclosed for your convenience. Please return the forms by **September 30, 2016**.

Please note that the population information will also be used to accurately establish your system's annual drinking water fees. **If we do not receive any updates from you, we will assume the information is valid for determining the drinking water fees.** If you have questions about the annual fee, please contact Ms. Carol Guidry at 317/232-8472.

Thank you for your assistance and cooperation with this matter. If you have any questions regarding your inventory information please contact Ms. Casey Davidson at 317/234-7443.

*****Please note: The Drinking Water Branch is using an automated notification system. This system is mainly used to provide sampling reminders. It may also be used for polling and to deliver important information. Please take the time to listen to these messages as they are very important. These messages are sent to the person listed as the SA (Sampling Reminder Contact). Messages can be sent by email, phone, or text. Texting is a new feature, and if you would like to receive messages this way, please fill in a phone number on the texting field in the SA Contact section on the next page.***

The following information is what the Drinking Water Branch currently has on file for your system and can be viewed at any time from our website <https://myweb.in.gov/IDEM/DWWW/>:

Got their inventory update in – they kept their 40 T and changed NT pop from 60 to 20 – should I go with this and make them Transient?

Joe Thompson (317-485-5177) called from this place to say they only have 20 employees. I don't know how many transients. We have them as 60 NT & 40 T so this could change them from a T to NT. Please verify pop #'s and let me know whether to make them T or inactivate or whatever. Thanks! Sara
