Re: Population Change
PWSID #5222002

Dear Mr. Getrost:

The Indiana Department of Environmental Management's Drinking Water Branch (DWB) has been notified that based on the calculation of two thousand two hundred eighty-one (2,281) service connections x 2.5, the population served by your public water system has changed from six thousand twenty-one (6,021) to five thousand seven hundred and three (5,703). Based on this change, we require you to collect **six (6)** Total Coliform samples **monthly** beginning in **October** of 2016. Please submit a revised site sampling plan to IDEM.

Please send or fax all report forms/correspondence to the following:

Standardized Monitoring Frameworks

Your sampling requirements have been detailed in the letter. In the past a Standardized Monitoring Framework table was also included as a quick-reference for the information contained in the letter. As sampling requirements change, these tables become inaccurate and can lead to confusion for systems trying to remain in compliance. Our website, Drinking Water Watch, has been enhanced to include all the sampling requirements for your system. These schedules are always up-to-date. Instructions for viewing your sample schedules on Drinking Water Watch are detailed below. *Drinking Water Watch can also be used to see the samples and contact information we have on file for your system.

Getting to Drinking Water Watch

Go to the IDEM webpage (www.in.gov/idem) and click on Safe Drinking Water Information Search on the right side of the page under Online Services.

OR go directly to <https://myweb.in.gov/IDEM/DWWW/>

Find Your Public Water System (PWS)

Type your PWSID into the Water System No. field and click on Search for Water Systems.

Click on the Water System No. for your water system.

Viewing Your Sample Schedules

Click on the Sample Schedules link on the left, second from the top.

TCR Schedules (Total Coliform Bacteria) are listed first. It shows the number of samples required as well as the frequency with which they need to be taken.

TCR Schedules

Sample Count	Sample Type	Sample Frequency	Effective Begin Date	Effective End Date	Seasonal Start MM/DD	Seasonal End MM/DD	Analyte Code	Analyte Name
1	RT	QT	10-01-2015		1/1	12/31	3100	COLIFORM (TCR)

Chemical schedules will be listed next – the Group Schedules followed by the Individual Schedules.

Schedules will show the specific time period your samples should be collected. They will show if you have completed the monitoring for the current monitoring period. You can see the next time your samples will be due.
