Indianapolis, IN 46268

Dear Mr. Ehrman:

Re: Completion of Independent Closure Process
Marathon Staunton Pipeline
CR 600 North, 0.7 miles west of CR 300 West
Staunton, Clay County
State Cleanup Site #198804040

The Indiana Department of Environmental Management (IDEM) has received the documentation submitted on your behalf concerning the environmental investigation at the property located at CR 600 North, 0.7 miles west of CR 300 West, in Staunton, Indiana (Site), which is the subject of State Cleanup Site #198804040. Investigation and closure documentation have been submitted by Aegis Environmental, Inc. (Aegis) on behalf of Marathon Petroleum Co. LP (Marathon). By submitting the investigation and closure documentation and a copy of the Independent Closure Process (ICP) Closure Form (State Form 54166) to IDEM, Marathon and Aegis have certified to IDEM that site investigation and remediation at the Site were completed in accordance with the IDEM's Remediation Closure Guide (RCG) and Remediation Program Guide (RPG) Non-Rule Policy Documents; and, have further certified that additional remedial activities are not required at this time. If all relevant information about the site has been provided to IDEM and if the documentation submitted is true, accurate and complete, then IDEM accepts the certification that additional remedial activities are not required at this time.

Because this Site was categorized by IDEM as a low priority site, as defined by 329 Indiana Administrative Code (IAC) 7.1, direct oversight of the investigation and remediation activities, including review of the documentation submitted, was not conducted by IDEM. Since no specific data or document review was conducted by IDEM this closure determination is based solely upon the certification by Marathon and Aegis that the information provided in the ICP Closure Form is true, accurate and complete. In any event, Marathon was still required to properly conduct an investigation and complete remediation pursuant to Indiana Code (IC) 13-25-4 and/or IC 13-24-1-6 and has certified that the investigation and remediation were conducted in accordance with the IDEM RCG and RPG Non-Rule Policies.

Please Reduce, Reuse, Recycle

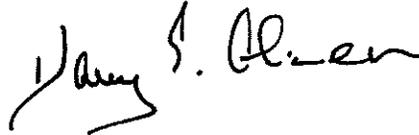

Marathon Petroleum Company, LP
Mr. Mark Ehrman

IDEM reserves the right to modify this determination if additional data or information becomes available indicating that this Site may become a risk to human health or the environment, including information of noncompliance with the ERC.

Monitoring well and/or piezometers are no longer necessary to monitor the ground water quality or ground water levels and must be permanently abandoned by a licensed Indiana water well driller in accordance with 312 Indiana Administrative Code (IAC) 13-10-2.

IDEM appreciates your cooperation concerning this remedial action. A copy of the public file for your Site will be maintained on IDEM's Virtual File Cabinet, which can be accessed online at <http://12.186.81.89/Pages/Public/Search.aspx>. If you have questions or need to notify IDEM of a change in Site conditions that indicate an increased risk to human health and/or the environment, please contact me at (317) 234-0347.

Sincerely,

A handwritten signature in black ink, appearing to read "Harry E. Atkinson". The signature is fluid and cursive, with the first name "Harry" being particularly prominent.

Harry E. Atkinson, Chief
State Cleanup Section
Office of Land Quality
