LIQUID WASTE REMOVAL, INC.
500 South Polk Street #100
Greenwood, IN 46143

CERTIFICATE OF RECYCLING

Dear Environmental Coordinator:

This letter is to inform you that we have received your shipment of Fluorescent lamps that were shipped to our Lighting Resources Recycling Center in Greenwood, Indiana, EPA #IN0000351387. The shipment was processed according to the Indiana Department of Air Management Operations Permit #F081-6374-00030.

The Fluorescent lamps have been de-manufactured and processed in accordance to all local, state and federal regulations. This information is provided to assist your company in meeting the requirements for the proper disposal of mercury contaminated lamps.

Inventory:	1 Drum of Crushed Lamps
Date Processed:	November 11, 1997
Generated By:	Arvin North American 1001 North Hurricane Franklin, IN 46131

Thank you for helping to protect our environment.

Sincerely,

Daniel P. Gillespie

Pursuant to Solid Waste Rule 329 IAC 2-21-15 (Facility responsibility for special waste disposal) and 329 IAC 2-21-16 (Generator responsibility for special waste disposal), all special waste delivered for disposal shall be accompanied by a disposa notification. As stated in each of these respective cites, the generator must provide the disposal facility with a written disposal notification for each load of special waste to be disposed of and the solid waste disposal facility operator shall check each load special waste with the information provided. The solid waste disposal facility shall also maintain the disposal notifications un such time as certification of post-closure is deemed acceptable for the site.

Pursuant to Solid Waste Rule 329 IAC 2-14-8 (Records and reports), all solid waste disposal facilites shall submit to the commissioner a quarterly report which includes the origin of the solid waste compiled by county, or by state if the waste originated outside of Indiana. The origin of the waste must be provided to the facility by the hauler and the hauler must estim by percent, the composition of a mixed load. Therefore, the county and/or the state of origin is now required information on th special waste disposal notification (see above).

The quarterly report, however, does not replace the monthly report which is required from all solid waste facilities that rece special waste. If you have any questions regarding this matter, please contact this office at 317/232-4473.

3-10-98 — Date(MM/DD/YY)

DISPOSAL SITE INFORMATION

Site Name: SOUTHSIDE LANDFILL
OPP Number: 49-1 N-243
Volume/Weight: 3-10-98 24yd

Authorized Signature
Date(MM/DD/YY)

Pursuant to Solid Waste Rule 329 IAC 10-20-29 (Facility responsibility for special waste disposal) and 329 IAC 10-8-9 (Generator responsibility for special waste disposal), all special waste delivered for disposal shall be accompanied by a disposal notification. As stated in each of the respective cites, the generator must provide the disposal facility with a written disposal notification for each load of special waste to be disposed of and the solid waste disposal facility operator shall check each load of special waste with the information provided. The solid waste disposal facility shall also maintain the disposal notifications until such time as certification of post-closure is deemed acceptable for the site.

Pursuant to Solid Waste Rule 329 IAC 10-14-1 (Records and reports), all solid waste facilities shall submit to the commissioner a quarterly report which includes the origin of the solid waste compiled by county or by state if the waste originated outside of Indiana. The origin of the waste must be provided to the facility by the hauler and the hauler must estimate, by percent, the composition of a mixed load. Therefore, the county and/or state of origin is now required information on the special waste disposal notification (see above).

The quarterly report, however, does not replace the quarterly report which is required from all solid waste facilities in accordance with Solid Waste Rule 329 IAC 10-20-29 (d), that receive special waste. If you have any questions regarding this matter, please contact this office at (317)232-3111.

NOT RESPONSIBLE FOR ANY DAMAGE TO PROPERTY WHERE DELIVERY IS MADE INSIDE CURB. (SEE REVERSE SIDE FOR TERMS & CONDITIONS)

ACCEPTED BY:

THIS SHIPPING ORDER must be legibly filled in, in Ink, in Indelible Pencil, or in Carbon, and retained by the Agent.

Shipper's No. _____

Carrier's Name: LIQUID WASTE REMOVAL, INCORPORATED

Carrier's No. _____

RECEIVED, subject to the classifications and tariffs in effect on the date of the issue of this Bill of lading,

at ARVIN NORTH AMERICAN (Date) _____ 19____ FROM 1001 NORTH HURRICANE, FRANKLIN, IN 46131

the property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as shown below, which said company (the word company being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its own railroad, water line, highway route or routes, or within the territory of its highway operations, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) in the Uniform Freight Classification in effect on the date hereof, if this is a rail or rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

Consigned TO CHEM-MET SERVICES, INCORPORATED (Mail or street address for purposes of notification only.)

Safety-Kleen ®

This form is applicable to all used oil generators except those in the States of Illinois, New Jersey, and Massachusetts.

GENERATOR USED OIL CERTIFICATION/INDEMNIFICATION

Generator Information

Date 5/15/98

Company: Owen North American

Address: 180 N. Hurricane Rd

City: Franklin State: In Zip: 46131

S-K Customer No.: 9229

S-K Oil Services Sales Rep

S-K Branch No.: 4076-72

Used Oil Certification (check appropriate box)

☐ Used oils generated at this facility originate only from automotive sources. Automotive sources include, but are not limited to, commercial service service stations, oil change stations, and truck / automobile fleet maintenance.

☑ Used oils generated at this facility may include oils from sources other than automotive including, but not limited to, industrial lubricating oils, cutting oils, or gear oils.

Hazardous Waste Certification (check appropriate box)

☐ This facility generates less than 100 kg of other hazardous wastes in a calendar month (approximately 27 gallons), and is classified as a CESQG.

☑ This facility generates between 100 kg and 1000 kg of other hazardous wastes in a calendar month (approximately 27 to 270 gallons), and is classified as a SQG.

JT ☐ This facility generates more than 1000 kg of other hazardous wastes in a calendar month (approximately 270 gallons), and is classified as a LQG.

Waste Segregation Certification (check if applicable)

☐ This facility has available on-site the equipment / services necessary to properly segregate all waste streams generated at the facility, and ensure that RCRA hazardous wastes are not mixed into the used oils.

Total Chlorine Analysis

Analysis Not Required

_____ Automotive Oil Only / CESQG

_____ Automotive Oil Only **and** segregates the oil from all hazardous wastes.

__✓__ Analysis Required
(Complete information at right)

Automotive Oil:

Chlorine: _____ ◄1000 ppm

_____ ►1000 ppm
(If ►1000 ppm, a sample **must** be sent to the Tech Center for rebuttal)

Industrial Oil:

Date of Preshipment

Approval: 1088262

Chlorine Test:
(must be performed at the time of each service to ensure the oil matches the preshipment analysis)

Generator hereby certifies that the information provided above is true and correct. Generator also certifies that the used oils supplied to Safety-Kleen or its subsidiary will not be mixed, combined, or otherwise blended in any quantity with materials containing polychlorinated biphenyls (PCBs), halogenated solvents, or any other material defined as hazardous waste under 40 CFR Part 261 or applicable State regulations. Generator agrees to indemnify and hold Safety-Kleen or its subsidiary harmless for any damages, costs, attorneys and experts fees, arising out of or in any way related to a breach of any of the above certifications by Generator.

EMPTY DRUM CERTIFICATION

RESIDUE LAST CONTAINED

I hereby certify that these drums are "empty" as that term is defined in the national *Environmental Protection Agency* regulations, 40 CFR 261.7*, and that they have been properly prepared for transportation under the regulations of the U.S. Department of Transportation, 49 CFR 173.29**

Date: 13102

Signature: [signature]

* With regard to most regulated residues, EPA's 40 CFR 261.7 says:
" A container ... is empty if:

(i) All wastes have been removed that can be removed using the practices commonly employed to remove materials from that type of container, e.g., pouring, pumping, and aspirating and

(ii) No more than 2.5 centimeters (one inch) of residue remain on the bottom of the container..."

EPA has explained this rule, saying that "one inch of waste material is an overriding constraint and may remain in an empty container only if it cannot be removed by normal means. The rationale for this provision is that there are certain tars and other extremely viscous materials that will remain in the container even after the container is emptied by normal means."

For residues of products specifically listed by name in 40 CFR 261.33 (e), EPA says the container is empty only "if the container ... has been triple-rinsed using a solvent capable of removing" the product, or has been cleaned by another method shown to achieve equivalent removal.

** DOT's 49 CFR 173.29 says that all openings on the empty container must be closed, and that all markings and labels must be in place as if the drum were full of its original contents. A DOT shipping paper is not required for transportation of a drum for reconditioning via contract or private motor carrier. DOT placarding is not required for vehicles carrying empty containers.

* With regard to most regulated residues, EPA's 40 CFR 261.7 says:
" A container ... is empty if:

(i) All wastes have been removed that can be removed using the practices commonly employed to remove materials from that type of container, e.g., pouring, pumping, and aspirating and

(ii) No more than 2.5 centimeters (one inch) of residue remain on the bottom of the container..."

EPA has explained this rule, saying that "one inch of waste material is an overriding constraint and may remain in an empty container only if it cannot be removed by normal means. The rationale for this provision is that there are certain tars and other extremely viscous materials that will remain in the container even after the container is emptied by normal means."

For residues of products specifically listed by name in 40 CFR 261.33 (e), EPA says the container is empty only "if the container ... has been triple-rinsed using a solvent capable of removing" the product, or has been cleaned by another method shown to achieve equivalent removal.

** DOT's 49 CFR 173.29 says that all openings on the empty container must be closed, and that all markings and labels must be in place as if the drum were full of its original contents. A DOT shipping paper is not required for transportation of a drum for reconditioning via contract or private motor carrier. DOT placarding is not required for vehicles carrying empty containers.

• DID THE DRUMS LAST CONTAIN ACCEPTABLE MATERIALS, BASED ON INITAL DRUM QUALIFICATIONS?	✓	

EMPTY DRUM CERTIFICATION

RESIDUE LAST CONTAINED

I hereby certify that these drums are "empty" as that term is defined in the national *Environmental Protection Agency* regulations, 40 CFR 261.7*, and that they have been properly prepared for transportation under the regulations of the U.S. Department of Transportation, 49 CFR 173.29**

Date: 9-17-01

Signature: [signature]

* With regard to most regulated residues, EPA's 40 CFR 261.7 says:
" A container ... is empty if:

(i) All wastes have been removed that can be removed using the practices commonly employed to remove materials from that type of container, e.g., pouring, pumping, and aspirating and

(ii) No more than 2.5 centimeters (one inch) of residue remain on the bottom of the container..."

EPA has explained this rule, saying that "one inch of waste material is an overriding constraint and may remain in an empty container only if it cannot be removed by normal means. The rationale for this provision is that there are certain tars and other extremely viscous materials that will remain in the container even after the container is emptied by normal means."

For residues of products specifically listed by name in 40 CFR 261.33 (e), EPA says the container is empty only "if the container ... has been triple-rinsed using a solvent capable of removing" the product, or has been cleaned by another method shown to achieve equivalent removal.

** DOT's 49 CFR 173.29 says that all openings on the empty container must be closed, and that all markings and labels must be in place as if the drum were full of its original contents. A DOT shipping paper is not required for transportation of a drum for reconditioning via contract or private motor carrier. DOT placarding is not required for vehicles carrying empty containers.

EMPTY DRUM CERTIFICATION

Residue Last Contained
Soap & Lubes

I hereby certify that these drums are "empty" as that term is defined in the national *Environmental Protection Agency* regulations, 40 CFR 261.7*, and that they have been properly prepared for transportation under the regulations of the U.S. Department of Transportation, 49 CFR 173.29**

Date: 8301

Signature: [signature]

* With regard to most regulated residues, EPA's 40 CFR 261.7 says:
" A container ... is empty if:

(i) All wastes have been removed that can be removed using the practices commonly employed to remove materials from that type of container, e.g., pouring, pumping, and aspirating and

(ii) No more than 2.5 centimeters (one inch) of residue remain on the bottom of the container..."

EPA has explained this rule, saying that "one inch of waste material is an overriding constraint and may remain in an empty container only if it cannot be removed by normal means. The rationale for this provision is that there are certain tars and other extremely viscous materials that will remain in the container even after the container is emptied by normal means."

For residues of products specifically listed by name in 40 CFR 261.33 (e), EPA says the container is empty only "if the container ... has been triple-rinsed using a solvent capable of removing" the product, or has been cleaned by another method shown to achieve equivalent removal.

** DOT's 49 CFR 173.29 says that all openings on the empty container must be closed, and that all markings and labels must be in place as if the drum were full of its original contents. A DOT shipping paper is not required for transportation of a drum for reconditioning via contract or private motor carrier. DOT placarding is not required for vehicles carrying empty containers.

RCRA EMPTY DRUM CHECK LIST

Residue last Contained

INSTRUCTIONS

THE SK REPRESENTATIVE MUST COMPLETE THE CHECK LIST FOR EACH RCRA EMPTY DRUM PICK UP. DRUMS DO NOT QUALIFY FOR THIS PROGRAM IF ANY RESPONSE IS NO.

THE COMPLETED FORM MUST BE FILED WITH EACH CORRESPONDING MANUAL SERVICE DOCUMENT.

*If the shipment moves between two ports by a carrier by water, the law requires that the bill of lading shall state whether it is "carrier's or shipper's weight."
Signature

Subject to Section 7 of the conditions, if this shipment is to be delivered to the consignee without recourse on the consignor, the consignor shall sign the following statement
The carrier shall not make delivery of this shipment without payment of freight and all other lawful charges
(Signature of Consignor)

RECEIVED, subject to the classifications and tariffs in effect on the date of the issue of this Bill of Lading, the property described above in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated above which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed as to each carrier of all or any of said property over all or any portion of said route to destination and as to each party at any time interested in all or any said property, that every service to be performed hereunder shall be subject to all the bill of lading terms and conditions in the governing classification on the date of shipment.
Shipper hereby certifies that he is familiar with all the bill of lading terms and conditions in the governing classification and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

CERTIFICATION

This is to certify that the above-named materials are properly classified, described, packaged, marked and labeled, and are in proper condition for transportation according to the applicable regulations of the Department of Transportation and the U.S. Environmental Protection Agency
