Compliance Branch
Office of Water Quality

In response to **Inspection Summary/ Noncompliance letter**
Material Handling Exchange, Inc.
NPDES Permit No. INP000627
Franklin, Johnson County

Dear Ms. Murphy,

We are writing to inform your good office that as of today, 1/10/19, we have mailed the application forms for our 2 most active operators Chris Miller and Sam Ramsey who are working hands-on our wash plant that deals with waste water.

Our goal is to have 2 licensed operators in our facility by the end of March 2019 that can work hand in hand and to finally cut the service provided by a third party company that works remotely for us.

While we are working on achieving this goal, we have reached out with our current licensed operator, Larry Reynolds, who oversees waste water operations and its maintenance remotely to have regular monthly visits in our facility in compliance to 327 IAC 5-22-3(11).

Sincerely,

Will Mains, Operations Manager
