SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: CSX Transportation **Job No:** FA52590

Site: AGMININD: 9415829/ENV53216, Former Indiana Creosote Co, **Report Date:** 3/29/2018 12:47:23

3 Sample(s) were collected on 03/16/2018 and were received at SGS North America Inc - Orlando on 03/19/2018 properly preserved, at 4 Deg. C and intact. These Samples received an SGS Orlando job number of FA52590. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

MS Volatiles By Method SW846 8260B

Matrix: AQ **Batch ID:** VM4394

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52508-3MS, FA52508-3MSD were used as the QC samples indicated.

Matrix Spike Recovery(s) for Ethylbenzene, Toluene, Xylene (total) are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

Matrix Spike Duplicate Recovery(s) for Ethylbenzene, Xylene (total) are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

FA52590-1: Sample was not preserved to a pH < 2.

FA52590-3: Dilution required due to matrix interference (non-target compounds above calibration range).

MS Semi-volatiles By Method SW846 8270D

Matrix: AQ **Batch ID:** OP69283

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52588-1MS, FA52588-1MSD were used as the QC samples indicated.

Blank Spike Recovery(s) for Phenol are outside control limits.

Matrix Spike Duplicate Recovery(s) for Phenol are outside control limits. Probable cause is due to matrix interference.

RPD(s) for MSD for Phenol are outside control limits for sample OP69283-MSD. Probable cause is due to sample non-homogeneity.

Sample(s) OP69283-MSD have surrogates outside control limits. Probable cause is due to matrix interference.

FA52590-1, 2 for Phenol: Associated BS was outside of control limits.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69284

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52588-1MS, FA52588-1MSD were used as the QC samples indicated.

Sample(s) OP69284-BS, OP69284-MS, OP69284-MSD have surrogates outside control limits.

OP69284-MB for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

OP69284-MB for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69284-MB for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

OP69284-MB for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69284-BS for Nitrobenzene-d5: Outside control limits.

OP69284-BS for 2-Fluorobiphenyl: Outside control limits.

FA52590-1 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52590-1 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52590-1 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52590-1 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69284

FA52590-2 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52590-2 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52590-2 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52590-3 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52590-3 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52590-3 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52590-3 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

Metals Analysis By Method SW846 6010C

Matrix: AQ **Batch ID:** MP33492

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52548-4DUP, FA52548-4MS, FA52548-4MSD, FA52548-4PS, FA52548-4SDL were used as the QC samples for metals.

RPD(s) for Duplicate for Lead are outside control limits for sample MP33492-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Lead are outside control limits for sample MP33492-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

Matrix: AQ **Batch ID:** MP33499

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52531-5DUP, FA52531-5MS, FA52531-5MSD, FA52531-5PS, FA52531-5SDL were used as the QC samples for metals.

RPD(s) for Duplicate for Arsenic are outside control limits for sample MP33499-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Arsenic are outside control limits for sample MP33499-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

SGS Orlando certifies that this report meets the project requirements for analytical data produced for the samples as received at SGS Orlando and as stated on the COC. SGS Orlando certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the SGS Orlando Quality Manual except as noted above. This report is to be used in its entirety. SGS Orlando is not responsible for any assumptions of data quality if partial data packages are used.

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: CSX Transportation **Job No:** FA52592

Site: AGMININD: 9415829/ENV53216, Former Indiana Creosote Co, **Report Date:** 3/30/2018 9:43:25

3 Sample(s) were collected on 03/16/2018 and were received at SGS North America Inc - Orlando on 03/19/2018 properly preserved, at 4 Deg. C and intact. These Samples received an SGS Orlando job number of FA52592. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

MS Volatiles By Method SW846 8260B

Matrix: AQ **Batch ID:** VO1949

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52609-2MS, FA52609-2MSD were used as the QC samples indicated.

Matrix Spike/Matrix Spike Duplicate Recovery(s) for Ethylbenzene are outside control limits. Outside control limits due to high level in sample relative to spike amount.

Matrix: AQ **Batch ID:** VO1950

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52689-5MS, FA52689-5MSD were used as the QC samples indicated.

MS Semi-volatiles By Method SW846 8270D

Matrix: AQ **Batch ID:** OP69283

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52588-1MS, FA52588-1MSD were used as the QC samples indicated.

Blank Spike Recovery(s) for Phenol are outside control limits.

Matrix Spike Duplicate Recovery(s) for Phenol are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

RPD(s) for MSD for Phenol are outside control limits for sample OP69283-MSD. Probable cause is due to sample non-homogeneity.

Sample(s) OP69283-MSD have surrogates outside control limits. Probable cause is due to matrix interference.

FA52592-1, 2, 3 for Phenol: Associated Blank Spike outside control limits.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69284

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52588-1MS, FA52588-1MSD were used as the QC samples indicated.

Sample(s) OP69284-BS, OP69284-MS, OP69284-MSD have surrogates outside control limits.

OP69284-MB for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

OP69284-MB for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

OP69284-MB for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69284-MB for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69284-BS for 2-Fluorobiphenyl: Outside control limits.

OP69284-BS for Nitrobenzene-d5: Outside control limits.

FA52592-1 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52592-1 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52592-1 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52592-1 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69284

FA52592-2 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52592-2 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52592-2 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52592-2 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52592-3 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52592-3 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52592-3 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52592-3 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

Metals Analysis By Method SW846 6010C

Matrix: AQ **Batch ID:** MP33492

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52548-4DUP, FA52548-4MS, FA52548-4MSD, FA52548-4PS, FA52548-4SDL were used as the QC samples for metals.

RPD(s) for Duplicate for Lead are outside control limits for sample MP33492-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Lead are outside control limits for sample MP33492-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

Matrix: AQ **Batch ID:** MP33499

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52531-5DUP, FA52531-5MS, FA52531-5MSD, FA52531-5PS, FA52531-5SDL were used as the QC samples for metals.

RPD(s) for Duplicate for Arsenic are outside control limits for sample MP33499-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Arsenic are outside control limits for sample MP33499-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

Matrix: AQ **Batch ID:** MP33501

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52588-1FDUP, FA52588-1FMS, FA52588-1FMSD, FA52588-1FPS, FA52588-1FSDL were used as the QC samples for metals.

RPD(s) for Duplicate for Lead are outside control limits for sample MP33501-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Lead are outside control limits for sample MP33501-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

SGS Orlando certifies that this report meets the project requirements for analytical data produced for the samples as received at SGS Orlando and as stated on the COC. SGS Orlando certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the SGS Orlando Quality Manual except as noted above. This report is to be used in its entirety. SGS Orlando is not responsible for any assumptions of data quality if partial data packages are used.

Client: CSX Transportation **Job No:** FA52594

Site: AGMININD: 9415829/ENV53216, Former Indiana Creosote Co, **Report Date:** 3/30/2018 1:08:24

3 Sample(s) were collected on 03/16/2018 and were received at SGS North America Inc - Orlando on 03/19/2018 properly preserved, at 3.8 Deg. C and intact. These Samples received an SGS Orlando job number of FA52594. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

MS Volatiles By Method SW846 8260B

Matrix: AQ **Batch ID:** VO1949

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52609-2MS, FA52609-2MSD were used as the QC samples indicated.

Matrix Spike Recovery(s) for Ethylbenzene are outside control limits. Outside control limits due to high level in sample relative to spike amount.

Matrix Spike Duplicate Recovery(s) for Ethylbenzene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

MS Semi-volatiles By Method SW846 8270D

Matrix: AQ **Batch ID:** OP69283

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52588-1MS, FA52588-1MSD were used as the QC samples indicated.

Blank Spike Recovery(s) for Phenol are outside control limits.

Matrix Spike Duplicate Recovery(s) for Phenol are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

RPD(s) for MSD for Phenol are outside control limits for sample OP69283-MSD. Probable cause is due to sample non-homogeneity.

Sample(s) OP69283-MSD have surrogates outside control limits. Probable cause is due to matrix interference.

FA52594-2 for Phenol: Associated BS recovery outside control limits.

FA52594-1 for Phenol: Associated BS recovery outside control limits.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69284

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

Sample(s) FA52588-1MS, FA52588-1MSD were used as the QC samples indicated.

All method blanks for this batch meet method specific criteria.

Sample(s) OP69284-BS, OP69284-MS, OP69284-MSD have surrogates outside control limits. Probable cause is due to matrix interference.

FA52594-1 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69284-MB for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

OP69284-MB for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

OP69284-MB for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69284-MB for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69284-BS for Nitrobenzene-d5: Outside control limits.

FA52594-1 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52594-2 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

OP69284-BS for 2-Fluorobiphenyl: Outside control limits.

FA52594-1 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52594-2 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52594-2 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52594-2 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52594-1 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

Metals Analysis By Method SW846 6010C

Matrix: AQ **Batch ID:** MP33492

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52548-4DUP, FA52548-4MS, FA52548-4MSD, FA52548-4PS, FA52548-4SDL, FA52548-4DUP were used as the QC samples for metals.

RPD(s) for Duplicate for Lead are outside control limits for sample MP33492-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Lead are outside control limits for sample MP33492-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

Matrix: AQ **Batch ID:** MP33501

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52588-1FDUP, FA52588-1FMS, FA52588-1FMSD, FA52588-1FPS, FA52588-1FSDL, FA52588-1FDUP were used as the QC samples for metals.

RPD(s) for Duplicate for Lead are outside control limits for sample MP33501-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Lead are outside control limits for sample MP33501-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

FA52594-2 for Lead: Sample dilution required due to difficult matrix.

FA52594-2 for Arsenic: Sample dilution required due to difficult matrix.

SGS Orlando certifies that this report meets the project requirements for analytical data produced for the samples as received at SGS Orlando and as stated on the COC. SGS Orlando certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the SGS Orlando Quality Manual except as noted above. This report is to be used in its entirety. SGS Orlando is not responsible for any assumptions of data quality if partial data packages are used.

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: CSX Transportation **Job No:** FA52595

Site: AGMININD: 9415829/ENV53216, Former Indiana Creosote Co, Bloomington, IN **Report Date:** 4/3/2018 10:22:45

3 Sample(s) were collected on 03/16/2018 and were received at SGS North America Inc - Orlando on 03/19/2018 properly preserved, at 4.2 Deg. C and intact. These Samples received an SGS Orlando job number of FA52595. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

MS Volatiles By Method SW846 8260B

Matrix: AQ **Batch ID:** VN4986

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52473-7MS, FA52473-7MSD were used as the QC samples indicated.

FA52595-2: Sample was treated with an anti-foaming agent.

MS Semi-volatiles By Method SW846 8270D

Matrix: AQ **Batch ID:** OP69283

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52588-1MS, FA52588-1MSD were used as the QC samples indicated.

Blank Spike Recovery(s) for Phenol are outside control limits.

Matrix Spike Duplicate Recovery(s) for Phenol are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

RPD(s) for MSD for Phenol are outside control limits for sample OP69283-MSD. Probable cause is due to sample non-homogeneity.

Sample(s) FA52595-2, OP69283-MSD have surrogates outside control limits.

FA52595-1 for Phenol: Associated BS recovery outside control limits.

FA52595-2: Elevated reporting limit due to matrix interference, dilution required during sample prep.

FA52595-2 for Phenol: Associated BS recovery outside control limits.

FA52595-2 for Terphenyl-d14: Outside control limits due to matrix interference.

FA52595-3 for Phenol: Associated BS recovery outside control limits.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69284

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52588-1MS, FA52588-1MSD were used as the QC samples indicated.

Sample(s) FA52595-2, OP69284-BS, OP69284-MS, OP69284-MSD have surrogates outside control limits.

OP69284-MB for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69284-MB for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

OP69284-MB for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69284-MB for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

OP69284-BS for Nitrobenzene-d5: Outside control limits.

OP69284-BS for 2-Fluorobiphenyl: Outside control limits.

FA52595-1 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52595-1 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52595-1 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52595-1 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52595-2: Confirmed ND by re-extraction and reanalysis.

FA52595-2 for Terphenyl-d14: Outside control limits.

FA52595-2 for 2,4,6-Tribromophenol: Outside control limits.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69284

FA52595-3 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52595-3 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52595-3 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52595-3 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

Matrix: AQ **Batch ID:** OP69415

FA52595-2: Confirmation run.

Metals Analysis By Method SW846 6010C

Matrix: AQ **Batch ID:** MP33492

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52548-4DUP, FA52548-4MS, FA52548-4MSD, FA52548-4PS, FA52548-4SDL were used as the QC samples for metals.

RPD(s) for Duplicate for Lead are outside control limits for sample MP33492-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Lead are outside control limits for sample MP33492-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

Matrix: AQ **Batch ID:** MP33501

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52588-1FDUP, FA52588-1FMS, FA52588-1FMSD, FA52588-1FPS, FA52588-1FSDLwere used as the QC samples for metals.

RPD(s) for Duplicate for Lead are outside control limits for sample MP33501-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Lead are outside control limits for sample MP33501-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

SGS Orlando certifies that this report meets the project requirements for analytical data produced for the samples as received at SGS Orlando and as stated on the COC. SGS Orlando certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the SGS Orlando Quality Manual except as noted above. This report is to be used in its entirety. SGS Orlando is not responsible for any assumptions of data quality if partial data packages are used.

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: CSX Transportation **Job No:** FA52596

Site: AGMININD: 9415829/ENV53216, Former Indiana Creosote Co, **Report Date:** 3/30/2018 10:43:26

1 Sample(s) were collected on 03/16/2018 and were received at SGS North America Inc - Orlando on 03/19/2018 properly preserved, at 3.6 Deg. C and intact. These Samples received an SGS Orlando job number of FA52596. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

MS Volatiles By Method SW846 8260B

Matrix: AQ **Batch ID:** VO1947

All samples were analyzed within the recommended method holding time.
All method blanks for this batch meet method specific criteria.
Sample(s) FA52596-1MS, FA52596-1MSD were used as the QC samples indicated.

MS Semi-volatiles By Method SW846 8270D

Matrix: AQ **Batch ID:** OP69301

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52596-1MS, FA52596-1MSD were used as the QC samples indicated.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69302

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52596-1MS, FA52596-1MSD were used as the QC samples indicated.

Sample(s) OP69302-MS have surrogates outside control limits.

OP69302-MB for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.
OP69302-MB for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.
OP69302-MB for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.
OP69302-MB for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52596-1 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52596-1 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52596-1 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52596-1 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

Metals Analysis By Method SW846 6010C

Matrix: AQ **Batch ID:** MP33503

All samples were digested within the recommended method holding time.
All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52596-1FDUP, FA52596-1FMS, FA52596-1FMSD, FA52596-1FPS, FA52596-1FSDL were used as the QC samples for metals.

Matrix: AQ **Batch ID:** MP33514

All samples were digested within the recommended method holding time.
All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52596-1DUP, FA52596-1MS, FA52596-1MSD, FA52596-1PS, FA52596-1SDL, FA52596-1DUP were used as the QC samples for metals.

RPD(s) for Duplicate for Lead are outside control limits for sample MP33514-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Lead are outside control limits for sample MP33514-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

SGS Orlando certifies that this report meets the project requirements for analytical data produced for the samples as received at SGS Orlando and as stated on the COC. SGS Orlando certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the SGS Orlando Quality Manual except as noted above. This report is to be used in its entirety. SGS Orlando is not responsible for any assumptions of data quality if partial data packages are used.

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: CSX Transportation **Job No:** FA52712

Site: AGMININD: 9415829/ENV53216, Former Indiana Creosote Co, Bloomington, IN **Report Date:** 4/3/2018 1:28:48 PM

3 Sample(s)were collected on 03/22/2018 and were received at SGS North America Inc - Orlando on 03/23/2018 properly preserved, at 3.9 Deg. C and intact. These Samples received an SGS Orlando job number of FA52712. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

MS Volatiles By Method SW846 8260B

Matrix: AQ **Batch ID:** VN4988

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52794-2MS, FA52794-2MSD were used as the QC samples indicated.

FA52712-1 for Xylene (total): Associated CCV outside of control limits high, sample was ND.

FA52712-2 for Xylene (total): Associated CCV outside of control limits high, sample was ND.

FA52712-3 for Xylene (total): Associated CCV outside of control limits high, sample was ND.

MS Semi-volatiles By Method SW846 8270D

Matrix: AQ **Batch ID:** OP69369

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52712-2MS, FA52712-2MSD were used as the QC samples indicated.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69370

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52807-2MS, FA52807-2MSD were used as the QC samples indicated.

Matrix Spike Recovery(s) for 2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Anthracene, Fluorene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

Matrix Spike Duplicate Recovery(s) for Acenaphthylene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

OP69370-MB for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69370-MB for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

OP69370-MB for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69370-MB for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52712-1 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52712-1 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52712-1 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52712-1 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52712-2 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52712-2 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52712-2 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52712-2 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

Metals Analysis By Method SW846 6010C

Matrix: AQ **Batch ID:** MP33515

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52681-1DUP, FA52681-1MS, FA52681-1MSD, FA52681-1PS, FA52681-1SDL were used as the QC samples for metals.

SGS Orlando certifies that this report meets the project requirements for analytical data produced for the samples as received at SGS Orlando and as stated on the COC. SGS Orlando certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the SGS Orlando Quality Manual except as noted above. This report is to be used in its entirety. SGS Orlando is not responsible for any assumptions of data quality if partial data packages are used.

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: CSX Transportation **Job No:** FA52713

Site: AGMININD: 9415829/ENV53216, Former Indiana Creosote Co, **Report Date:** 4/4/2018 10:12:19

3 Sample(s) were collected on 03/22/2018 and were received at SGS North America Inc - Orlando on 03/23/2018 properly preserved, at 3.6 Deg. C and intact. These Samples received an SGS Orlando job number of FA52713. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

MS Volatiles By Method SW846 8260B

Matrix: AQ **Batch ID:** VJ5855

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52845-2MS, FA52845-2MSD were used as the QC samples indicated.

Matrix Spike Recovery(s) for Benzene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

MS Semi-volatiles By Method SW846 8270D

Matrix: AQ **Batch ID:** OP69369

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52712-2MS, FA52712-2MSD were used as the QC samples indicated.

Sample(s) FA52713-2, FA52713-3 have surrogates outside control limits.

FA52713-2 for Phenol-d5: Outside control limits.

FA52713-2: Confirmed ND by re-extraction and reanalysis.

FA52713-3: Confirmed ND by re-extraction and reanalysis.

FA52713-3 for Phenol-d5: Outside control limits.

Matrix: AQ **Batch ID:** OP69414

FA52713-2: Confirmation run for surrogate recoveries.

FA52713-3: Confirmation run for surrogate recoveries.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69370

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52807-2MS, FA52807-2MSD were used as the QC samples indicated.

Matrix Spike Recovery(s) for 2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Anthracene, Fluorene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

Matrix Spike Duplicate Recovery(s) for Acenaphthylene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

OP69370-MB for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69370-MB for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69370-MB for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

OP69370-MB for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52713-1 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52713-1 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52713-1 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52713-1 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69370

FA52713-2 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52713-2 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52713-2 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52713-2 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52713-3 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52713-3 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52713-3 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52713-3 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

Metals Analysis By Method SW846 6010C

Matrix: AQ **Batch ID:** MP33515

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52681-1DUP, FA52681-1MS, FA52681-1MSD, FA52681-1PS, FA52681-1SDL were used as the QC samples for metals.

SGS Orlando certifies that this report meets the project requirements for analytical data produced for the samples as received at SGS Orlando and as stated on the COC. SGS Orlando certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the SGS Orlando Quality Manual except as noted above. This report is to be used in its entirety. SGS Orlando is not responsible for any assumptions of data quality if partial data packages are used.

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: CSX Transportation **Job No:** FA52806

Site: AGMININD: 9415829/ENV53216, Former Indiana Creosote Co, **Report Date:** 4/9/2018 2:44:40 PM

3 Sample(s) were collected on 03/26/2018 and were received at SGS North America Inc - Orlando on 03/27/2018 properly preserved, at 3.6 Deg. C and intact. These Samples received an SGS Orlando job number of FA52806. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

MS Volatiles By Method SW846 8260B

Matrix: AQ **Batch ID:** V5E282

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52914-12MS, FA52914-12MSD were used as the QC samples indicated.

MS Semi-volatiles By Method SW846 8270D

Matrix: AQ **Batch ID:** OP69369

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52712-2MS, FA52712-2MSD were used as the QC samples indicated.

Sample(s) FA52806-2 have surrogates outside control limits.

FA52806-2: Confirmation run for surrogate recoveries.

FA52806-2 for Phenol-d5: Outside control limits due to matrix interference. Confirmed by reanalysis. Insufficient sample for re-extraction.

Matrix: AQ **Batch ID:** OP69414

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52829-1MS, FA52829-1MSD were used as the QC samples indicated.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69370

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52807-2MS, FA52807-2MSD were used as the QC samples indicated.

Matrix Spike Recovery(s) for 2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Anthracene, Fluorene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

Matrix Spike Duplicate Recovery(s) for Acenaphthylene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

OP69370-MB for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

OP69370-MB for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

OP69370-MB for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69370-MB for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52806-3 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52806-3 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52806-3 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52806-2 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52806-2 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52806-2 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52806-2 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52806-3 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69415

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52912-1MS, FA52912-1MSD were used as the QC samples indicated.

Matrix Spike Duplicate Recovery(s) for Benzo(b)fluoranthene, Chrysene, Pyrene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

Sample(s) OP69415-MSD have surrogates outside control limits.

OP69415-MB for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69415-MB for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69415-MB for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

OP69415-MB for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52806-1 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52806-1 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52806-1 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52806-1 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

Metals Analysis By Method SW846 6010C

Matrix: AQ **Batch ID:** MP33555

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52778-11DUP, FA52778-11MS, FA52778-11MSD, FA52778-11PS, FA52778-11SDL were used as the QC samples for metals.

RPD(s) for Duplicate for Arsenic are outside control limits for sample MP33555-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Arsenic, Lead are outside control limits for sample MP33555-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

SGS Orlando certifies that this report meets the project requirements for analytical data produced for the samples as received at SGS Orlando and as stated on the COC. SGS Orlando certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the SGS Orlando Quality Manual except as noted above. This report is to be used in its entirety. SGS Orlando is not responsible for any assumptions of data quality if partial data packages are used.

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: CSX Transportation **Job No:** FA52807

Site: AGMININD: 9415829/ENV53216, Former Indiana Creosote Co, **Report Date:** 4/6/2018 1:14:47 PM

3 Sample(s) were collected on 03/26/2018 and were received at SGS North America Inc - Orlando on 03/27/2018 properly preserved, at 3.4 Deg. C and intact. These Samples received an SGS Orlando job number of FA52807. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

MS Volatiles By Method SW846 8260B

Matrix: AQ **Batch ID:** V5E282

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52914-12MS, FA52914-12MSD were used as the QC samples indicated.

MS Semi-volatiles By Method SW846 8270D

Matrix: AQ **Batch ID:** OP69369

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52712-2MS, FA52712-2MSD were used as the QC samples indicated.

Sample(s) FA52807-2 have surrogates outside control limits.

FA52807-2: Confirmation run for surrogate recoveries.

FA52807-2 for Phenol-d5: Outside control limits due to matrix interference. Confirmed by reanalysis. Insufficient sample for re-extraction.

Matrix: AQ **Batch ID:** OP69414

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52829-1MS, FA52829-1MSD were used as the QC samples indicated.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69370

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52807-2MS, FA52807-2MSD were used as the QC samples indicated.

Matrix Spike Recovery(s) for 2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Anthracene, Fluorene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

Matrix Spike Duplicate Recovery(s) for Acenaphthylene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

OP69370-MB for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69370-MB for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69370-MB for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

OP69370-MB for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52807-1 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52807-1 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52807-1 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52807-1 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52807-2 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52807-2 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52807-2 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69370

FA52807-3 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52807-3 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52807-2 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52807-3 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52807-3 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52807-3 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52807-3 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52807-3 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52807-3 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

Metals Analysis By Method SW846 6010C

Matrix: AQ **Batch ID:** MP33555

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52778-11DUP, FA52778-11MS, FA52778-11MSD, FA52778-11PS, FA52778-11SDLwere used as the QC samples for metals.

RPD(s) for Duplicate for Arsenic are outside control limits for sample MP33555-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Arsenic, Lead are outside control limits for sample MP33555-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

SGS Orlando certifies that this report meets the project requirements for analytical data produced for the samples as received at SGS Orlando and as stated on the COC. SGS Orlando certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the SGS Orlando Quality Manual except as noted above. This report is to be used in its entirety. SGS Orlando is not responsible for any assumptions of data quality if partial data packages are used.

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: CSX Transportation **Job No:** FA52829

Site: AGMININD: 9415829/ENV53216, Former Indiana Creosote Co, Bloomington, IN **Report Date:** 4/9/2018 1:20:52 PM

1 Sample(s) were collected on 03/26/2018 and were received at SGS North America Inc - Orlando on 03/27/2018 properly preserved, at 3.4 Deg. C and intact. These Samples received an SGS Orlando job number of FA52829. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

MS Volatiles By Method SW846 8260B

Matrix: AQ **Batch ID:** VO1961

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52851-11MS, FA52851-11MSD were used as the QC samples indicated.

MS Semi-volatiles By Method SW846 8270D

Matrix: AQ **Batch ID:** OP69414

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52829-1MS, FA52829-1MSD were used as the QC samples indicated.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69415

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52912-1MS, FA52912-1MSD were used as the QC samples indicated.

Matrix Spike Duplicate Recovery(s) for Benzo(b)fluoranthene, Chrysene, Pyrene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

Sample(s) OP69415-MSD have surrogates outside control limits.

FA52829-1 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69415-MB for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

OP69415-MB for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69415-MB for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69415-MB for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52829-1 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52829-1 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52829-1 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

Metals Analysis By Method SW846 6010C

Matrix: AQ **Batch ID:** MP33562

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52810-1DUP, FA52810-1MS, FA52810-1MSD, FA52810-1SDL were used as the QC samples for metals.

SGS Orlando certifies that this report meets the project requirements for analytical data produced for the samples as received at SGS Orlando and as stated on the COC. SGS Orlando certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the SGS Orlando Quality Manual except as noted above. This report is to be used in its entirety. SGS Orlando is not responsible for any assumptions of data quality if partial data packages are used.

SGS Sample Receipt Summary

Job Number: FA52829 **Client:** ARCADIS **Project:** IN CREOSOTE

Date / Time Received: 3/27/2018 9:30:00 AM **Delivery Method:** FED EX **Airbill #'s:** 1002239563910003281100813015085714

Therm ID: IR 1; **Therm CF:** 0.4; **# of Coolers:** 1

Cooler Temps (Raw Measured) °C: Cooler 1: (3.0);

Cooler Temps (Corrected) °C: Cooler 1: (3.4);

Cooler Information	Y	or	N
1. Custody Seals Present	☑		☐
2. Custody Seals Intact	☑		☐
3. Temp criteria achieved	☑		☐
4. Cooler temp verification	IR Gun		
5. Cooler media	Ice (Bag)		

Trip Blank Information	Y	or	N	N/A
1. Trip Blank present / cooler	☐		☑	☐
2. Trip Blank listed on COC	☐		☑	☐

	W	or	S	N/A
3. Type Of TB Received	☐		☐	☑

Sample Information	Y	or	N	N/A
1. Sample labels present on bottles	☑		☐	
2. Samples preserved properly	☑		☐	
3. Sufficient volume/containers recvd for analysis:	☑		☐	
4. Condition of sample	Intact			
5. Sample recvd within HT	☑		☐	
6. Dates/Times/IDs on COC match Sample Label	☑		☐	
7. VOCs have headspace	☐		☑	☐
8. Bottles received for unspecified tests	☐		☑	
9. Compositing instructions clear	☐		☐	☑
10. Voa Soil Kits/Jars received past 48hrs?	☐		☐	☑
11. % Solids Jar received?	☐		☐	☑
12. Residual Chlorine Present?	☐		☐	☑

Misc. Information

Number of Encores: 25-Gram _____ 5-Gram _____ Number of 5035 Field Kits: _____ Number of Lab Filtered Metals: _____

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: CSX Transportation **Job No:** FA52911

Site: AGMININD: 9415829/ENV53216, Former Indiana Creosote Co, **Report Date:** 4/10/2018 1:10:16

2 Sample(s) were collected on 03/28/2018 and were received at SGS North America Inc - Orlando on 03/29/2018 properly preserved, at 2.6 Deg. C and intact. These Samples received an SGS Orlando job number of FA52911. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

MS Volatiles By Method SW846 8260B

Matrix: AQ **Batch ID:** V5E283

All samples were analyzed within the recommended method holding time.
All method blanks for this batch meet method specific criteria.

Sample(s) FA52947-1MS, FA52947-1MSD were used as the QC samples indicated.

MS Semi-volatiles By Method SW846 8270D

Matrix: AQ **Batch ID:** OP69414

All samples were extracted within the recommended method holding time.
All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52829-1MS, FA52829-1MSD were used as the QC samples indicated.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69415

All samples were extracted within the recommended method holding time.
All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52912-1MS, FA52912-1MSD were used as the QC samples indicated.

Matrix Spike Duplicate Recovery(s) for Benzo(b)fluoranthene, Chrysene, Pyrene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

Sample(s) FA52911-1, OP69415-MSD have surrogates outside control limits.

OP69415-MB for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

OP69415-MB for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

OP69415-MB for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69415-MB for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52911-1 for Terphenyl-d14: Outside control limits due to dilution.

FA52911-1 for Nitrobenzene-d5: Outside control limits due to dilution.

FA52911-1: Dilution required due to matrix interference.

FA52911-1: Dilution required due to matrix interference.

FA52911-1 for Terphenyl-d14: Outside control limits due to dilution.

FA52911-1 for Nitrobenzene-d5: Outside control limits due to dilution.

FA52911-1 for 2,4,6-Tribromophenol: Outside control limits due to dilution.

FA52911-1 for 2-Fluorobiphenyl: Outside control limits due to dilution.

FA52911-1 for 2,4,6-Tribromophenol: Outside control limits due to dilution.

FA52911-1 for 2-Fluorobiphenyl: Outside control limits due to dilution.

FA52911-2 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52911-2: Dilution required due to matrix interference.

FA52911-2 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52911-2 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52911-2 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

Metals Analysis By Method SW846 6010C

Matrix: AQ **Batch ID:** MP33564

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52886-1DUP, FA52886-1MS, FA52886-1MSD, FA52886-1PS, FA52886-1SDL were used as the QC samples for metals.

RPD(s) for Duplicate for Lead are outside control limits for sample MP33564-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Arsenic, Lead are outside control limits for sample MP33564-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

SGS Orlando certifies that this report meets the project requirements for analytical data produced for the samples as received at SGS Orlando and as stated on the COC. SGS Orlando certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the SGS Orlando Quality Manual except as noted above. This report is to be used in its entirety. SGS Orlando is not responsible for any assumptions of data quality if partial data packages are used.

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: CSX Transportation **Job No:** FA52912

Site: AGMININD: 9415829/ENV53216, Former Indiana Creosote Co, **Report Date:** 4/9/2018 2:43:02 PM

3 Sample(s) were collected on 03/28/2018 and were received at SGS North America Inc - Orlando on 03/29/2018 properly preserved, at 5 Deg. C and intact. These Samples received an SGS Orlando job number of FA52912. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

MS Volatiles By Method SW846 8260B

Matrix: AQ **Batch ID:** V5E283

All samples were analyzed within the recommended method holding time.
All method blanks for this batch meet method specific criteria.

Sample(s) FA52947-1MS, FA52947-1MSD were used as the QC samples indicated.

MS Semi-volatiles By Method SW846 8270D

Matrix: AQ **Batch ID:** OP69414

All samples were extracted within the recommended method holding time.
All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52829-1MS, FA52829-1MSD were used as the QC samples indicated.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69415

All samples were extracted within the recommended method holding time.
All samples were analyzed within the recommended method holding time.
All method blanks for this batch meet method specific criteria.

Sample(s) FA52912-1MS, FA52912-1MSD were used as the QC samples indicated.

Matrix Spike Duplicate Recovery(s) for Benzo(b)fluoranthene, Chrysene, Pyrene are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

Sample(s) OP69415-MSD have surrogates outside control limits.

OP69415-MB for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.
OP69415-MB for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69415-MB for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.
OP69415-MB for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69415-BS for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52912-1 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.
FA52912-1 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.
FA52912-1 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52912-1 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52912-2 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52912-2 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52912-2 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52912-2 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52912-3 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52912-3 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA52912-3 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA52912-3 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52912-3 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52912-3 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA52912-3 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA52912-3 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

Metals Analysis By Method SW846 6010C

Matrix: AQ **Batch ID:** MP33564

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA52886-1DUP, FA52886-1MS, FA52886-1MSD, FA52886-1PS, FA52886-1SDL were used as the QC samples for metals.

RPD(s) for Duplicate for Lead are outside control limits for sample MP33564-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Arsenic, Lead are outside control limits for sample MP33564-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

SGS Orlando certifies that this report meets the project requirements for analytical data produced for the samples as received at SGS Orlando and as stated on the COC. SGS Orlando certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the SGS Orlando Quality Manual except as noted above. This report is to be used in its entirety. SGS Orlando is not responsible for any assumptions of data quality if partial data packages are used.

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: CSX Transportation **Job No:** FA53205

Site: AGMININD: 9415829/ENV53216, Former Indiana Creosote Co, **Report Date:** 4/24/2018 5:11:45

4 Sample(s) were collected on 04/09/2018 and were received at SGS North America Inc - Orlando on 04/10/2018 properly preserved, at 4.2 Deg. C and intact. These Samples received an SGS Orlando job number of FA53205. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

MS Volatiles By Method SW846 8260B

Matrix: AQ **Batch ID:** VO1968

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA53195-6MS, FA53195-6MSD were used as the QC samples indicated.

Matrix Spike/Matrix Spike Duplicate Recovery(s) for Benzene, Ethylbenzene, Toluene, Xylene (total) are outside control limits. Outside control limits due to high level in sample relative to spike amount.

MS Semi-volatiles By Method SW846 8270D

Matrix: AQ **Batch ID:** OP69616

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA53212-2MS, FA53212-2MSD were used as the QC samples indicated.

Blank Spike Recovery(s) for 2-Methylphenol, Phenol are outside control limits.

Matrix Spike Recovery(s) for 2,4-Dimethylphenol, 2-Methylphenol, Carbazole are outside control limits. Probable cause is due to matrix interference.

Matrix Spike Duplicate Recovery(s) for 2,4-Dimethylphenol, Carbazole are outside control limits. Probable cause is due to matrix interference.

Sample(s) FA53205-4 have surrogates outside control limits.

FA53205-1: Insufficient sample for re-extraction.

FA53205-1 for Phenol: Associated BS recovery outside control limits.

FA53205-1 for 2-Methylphenol: Associated BS recovery outside control limits.

FA53205-2 for Phenol: Associated BS recovery outside control limits.

FA53205-2 for 2-Methylphenol: Associated BS recovery outside control limits.

FA53205-2: Confirmed ND by re-extraction and reanalysis.

FA53205-4: Confirmation run for surrogate recoveries.

FA53205-4: Confirmed ND by re-extraction and reanalysis.

FA53205-4 for Phenol: Associated BS recovery outside control limits.

FA53205-4 for 2-Methylphenol: Associated BS recovery outside control limits.

FA53205-4 for Phenol-d5: Outside control limits due to matrix interference. Confirmed by reanalysis.

Matrix: AQ **Batch ID:** OP69740

FA53205-2: Confirmation run.

FA53205-4: Confirmation run.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69617

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA53212-3MS, FA53212-3MSD were used as the QC samples indicated.

Sample(s) OP69617-BS have surrogates outside control limits.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69617

OP69617-MB for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69617-MB for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69617-MB for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

OP69617-MB for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA53205-1 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA53205-1 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA53205-1 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA53205-1 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA53205-1 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA53205-1 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA53205-1 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA53205-1 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA53205-2 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA53205-2 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA53205-2 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA53205-2 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA53205-2 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA53205-2 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA53205-2 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA53205-2 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA53205-4 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA53205-4 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA53205-4 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA53205-4 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA53205-4 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA53205-4 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA53205-4 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA53205-4 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

Metals Analysis By Method SW846 6010C

Matrix: AQ **Batch ID:** MP33583

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA53156-2DUP, FA53156-2MS, FA53156-2MSD, FA53156-2PS, FA53156-2SDL were used as the QC samples for metals.

RPD(s) for Duplicate for Lead are outside control limits for sample MP33583-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Lead are outside control limits for sample MP33583-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

Matrix: AQ **Batch ID:** MP33584

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA53205-2FDUP, FA53205-2FMS, FA53205-2FMSD, FA53205-2FPS, FA53205-2FSDL were used as the QC samples for metals.

RPD(s) for Duplicate for Lead are outside control limits for sample MP33584-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Lead are outside control limits for sample MP33584-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

SGS Orlando certifies that this report meets the project requirements for analytical data produced for the samples as received at SGS Orlando and as stated on the COC. SGS Orlando certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the SGS Orlando Quality Manual except as noted above. This report is to be used in its entirety. SGS Orlando is not responsible for any assumptions of data quality if partial data packages are used.

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: CSX Transportation **Job No:** FA53206

Site: AGMININD: 9415829/ENV53216, Former Indiana Creosote Co, **Report Date:** 4/24/2018 5:13:28

3 Sample(s) were collected on 04/09/2018 and were received at SGS North America Inc - Orlando on 04/10/2018 properly preserved, at 4 Deg. C and intact. These Samples received an SGS Orlando job number of FA53206. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

MS Volatiles By Method SW846 8260B

Matrix: AQ **Batch ID:** VO1968

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA53195-6MS, FA53195-6MSD were used as the QC samples indicated.

Matrix Spike/Matrix Spike Duplicate Recovery(s) for Benzene, Ethylbenzene, Toluene, Xylene (total) are outside control limits. Outside control limits due to high level in sample relative to spike amount.

FA53206-2: Sample vial(s) contained bubbles greater than 6mm; reported results are considered minimum values.

MS Semi-volatiles By Method SW846 8270D

Matrix: AQ **Batch ID:** OP69616

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA53212-2MS, FA53212-2MSD were used as the QC samples indicated.

Blank Spike Recovery(s) for 2-Methylphenol, Phenol are outside control limits.

Matrix Spike Recovery(s) for 2,4-Dimethylphenol, 2-Methylphenol, Carbazole are outside control limits. Probable cause is due to matrix interference.

Matrix Spike Duplicate Recovery(s) for 2,4-Dimethylphenol, Carbazole are outside control limits. Probable cause is due to matrix interference.

Sample(s) FA53206-1, FA53206-3 have surrogates outside control limits.

FA53206-1 for Phenol-d5: Outside control limits. Confirmed by reanalysis. Insufficient sample for re-extraction.

FA53206-1 for 2-Methylphenol: Associated BS recovery outside control limits.

FA53206-1 for Phenol: Associated BS recovery outside control limits.

FA53206-1: Confirmation run for surrogate recoveries.

FA53206-1: Insufficient sample for re-extraction.

FA53206-2: Confirmed ND by re-extraction and reanalysis.

FA53206-2 for 2-Methylphenol: Associated BS recovery outside control limits.

FA53206-2 for Phenol: Associated BS recovery outside control limits.

FA53206-3: Confirmation run for surrogate recoveries.

FA53206-3: Insufficient sample for re-extraction.

FA53206-3 for Phenol-d5: Outside control limits. Confirmed by reanalysis. Insufficient sample for re-extraction.

FA53206-3 for 2-Methylphenol: Associated BS recovery outside control limits.

FA53206-3 for Phenol: Associated BS recovery outside control limits.

Matrix: AQ **Batch ID:** OP69740

FA53206-2: Confirmation run.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69617

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA53212-3MS, FA53212-3MSD were used as the QC samples indicated.

Sample(s) OP69617-BS have surrogates outside control limits.

MS Semi-volatiles By Method SW846 8270D BY SIM

Matrix: AQ **Batch ID:** OP69617

OP69617-MB for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

OP69617-MB for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

OP69617-MB for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

OP69617-MB for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA53206-1 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA53206-1 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA53206-1 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA53206-1 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA53206-1 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA53206-1 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA53206-1 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA53206-1 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA53206-2 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA53206-2 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA53206-2 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA53206-2 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA53206-2 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA53206-2 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA53206-2 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA53206-2 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA53206-3 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

FA53206-3 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA53206-3 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA53206-3 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA53206-3 for Terphenyl-d14: Surrogate recoveries corrected for actual spike amount.

FA53206-3 for 2-Fluorobiphenyl: Surrogate recoveries corrected for actual spike amount.

FA53206-3 for Nitrobenzene-d5: Surrogate recoveries corrected for actual spike amount.

FA53206-3 for 2,4,6-Tribromophenol: Surrogate recoveries corrected for actual spike amount.

Metals Analysis By Method SW846 6010C

Matrix: AQ **Batch ID:** MP33584

All samples were digested within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA53205-2FDUP, FA53205-2FMS, FA53205-2FMSD, FA53205-2FPS, FA53205-2FSDLwere used as the QC samples for metals.

RPD(s) for Duplicate for Lead are outside control limits for sample MP33584-D1. RPD acceptable due to low duplicate and sample concentrations.

RPD(s) for Serial Dilution for Lead are outside control limits for sample MP33584-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

SGS Orlando certifies that this report meets the project requirements for analytical data produced for the samples as received at SGS Orlando and as stated on the COC. SGS Orlando certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the SGS Orlando Quality Manual except as noted above. This report is to be used in its entirety. SGS Orlando is not responsible for any assumptions of data quality if partial data packages are used.

RE: SGS North America Inc. - Orlando job FA53212 Reissue

Dear Mr. Woodruff,

The final report for job number FA53212 has been edited to reflect requested corrections. These edits have been incorporated into the revised report.

Sample FA53212-2 was corrected to report Naphthalene.

SGS North America Inc. - Orlando apologies for any inconvenience this may have caused. Please feel free to contact us if we can be of further assistance.

Sincerely,

SGS North America, Inc. - Orlando

REMIT C.O.D. TO:
ADDRESS

Note – (1) Where the rate is dependent on value, shippers are required to state specifically in writing the agreed or declared value of the property, as follows: "The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding _____

(2) Where the applicable tariff provisions specify a limitation of the carrier's absent a release or a value declaration by the shipper and the shipper does not release the carrier's liability or declare a value, the carrier's liability shall be limited to the extent provided by such provisions. See NMFC Item 172.

(3) Commodities requiring special or additional care or attention in handling or stowing must be so marked and packaged as to ensure safe transportation. See Section 2(e) of Item 360, Bill of Lading, Freight Bills and Statements of Charges and Section 1(a) of the Contract Terms and Conditions for a list of such articles.

I hereby desire that the contents of this consignment are fully and accurately described above by the proper shipping name and are classified, packed, marked and labeled/placarded, and are in all respects in proper condition for transport according to applicable international and national government regulations.

On behalf of CSX Transportation Signature

COD
Amt: $

Subject to Section 7 of the conditions, if this shipment is to be delivered to the consignee without recourse on the consignor, the consignor shall sign the following statement:
The carrier shall not make delivery of this shipment without payment of freight and al other lawful charges.

(Signature of Consignor)

FREIGHT CHARGES
FREIGHT PREPAID Except when box at Right is checked ☐ Check box if charges are to be collect

RECEIVED, subject to the classifications and tariffs in effect on the date of the issue of this Bill of Lading, the property described above in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated above which said carrier (the word carrier being understood throughout this contract as meaning any person or comparison in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination, it is mutually agreed as to each carrier of all or any of, said property over all or any portion of said route to

Destination and as to each party at any time interested in all or any said property, that every service to be performed hereunder shall be subject to all the bill of lading terms and conditions in the governing classification on the date of shipment.

Shipper hereby certifies that he is familiar with all the lading terms and conditions in the governing classification and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

REMIT C.O.D. TO:
ADDRESS

Note – (1) Where the rate is dependent on value, shippers are required to state specifically in writing the agreed or declared value of the property, as follows: "The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding _____

(2) Where the applicable tariff provisions specify a limitation of the carrier's absent a release or a value declaration by the shipper and the shipper does not release the carrier's liability or declare a value, the carrier's liability shall be limited to the extent provided by such provisions. See NMFC Item 172.

(3) Commodities requiring special or additional care or attention in handling or stowing must be so marked and packaged as to ensure safe transportation. See Section 2(e) of Item 380, Bill of Lading, Freight Bills and Statements of Charges and Section 1(a) of the Contract Terms and Conditions for a list of such articles.

I hereby desire that the contents of this consignment are fully and accurately described above by the proper shipping name and are classified, packed, marked and labeled/placarded, and are in all respects in proper condition for transport according to applicable international and national government regulations.

On behalf of CSX Transportation Signature

COD
Amt: $

Subject to Section 7 of the conditions, if this shipment is to be delivered to the consignee without recourse on the consignor, the consignor shall sign the following statement:
The carrier shall not make delivery of this shipment without payment of freight and al other lawful charges.

(Signature of Consignor)

TOTAL CHARGES $

FREIGHT CHARGES
FREIGHT PREPAID Except when box at Right is checked ☐ Check box if charges are to be collect

RECEIVED, subject to the classifications and tariffs in effect on the date of the issue of this Bill of Lading, the property described above in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated above which said carrier (the word carrier being understood throughout this contract as meaning any person or comparison in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination, it is mutually agreed as to each carrier of all or any of, said property over all or any portion of said route to

Destination and as to each party at any time interested in all or any said property, that every service to be performed hereunder shall be subject to all the bill of lading terms and conditions in the governing classification on the date of shipment.

Shipper hereby certifies that he is familiar with all the lading terms and conditions in the governing classification and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

May 18, 2010

Operations Division
Regulatory Branch (North)
ID No. LRL-2010-358-kjs

Mr. Paul Kurzanski
CSX Transportation, Incorporated
Jacksonville, Florida 32202

Dear Mr. Kurzanski:

This is in regard to an application submitted on your behalf by Arcadis, your agent, requesting authorization to excavate 435 linear feet of Clear Creek and 0.055 acre of emergent Wetland A, and temporarily fill 25 linear feet of an unnamed tributary to Clear Creek and 0.13 acre of emergent Wetland D for road access. The project purpose is to remove hazardous materials from a property located west of the Country Club Drive and South Walnut Street intersection in Bloomington, Monroe County, Indiana. The information supplied by you was reviewed to determine whether a Department of the Army (DA) permit will be required under the provisions of Section 404 of the Clean Water Act.

Your project is considered a discharge of dredged and/or fill material for the cleanup of hazardous materials. The project is authorized under the provisions of Nationwide General Permit (NWP) No. 38, Cleanup of Hazardous and Toxic Waste, as published in the Federal Register, March 12, 2007. Under the provisions of this authorization you must comply with the enclosed Terms for Nationwide Permit No. 38 and the Nationwide Permit General Conditions.

You must also obtain an individual State 401 Water Quality Certification (WQC) or waiver from the Indiana Department of Environmental Management (IDEM). You may contact them directly at the following address:

Indiana Department of Environmental Management
Office of Water Quality
Wetlands and Storm Water Section
MC-65-42 Room 1255
100 North Senate Avenue
Indianapolis, Indiana 46204-2251

This decision is valid through May 18, 2012. The enclosed Compliance Certification should be signed and returned when the project is completed. If your project is not completed by May 18, 2012 or if your project is modified, you must contact us for another permit determination. A copy of this letter is being sent to Arcadis and to the IDEM.

If you have any questions, please contact this office by writing to the above address, ATTN: CELRL-OP-FN, or by calling me at (502) 315-6691. All correspondence pertaining to this matter should refer to our ID No. LRL-2010-358-kjs.

Sincerely,

Kimberly J. Simpson

Regulatory Branch

Enclosures

TERMS FOR NATIONWIDE PERMIT No. 38
CLEANUP OF HAZARDOUS AND TOXIC WASTE

Specific activities required to effect the containment, stabilization, or removal of hazardous or toxic waste materials that are performed, ordered, or sponsored by a government agency with established legal or regulatory authority provided the permittee notifies the District Engineer in accordance with the ``Notification'' General Condition. For discharges in special aquatic sites, including wetlands, the notification must also include a delineation of affected special aquatic sites, including wetlands. Court ordered remedial action plans or related settlements are also authorized by this NWP. This NWP does not authorize the establishment of new disposal sites or the expansion of existing sites used for the disposal of hazardous or toxic waste. Activities undertaken entirely on a Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) site by authority of CERCLA as approved or required by EPA, are not required to obtain permits under section 404 of the CWA or section 10 of the Rivers and Harbors Act. (Sections 10 and 404)

Compliance Certification:

Permit Number: LRL-2010-358-kjs

Name of Permittee: CSX Transportation, Inc.

Date of Issuance: May 18, 2010

Upon completion of the activity authorized by this permit and any mitigation required by this permit, sign this certification and return it to the following address:

U.S. Army Corps of Engineers
CELRL-OP-FN
P.O. Box 59
Louisville, Kentucky 40201

Please note that your permitted activity is subject to a compliance inspection by an U.S. Army Corps of Engineers representative. If you fail to comply with this permit you are subject to permit suspension, modification, or revocation.

I hereby certify that the work authorized by the above referenced permit has been completed in accordance with the terms and conditions of the said permit, and required mitigation was completed in accordance with the permit conditions.

VIA CERTIFIED MAIL 91 7190 0005 2710 0015 2206

Mr. Paul J. Kurzanski
CSX Transportation, Inc.
500 Water Street, Suite J275
Jacksonville, FL 32202

Dear Mr. Kurzanski:

Re: Section 401 Water Quality Certification
Project: IDEM Voluntary Remediation
Program No. 9415830
IDEM No.: 2011-147-53-DDC-A
COE No.: LRL-2010-358-kjs
County: Monroe

The Office of Water Quality has reviewed your application for Section 401 Water Quality Certification dated March 11, 2011, and received March 16, 2011. According to the application, you propose to impact approximately 435 linear feet of Clear Creek, with the removal and grading of approximately 1,262 square feet of earthen material and impact 0.071 acre of emergent and scrub-shrub wetlands with the installation of timber mats. You will also install a temporary culvert within an UNT to Clear Creek, as temporary access. Upon completion, all temporary impacts shall be restored to pre-construction contours and stabilized with a native seed mix and geo-textile blankets. In addition, you shall replace any impacted woody riparian corridor with the implementation of a native woody riparian planting plan. The purpose of the work is to remediate residual creosote contaminants, as part of an IDEM Voluntary Remediation project. The project is located in Section 9, Township 8 North, Range 1 West, Bloomington USGS Quad, Monroe County.

Based on available information, it is the judgment of this office that the proposed project will comply with the applicable provisions of 327 IAC 2 and Sections 301, 302, 303, 306, and 307 of the Clean Water Act if you comply with the conditions set forth below. Therefore, subject to the following conditions, the Indiana Department of Environmental Management (IDEM) hereby grants Section 401 Water Quality Certification for the project described in your application received March 16, 2011, and modifications received May 24, 2011. Any changes in project design or scope not

detailed in the application described above or modified by the conditions below are not authorized by this certification.

CONDITIONS OF THE SECTION 401 WATER QUALITY CERTIFICATION:

You shall:

1) Deposit any dredged material in a contained upland disposal area to prevent sediment runoff to any waterbody.

2) Install erosion control methods prior to any soil disturbance to prevent soil from leaving the construction site. Appropriate erosion control methods include, but are not limited to, straw bale barriers, silt fencing, erosion control blankets, phased construction sequencing, and earthen berms. Monitor and maintain erosion control structures and devices regularly, especially after rain events, until all soils disturbed by construction activities have been permanently stabilized.

3) Install silt fence or other erosion control measures around the perimeter of any wetlands and/or other waterbodies to remain undisturbed at the project site.

4) Allow the commissioner or an authorized representative of the commissioner (including an authorized contractor), upon the presentation of credentials:

   a) to enter your property, including impact and mitigation site(s);
   b) to have access to and copy at reasonable times any records that must be kept under the conditions of this certification;
   c) to inspect, at reasonable times, any monitoring or operational equipment or method; collection, treatment, pollution management or discharge facility or device; practices required by this certification; and any mitigation wetland site;
   d) to sample or monitor any discharge of pollutants or any mitigation site.

5) Complete all approved discharges no later than two (2) years of the date of issuance of this Section 401 Water Quality Certification. You may request a one (1) year extension to the Section 401 Water Quality Certification by submitting a written request ninety (90) days prior to the deadline stated above. The written request shall contain an account of which discharges and mitigation have been completed and list the reasons an extension is requested.

6) Implement the restoration plan as described in the application received March 16, 2011, and correspondence from ARCADIS dated May 24, 2011 (referred to collectively hereinafter as the "restoration plan"), and as modified by the conditions of this certification.

7) Submit as-built plans within one year of the completion of the remediation project. The as-built plans shall include all impacted stream(s) and wetland(s) areas; narrative of work performed within the water bodies, along with details of all restored areas. Clearly depict impacts to riparian corridors and the implementation of woody riparian planting plan. Include details on stream stabilization methods utilized, upon completion of restoration efforts. Deviations from the approved restoration plan must be highlighted and explained.

8) Allow no construction equipment, temporary run-arounds, coffer dams, temporary causeways, temporary crossings, or other such structures to enter or be constructed within Clear Creek, unless specifically stated, depicted, or detailed in the aforementioned correspondence and project plans. A modification of this Section 401 Water Quality Certification is required from this office if any of the aforementioned items are needed for project construction.

9) Stockpile contaminant free cobble and boulder substrate excavated during the stream remediation project, and replace to pre-impact contours upon completed .

10) Remove any temporary causeway or other approved temporary structures used to facilitate construction or access upon completion of construction activities.

This certification does not relieve you of the responsibility of obtaining any other permits or authorizations that may be required for this project or related activities from IDEM or any other agency or person. You may wish to contact the Indiana Department of Natural Resources at 317-232-4160 (toll free at 877-928-3755) concerning the possible requirement of natural freshwater lake or floodway permits. In addition, you may wish to contact IDEM's Storm Water Permits Section at 317-233-1864 concerning the possible need for a 327 IAC 15-5 (Rule 5) permit if you plan to disturb greater than one (1) acre of soil during construction.

This certification does not:

(1) authorize impacts or activities outside the scope of this certification;
(2) authorize any injury to persons or private property or invasion of other private rights, or any infringement of federal, state or local laws or regulations;
(3) convey any property rights of any sort, or any exclusive privileges;
(4) preempt any duty to obtain federal, state or local permits or authorizations required by law for the execution of the project or related activities; or
(5) authorize changes in the plan design detailed in the application.

Failure to comply with the terms and conditions of this Section 401 Water Quality Certification may result in enforcement action against you. If an enforcement action is pursued, you could be assessed up to $25,000 per day in civil penalties. You may also be subject to criminal liability if it is determined that the Section 401 Water Quality Certification was violated willfully or negligently.

This certification is effective eighteen (18) days from the mailing of this notice unless a petition for review and a petition for stay of effectiveness are filed within this 18-day period. If a petition for review and a petition for stay of effectiveness are filed within this period, any part of the certification within the scope of the petition for stay is stayed for fifteen (15) days, unless or until an Environmental Law Judge further stays the certification in whole or in part.

This decision may be appealed in accordance with IC 4-21.5, the Administrative Orders and Procedures Act. The steps that must be followed to qualify for review are:

1) You must petition for review in writing that states facts demonstrating that you are either the person to whom this decision is directed, a person who is aggrieved or adversely affected by the decision, or a person entitled to review under any law.

2) You must file the petition for review with the Office of Environmental Adjudication (OEA) at the following address:

   Office of Environmental Adjudication
   100 North Senate Avenue
   IGCN Room N501
   Indianapolis, IN 46204

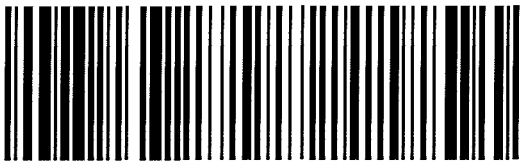
3) You must file the petition within eighteen (18) days of the mailing date of this decision. If the eighteenth day falls on a Saturday, Sunday, legal holiday, or other day that the OEA offices are closed during regular business hours, you may file the petition the next day that the OEA offices are open during regular business hours. The petition is deemed filed on the earliest of the following dates: the date it is personally delivered to OEA; the date that the envelope containing the petition is postmarked if it is mailed by United States mail; or, the date it is shown to have been deposited with a private carrier on the private carrier's receipt, if sent by private carrier.

Identifying the certification, decision, or other order for which you seek review by number, name of the applicant, location, or date of this notice will expedite review of the petition.

Note that if a petition for review is granted pursuant to IC 4-21.5-3-7, the petitioner will, and any other person may, obtain notice of any prehearing conferences, preliminary hearings, hearings, stays, and any orders disposing of the proceedings by requesting copies of such notices from OEA.

If you have procedural questions regarding filing a petition for review you may contact the Office of Environmental Adjudication at 317-232-8591.

If you have any questions about this certification, please contact David Carr, Project Manager, of my staff at 317-234-6350, or you may contact the Office of Water Quality through the IDEM Environmental Helpline (1-800-451-6027).



Sincerely,

Martha Clark Mettler

IDNR - Construction in a Floodway Permit

No. FW-25726

STATE OF INDIANA
DEPARTMENT OF NATURAL RESOURCES

CERTIFICATE OF APPROVAL
CONSTRUCTION IN A FLOODWAY

APPLICATION # : FW-25726

STREAM : Clear Creek

APPLICANT : CSX Transportation Incorporated
Paul J Kurzanski
500 Water Street
J 275
Jacksonville, FL 32202-4423

MAILED JAN 14 2011

AGENT : Arcadis G and M Incorporated
Steve Sharp
251 East Ohio Street
Suite 800
Indianapolis, IN 46204

AUTHORITY : IC 14-28-1 with 312 IAC 10

DESCRIPTION : Approximately 8,400 cubic yards of soil will be excavated from the floodway and transported offsite. All disturbed areas will be completely restored including replacement of the removed soil with clean topsoil. The excavated areas will then be returned to existing grade and seeded. Temporary roadways will be constructed to allow access to existing and proposed monitoring wells on site. The roadways will be constructed by placing 4" of 3/4" crushed stone at grade. The temporary roadways will be completely removed upon completion of the project. Also, sediment will be removed from the streambed in 2 locations along clear creek. The excavated sediment will be dewatered and disposed by a licensed facility. A 3' wide blockade will be constructed to divert stream flow around the areas of sediment removal to allow for a dry work zone. In addition, a 24' long 36" diameter reinforced concrete pipe culvert will be placed in an Unnamed Tributary to provide an equipment crossing. The proposed culvert will be covered with 30 cubic yards of aggregate and will be completely removed upon completion. Details of the project are contained in information and plans received at the Division of Water on April 5, 2010, August 12, 2010, October 25, 2010, October 28, 2010, November 24, 2010, November 29, 2010, December 14, 2010, January 10, 2011 and January 13, 2011.

NOTICE OF RIGHT TO ADMINISTRATIVE REVIEW

APPLICATION #: FW- 25726

This signed document constitutes the issuance of a permit by the Department of Natural Resources, subject to the conditions and limitations stated on the pages entitled "General Conditions" and "Special Conditions".

The permit or any of the conditions or limitations which it contains may be appealed by applying for administrative review. Such review is governed by the Administrative Orders and Procedures Act, IC 4-21.5, and the Department's rules pertaining to adjudicative proceedings, 312 IAC 3-1.

In order to obtain a review, a written petition must be filed with the Division of Hearings within 18 days of the mailing date of this notice. The petition should be addressed to:

Mr. Stephen L. Lucas, Director
Division of Hearings
Indiana Government Center North, Room N501A
100 North Senate Avenue
Indianapolis, Indiana 46204

The petition must contain specific reasons for the appeal and indicate the portion or portions of the permit to which the appeal pertains.

If an appeal is filed, the final agency determination will be made by the Natural Resources Commission following a legal proceeding conducted before an Administrative Law Judge. The Department of Natural Resources will be represented by legal counsel.

STATE OF INDIANA
DEPARTMENT OF NATURAL RESOURCES

GENERAL CONDITIONS

APPLICATION #: FW- 25726

(1) If any archaeological artifacts or human remains are uncovered during construction, federal law and regulations (16 USC 470, et seq.; 36 CFR 800.11, et al) and State Law (IC 14-21-1) require that work must stop and that the discovery must be reported to the Division of Historic Preservation and Archaeology within 2 business days.

Division of Historic Preservation and Archaeology
Room W274
402 West Washington Street
Indianapolis, IN 46204

Telephone: (317) 232-1646, FAX: (317) 232-8036

(2) This permit must be posted and maintained at the project site until the project is completed.

(3) This permit does not relieve the permittee of the responsibility for obtaining additional permits, approvals, easements, etc. as required by other federal, state, or local regulatory agencies. These agencies include, but are not limited to:

Agency	Telephone Number
Monroe County Drainage Board	(812) 349-2570
US Army Corps of Engineers, Louisville District	(502) 315-6686
Indiana Department of Environmental Management	(317) 233-8488 or (800) 451-6027
Local city or county planning or zoning commission	

(4) This permit must not be construed as a waiver of any local ordinance or other state or federal law.

(5) This permit does not relieve the permittee of any liability for the effects which the project may have upon the safety of the life or property of others.

(6) This permit may be revoked by the Department of Natural Resources for violation of any condition, limitation or applicable statute or rule.

(7) This permit shall not be assignable or transferable without the prior written approval of the Department of Natural Resources. To initiate a transfer contact:

Mr. Michael W. Neyer, PE, Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, IN 46204

Telephone: (317) 232-4160, Toll Free: (877) 928-3755
FAX: (317) 233-4579

(8) The Department of Natural Resources shall have the right to enter upon the site of the permitted activity for the purpose of inspecting the authorized work.

(9) The receipt and acceptance of this permit by the applicant or authorized agent shall be considered as acceptance of the conditions and limitations stated on the pages entitled "General Conditions" and "Special Conditions".

DEPARTMENT OF NATURAL RESOURCES

SPECIAL CONDITIONS

APPLICATION #: FW- 25726

PERMIT VALIDITY : This permit is valid for 24 months from the "Approved On" date shown on the first page. If work has not been initiated by January 14, 2013 the permit will become void and a new permit will be required in order to continue work on the project.

This permit becomes effective 18 days after the "MAILED" date shown on the first page. If both a petition for review and a petition for a stay of effectiveness are filed before this permit becomes effective, any part of the permit that is within the scope of the petition for stay is stayed for an additional 15 days.

CONFORMANCE : Other than those measures necessary to satisfy the "General Conditions" and "Special Conditions", the project must conform to the information received by the Department of Natural Resources on: April 5, 2010, August 12, 2010, October 25, 2010, October 28, 2010, November 24, 2010, November 29, 2010, December 14, 2010, January 10, 2011 and January 13, 2011. Any deviation from the information must receive the prior written approval of the Department.

Number	Special Condition
(1)	minimize and contain within the project limits inchannel disturbance and the clearing of trees and brush
(2)	do not work in the waterway from April 1 through June 30 without the prior written approval of the Division of Fish and Wildlife
(3)	do not cut any trees suitable for Indiana bat roosting (greater than 3 inches dbh, living or dead, with loose hanging bark) from April 1 through September 30
(4)	appropriately designed measures for controlling erosion and sediment must be implemented to prevent sediment from entering the stream or leaving the construction site; maintain these measures until construction is complete and all disturbed areas are stabilized
(5)	plant five trees, at least 2 inches in diameter-at-breast height, for each tree which is removed that is ten inches or greater in diameter-at-breast height
(6)	revegetate all bare and disturbed areas with a mixture of native grasses, sedges and wildflowers, and native shrub and hardwood tree species as soon as possible upon completion; provide the selected native herbaceous seed mix list to the south region biologist for review prior to planting
(7)	plant all tree-planting mitigation areas with 1" to 2" diameter-at-breast height (dbh) trees; no shrubs or vines shall be substituted for 1" to 2" dbh trees
(8)	restore all excavated areas landward of the top of the banks to the pre-existing elevations
(9)	seed and protect disturbed slopes and streambanks that are 3:1 or steeper with heavy-duty biodegradable erosion control blankets (follow manufacturer's recommendation for installation); seed and apply mulch on all other disturbed areas
(10)	implement the mitigation plan received at the Division of Water on October 28, 2010 within 12 months of project initiation

DEPARTMENT OF NATURAL RESOURCES

SPECIAL CONDITIONS

APPLICATION #: FW- 25726

(11) the site must be monitored for the survival of the plantings for a minimum of three years; a report must be submitted to the South Region Environmental Biologist at the Division of Fish and Wildlife, 402 W. Washington St., Room W273, Indianapolis, IN 46204-2781 by December 31 of each year to monitor the initiation, progress, and success of the mitigation site; the report must include appropriate pictures of vegetative plantings; a narrative must describe the activity accomplished to date, acres planted, number planted, list of species planted on site, and estimated survival (volunteers should not be included in survival counts, only planted specimens); reports must be submitted each year, even if work has not been initiated on site, and continue for a maximum of five years after work initiation, or until the mitigation site is complete and determined to be successful; if the mitigation site is not successful after five years after work initiation, the permit will be considered in violation, and another plan must be submitted for approval

(12) the mitigation tree plantings must have a minimum survival of 75% of planted material at the end of the monitoring period or additional trees must be installed to meet the minimum survival (volunteer species shall not be included in the survival rate of planted trees and shrubs)

(13) place "Do Not Mow, Cut or Spray" signs along the edge of the mitigation/revegetation areas (one sign for every 200 feet of edge) to protect the restored/replanted areas from future disturbance

(14) except for the material used as backfill as shown on the above referenced project plans on file at the Division of Water, place all excavated material landward of the floodway *

(15) do not leave felled trees, brush, or other debris in the floodway *

(16) upon completion of the project, remove all construction debris from the floodway *

(17) size and/or anchor the riprap to resist displacement by current or wave action

(18) keep the culvert waterway opening within the scope of this project free of debris and sediment at all times

(19) upon completion of the project, completely remove the temporary crossing and its appurtenances from the floodway *

(20) * NOTE: for regulatory purposes, the floodway is defined as that shown on PANEL 40 of the City of Bloomington Flood Insurance Rate Map, dated June 17, 1991

MAILED APR 05 2012

Re: CTS-3288 – FW-25726
Clear Creek – Monroe County

Dear Mr. Woodruff:

Thank you for your March 23, 2012 letter requesting approval to construct a temporary access road needed to complete work permitted under FW-25726. Based on information received at the Division of Water, the project site is located in Section 16, Township 8 North, Range 1 West, Approximately 230' west of the Country Club Road stream crossing, near Bloomington, Monroe County.

Department Staff has completed their review of your request and determined that this amendment will have no adverse cumulative effect on the efficiency or capacity of the floodway nor will it pose an unreasonable hazard to the safety of life or property, or adversely affect the fish, wildlife, or botanical resources. Therefore, approval is granted for the proposed revision to the original permit, provided the conditions listed on the original permit and the condition below are met:

- obtain the prior written approval of the Department for any additional construction, excavation or filling in or on the floodway * beyond the scope of the project

  * Note: for regulatory purposes, the floodway is defined as that shown on PANEL 143 of the City of Bloomington Flood Insurance Rate Map, dated December 17, 2010

This letter should be displayed at the project site. The Division of Water will place a copy of this letter in the file to be retained as a permanent record. **Please be aware that all conditions of the permit must be met in order for your project to be in compliance.**

You should not construe this letter to be a local building permit, nor is it a waiver of the provisions of any local building or zoning ordinances. This letter does not relieve you of the responsibility of obtaining permits, approvals, easements etc. as required by other federal, state, and local agencies.

Thank you for this opportunity to be of assistance. We appreciate your interest in providing safe floodplain development. If you have any further questions concerning this matter, please contact the Technical Services Section either at our toll-free number, 1-877-928-3755, or at 317-232-4160.

Sincerely,

James J. Hebenstreit, PE
Assistant Director
Division of Water

NOTICE OF RIGHT TO ADMINISTRATIVE REVIEW

File No. CTS-3288

The letter or any of the conditions, limitations, and amendments which it contains may be appealed by applying for administrative review. Such review is governed by the Administrative Orders and Procedures Act, IC 4-21.5, and the Department's rules pertaining to adjudicative proceedings, 312 IAC 3-1.

In order to obtain a review, a written petition must be filed with the Division of Hearings within 18 days of the mailing date of this notice. The petition should be addressed to:

Mr. Stephen L. Lucas, Director
Division of Hearings
Indiana Government Center North, Room N501A
100 North Senate Avenue
Indianapolis, IN 46204

The petition must contain specific reasons for the appeal and indicate the portion or portions of the letter to which the appeal pertains.

If an appeal is filed, the final agency determination will be made by the Natural Resources Commission following a legal proceeding conducted before an Administrative Law Judge. The Department of Natural Resources will be represented by legal counsel.

Dear Mr. Young:

Enclosed is an addendum to the existing Construction in a Floodway Permit No. FW-25726, that was issued on January 14, 2011. This addendum is being submitted by ARCADIS on behalf of CSX Transportation, Inc (CSX). On March 23, 2012, ARCADIS (Randal Woodruff) spoke with Christine Stansifer with the Indiana Department of Natural Resources about the nature of the enclosed addendum.

CSX requests approval for the installation of an additional stretch of temporary access road to be completed within the flood plain of Clear Creek at 240 Country Club Drive in Bloomington, Indiana. ARCADIS has enclosed the permit addendum request, including relevant figures, and a copy of the existing Construction in a Floodway Permit No. FW-25726, for your review and permitting determination.

If you have any questions or comment concerning the activities at this site, please contact us at (317) 231-6500.

Sincerely,

At the request of CSX Transportation (CSXT), ARCADIS has prepared this addendum to the existing Construction in a Floodway Permit No. FW-25726. This addendum requests approval for the installation of an additional stretch of temporary access road to be completed within the flood plain of Clear Creek at 240 Country Club Drive in Bloomington, Indiana (Site).

Background

CSX Transportation, Inc. (CSXT) is conducting a voluntary cleanup through the Indiana Department of Environmental Management (IDEM) Voluntary Remediation Program (VRP) at the former Indiana Creosoting Company (ICC) that operated at 240 Country Club Drive in Bloomington, Indiana. The soil and sediment impacts and residual liquid phase creosote remaining at the site are due to the past operations of the former ICC that operated from the early 1900s to 1976. The activities bulleted below received a Certificate of Approval for Construction in a Floodway Permit No. FW-25726 (Attachment A) on January 14, 2011, and are part of the overall environmental closure strategy for the site under the IDEM VRP site #6970403.

- construction of a series of temporary access roads,
- the installation of a culvert in a drainage ditch to enable equipment to cross a ditch onsite,
- the removal of impacted sediments from within Clear Creek,
- the onsite excavation of impacted soils
- the construction of a remediation and storage building

AUTHORITY : IC 14-28-1 with 312 IAC 10

DESCRIPTION : Approximately 8,400 cubic yards of soil will be excavated from the floodway and transported offsite. All disturbed areas will be completely restored including replacement of the removed soil with clean topsoil. The excavated areas will then be returned to existing grade and seeded. Temporary roadways will be constructed to allow access to existing and proposed monitoring wells on site. The roadways will be constructed by placing 4" of 3/4" crushed stone at grade. The temporary roadways will be completely removed upon completion of the project. Also, sediment will be removed from the streambed in 2 locations along clear creek. The excavated sediment will be dewatered and disposed by a licensed facility. A 3' wide blockade will be constructed to divert stream flow around the areas of sediment removal to allow for a dry work zone. In addition, a 24' long 36" diameter reinforced concrete pipe culvert will be placed in an Unnamed Tributary to provide an equipment crossing. The proposed culvert will be covered with 30 cubic yards of aggregate and will be completely removed upon completion. Details of the project are contained in information and plans received at the Division of Water on April 5, 2010, August 12, 2010, October 25, 2010, October 28, 2010, November 24, 2010, November 29, 2010, December 14, 2010, January 10, 2011 and January 13, 2011.

APPLICATION #: FW- 25726

(11) the site must be monitored for the survival of the plantings for a minimum of three years; a report must be submitted to the South Region Environmental Biologist at the Division of Fish and Wildlife, 402 W. Washington St., Room W273, Indianapolis, IN 46204-2781 by December 31 of each year to monitor the initiation, progress, and success of the mitigation site; the report must include appropriate pictures of vegetative plantings; a narrative must describe the activity accomplished to date, acres planted, number planted, list of species planted on site, and estimated survival (volunteers should not be included in survival counts, only planted specimens); reports must be submitted each year, even if work has not been initiated on site, and continue for a maximum of five years after work initiation, or until the mitigation site is complete and determined to be successful; if the mitigation site is not successful after five years after work initiation, the permit will be considered in violation, and another plan must be submitted for approval

(12) the mitigation tree plantings must have a minimum survival of 75% of planted material at the end of the monitoring period or additional trees must be installed to meet the minimum survival (volunteer species shall not be included in the survival rate of planted trees and shrubs)

(13) place "Do Not Mow, Cut or Spray" signs along the edge of the mitigation/revegetation areas (one sign for every 200 feet of edge) to protect the restored/replanted areas from future disturbance

(14) except for the material used as backfill as shown on the above referenced project plans on file at the Division of Water, place all excavated material landward of the floodway *

(15) do not leave felled trees, brush, or other debris in the floodway *

(16) upon completion of the project, remove all construction debris from the floodway *

(17) size and/or anchor the riprap to resist displacement by current or wave action

(18) keep the culvert waterway opening within the scope of this project free of debris and sediment at all times

(19) upon completion of the project, completely remove the temporary crossing and its appurtenances from the floodway *

(20) * NOTE: for regulatory purposes, the floodway is defined as that shown on PANEL 40 of the City of Bloomington Flood Insurance Rate Map, dated June 17, 1991

DRIVEWAY PERMIT

PERMIT #2011234

ISSUED TO: CSX TRANSPORTATION
FOR DRIVEWAY AT: 240 COUNTRY CLUB ROAD

OWNERS NAME: CSX TRANSPORTATION
500 WATER STREET, J275
JACKSONVILLE, FL

REQUIREMENTS

DRIVEWAY WITH SWALE: Construct a swale that allows water to drain across the driveway and away from the county road. See reverse side of permit. TEMPORARY CONSTRUCTION ENTRANCE.

A minimum of three hundred (300) feet sight distance both directions is required.

Two (2) foot dirt shoulders required.

All areas disturbed by construction must be seeded and mulched to prevent erosion.

Drainage ditches must be constructed to blend uniformly with the edge of pavement and original ground.

A turn around area is required so no vehicle must back out onto county roads.

It is the responsibility of applicant to make provisions for relocation of utilities which are in conflict with new driveway or subdivision road.

I AGREE TO CONSTRUCT MY DRIVEWAY TO COMPLY WITH THE ABOVE REQUIREMENTS.

SIGNED Eric Gulick for ARCADIS DATE 11/29/11

THIS PERMIT IS VALID ONE YEAR FROM 11/29/11 BY TT

Right of Way Excavation Permit

Company	Arcadis U.S., Inc.		
Responsible	Randall	Woodruff	
Project	Installation of construction entrance		
Bond Amount	$3,000.00	Expiration Date	11/5/2012

Status	Active
Inspector	Aten
Permit Fee	$100.00

Permit Number	C11-ROW-232
Date Issued	11/4/2011
Start Date	11/21/2011

Excavations

Number	Dir	Street	Type	Cut Type	Description
161	W	Country Club	Dr	Excavation_TreePlot	Southern ROW, East of Clear Creek.
240	W	Country Club	Dr	Excavation_TreePlot	Northern ROW, West of Clear Creek.

Special Provisions

(1) Permit for two temporary construction entrances, SE of Clear Creek and country Club and NW of Clear Creek and Country Club. The third proposed drive entrance is located within Monroe County jurisdiction. (2) After IDEM approval, temporary drive north of Country Club will need to be build to current COB drive standards.

Standard Conditions of Approval:

1) **Permittee is required to call the Engineering Department at 349-3417 for inspection of any work in the City of Bloomington Right of way prior to placing concrete, or at any point specified in the Specific Conditions of Approval.**
2) This approval only covers concerns within the jurisdiction of City of Bloomington Engineering; other entities or agencies may also need to grant approval for work done in the course of this project.
3) Project shall conform to all current A.D.A. (Americans with Disabilities Act) requirements.
4) All utility work shall conform to specifications to be obtained from the owner of the affected utility, and work on said utility shall be performed only with the expressed permission of its owner. It shall be the responsibility of the permittee to obtain any necessary inspections or approvals from the owner of the utilities involved.
5) Permittee shall be responsible for supplying and placing all required signs and barricades. All signs and barricades, and their placement, shall conform to current M.U.T.C.D. and I.N.D.O.T. standards. All required traffic control measures shall be in place before work begins.
6) Erosion control measures complying with Bloomington Municipal Code 20.06.05.03 are required to be in place during the period of any earth disturbing activities, and remain in place until the site is stabilized.
7) All bonding must remain current until a written release of such bonding is given by a representative of the City of Bloomington Engineering Department.
8) Any work in a street shall conform to the City of Bloomington Street Cut Requirements. Copies of these requirements are available from the Engineering Department or online at http://www.bloomington.in.gov/engineering/. All damaged Public Improvements must be repaired to prior or improved condition.
9) Any brick or inlaid limestone sidewalks, or brick surfaced streets, shall remain undisturbed, unless specific permission is given by a representative of the Engineering Department. If they are disturbed the surface materials shall be taken up, saved, and re-installed to City of Bloomington specifications. Backfill methods and materials must also meet these specifications.
10) Any damage to any underground facility or utility must be reported immediately to the City of Bloomington Engineering Department and the owner of the facility or utility (if known). If not, the permittee will be required to re-excavate the damaged facility or utility, at their expense, to demonstrate that repairs have been made to the satisfaction of the owner of the damaged facility or utility.
11) Any above ground appurtenances (line markers, switch boxes, meters, etc.) ,or structures, to be placed in the City Right of Way must be approved by the City of Bloomington Engineering Department prior to installation.
12) All existing regulatory signs (STOP, YIELD, NO PARKING, etc.) that are owned by the City of Bloomington shall be removed and replaced only by the City of Bloomington Traffic Division. Any regulatory signs removed, or installed, by the permittee are subject to removal and replacement by the Traffic Division with the Permittee being billed for time and materials.

Driveway Installation in City of Bloomington Right-of-Way

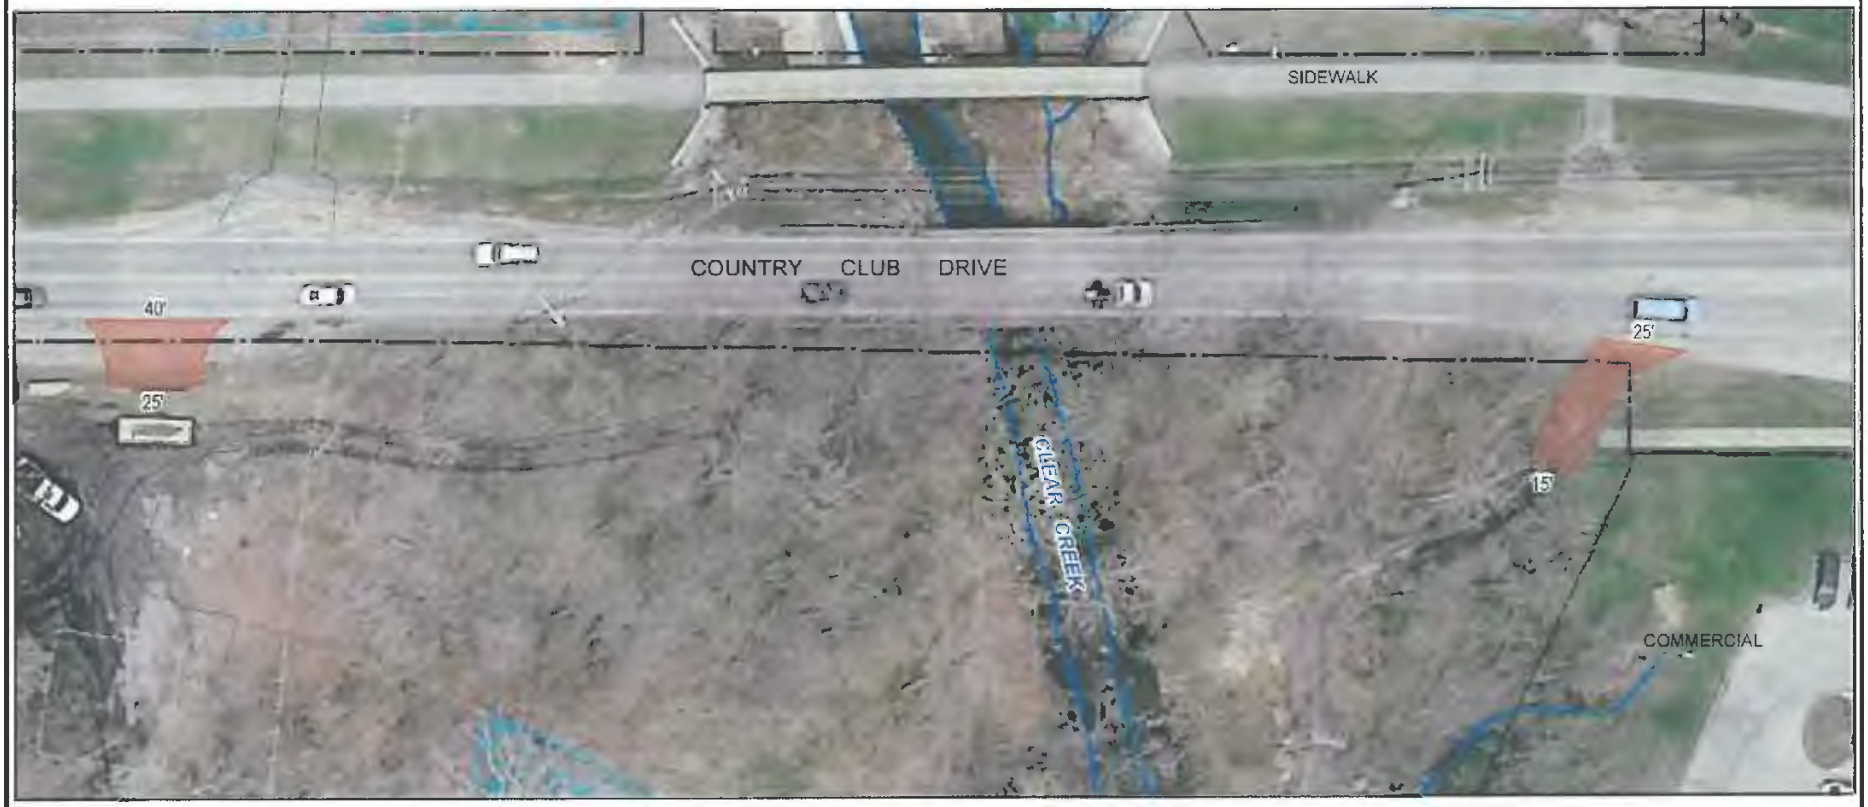
Near 240 Country Club Drive, Bloomington, Indiana

Proposed Work Location:

Right-of-Way (ROW) on the south side of Country Club Drive: from the southern edge of pavement to the southern extent of the ROW. Work will be performed in two locations: one location west of the bridge over Clear Creek and one location east of the bridge over Clear Creek (see attached figure).

Work Activity:

Installation of two gravel driveways within the above mentioned ROW. The driveways will be completed using ¾" crushed stone aggregate to a maximum thickness of 4" above the existing ground surface (see attached figure). The location to the west of the bridge will be a maximum of 40' wide at the roadway, fanning down to 25' at the ROW extent. The location the east of the bridge will be a maximum of 25' wide at the roadway, fanning down to 15' at the ROW extent. We will reference the July 2004, Temporary Traffic Control guide provided by the City of Bloomington in regard to traffic control measures.



Length of Work Activity:

Initial construction of the driveways will take approximately 1 - 2 business days for each location. These driveways will be accessed on a regular basis for at least the next 10 years for the purpose of routine site work.

Reason for Work:

The work is being performed as a part of ongoing voluntary groundwater investigation/monitoring of a former CSX Transportation, Inc. site located at 240 Country Club Drive. All work is being performed under direction the Indiana Department of Environmental Management (IDEM) Voluntary Remediation Program (VRP).

Date: Friday, March 30, 2012 12:46:44 PM

Randall,

I am checking on the contractor and will let you know what I find. As for the proposed electric line, it sounds like a very minimal change in the scope of work and we can add it to the original permit at no extra charge. Keep this email for your records and thank you for the heads up on the extra work.

Thanks,
Roy Aten

> CSX Transportation and ARCADIS are planning on digging a trench for an electrical line to a depth of 30" below grade at 240 Country Club Drive (property south of Country Club). We will be trenching within the ROW from the base of the electrical pole to the CSXT property fence line (a distance of approximately 10'). The rest of the trenching will take place on CSXT property. We are working with Jack Urrutia with Duke Energy, who said typically deals with you as well. I have attached the Application for City Driveway and Excavation Permit, as well as a drawing from Duke Energy. Also, is this something that can be added to the existing ROW permit, or does this need to be separate? Please feel free to contact me with any questions.

Project: CSX Transportation INC. – remediation project - Pole Building
S-1 Occupancy, Type V-B Construction

Construction Design Release

The plans, specifications and application submitted for the above referenced project have been reviewed for compliance with the applicable rules of the Fire Prevention and Building Safety Commission. The project is released for construction subject to, but not limited to, the conditions listed below. All construction work must be in full compliance with all applicable state rules.

Indiana Building Code, 2008

All construction work is to be in accordance with the Indiana Building Code.

Section 1607.3, Uniform Live Loads: The live loads used in the design of buildings and other structures shall be the maximum loads expected by the intended use but shall in no case be less than the minimum uniformly distributed unit loads required by Table 1607.1.

Section 1804.1, Footing Design: Footings shall be so designed that the allowable bearing capacity of the soil is not exceeded and that differential settlement is minimized.

Section 1805.4.2, Concrete Footings: The design, materials and construction of concrete footings shall comply with Sections 1805.4.2.1 through 1805.4.2.6.

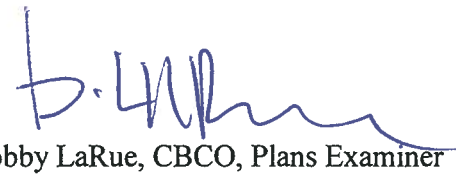
Section 1805.7, Designs Employing Lateral Bearing: Designs to resist both axial and lateral loads employing posts or poles as columns embedded in earth or embedded in concrete footings in the earth shall conform to the requirements of 1805.7.1 through 1805.7.3. Wood poles shall be treated in accordance with AWPA U1 for sawn timber posts, Commodity Specification A, Use Category 4B. (To meet the requirements of the Indiana Building Code, post for ground contact and part of a building structure are to meet the AWPA UC4B are to achieve a protection rating of ACQ .60 or CCA .60. Verify that the posts achieve this requirement. Posts are to be set a minimum of 4' below final grade.)

Section 2304.9.5, Fasteners: Fasteners for preservative-treated and fire-retardant-treated wood shall be of hot-dipped zinc coated galvanized steel, stainless steel, silicon bronze or copper.

Section 2308.10.1, Wind uplift: Roof assemblies shall have rater and truss ties to the wall below. Resultant uplift loads shall be transferred to the foundation using a continuous load path.

Indiana Accessibility Issues, Chapter 11, 2008 & ICC/ANSI A117.1

Accessible routes, maneuvering spaces, bathrooms, turning spaces, plumbing fixtures and bath accessories shall be installed in locations and heights in accordance with this chapter.



Indiana Mechanical Code, 2008
All mechanical work shall be in compliance with the Indiana mechanical Code.
(No mechanical work shown on the permit application. If a mechanical system is to be installed, contact the Monroe County Building Department prior to installation.)

Indiana Electrical Code, 2009
All electrical work shall be in compliance with the Indiana Electrical Code.
(No electric work shown on the permit application. If electric is to be installed, contact the Monroe County Building Department prior to installation.)

Registration and Licensing Requirements
Electrical work on the project is required to be performed by a Monroe County licensed electrician.

Certificate of Compliance
The design professional has certified that he will inspect the construction covered by this application at appropriate intervals to determine general compliance with the released documents and applicable rules of the Commission and will cause all noted deviations from released documents and code violations to be corrected or notify the owner and authorities having jurisdiction of all specific deviations and code violations.

Occupancy
1) All requirements of the Monroe County Planning Department *Certificate of Zoning Compliance.*
2) Satisfactory fire inspection by the Fire Jurisdiction.
3) Satisfactory final inspection by the Building Department.
The *Certificate of Occupancy* shall be obtained at the completion of the work and prior to occupying the structure.

Bobby LaRue, CBCO, Plans Examiner

INDUSTRIAL IMPROVEMENT LOCATION PERMIT

N O T E: This Improvement Location Permit pertains only to the attached plans and the specific use proposed, exactly as submitted and reviewed. This permit does not constitute the issuance of any other required permit nor exempt the property from compliance with any other requirements. All site improvements shall be implemented in accordance with the site plans as approved before a Land Use Certificate and/or a Certificate of Occupancy can be issued.

- Multi-family residential development
- Subdivision or Planned Unit Developments

The attached plans have been reviewed for compliance with applicable provisions of Chapters 800- 833 of the Monroe County Zoning Ordinance, of the Monroe County Code, and conformance with the terms of any approvals which have been granted under the authority of the Zoning Ordinance or the Subdivision Control Ordinance.

The plans comply: ____x____ As Submitted _____ with modifications as follows

Chapter 814-1-D Permits and Certificates Revocation and Expiration of Permit

(1) An improvement location permit may be revoked if active work is not commenced within sixty (60) days after the date of its issuance, and continued with due diligence to completion. The Administrator shall judge whether due diligence is being shown.

(2) If the work described in any improvement location permit has not been commenced within one hundred and eighty (180) days from the date of permit issuance, said permit shall expire.

(3) If the work described in any permit has not been substantially completed within two years of the date of permit issuance, said permit shall expire.

(4) Upon the revocation or expiration of an improvement location permit, no further work may be performed on the subject property until a new permit is obtained.

816-5 General Requirements for Individual Building Lots Within a Permitted Project

(A) All storm water quality measures, including erosion and sediment control, necessary to comply with this Chapter must be implemented in accordance with the plan and sufficient to satisfy (B) of this Section;**(B)** Provisions for erosion and sediment control on individual building lots regulated under the original permit of a project site owner must include the following requirements:1. The individual lot operator, whether owning the property or acting as the agent of the property owner, shall be responsible for erosion and sediment control requirements associated with the activities on the individual lots;2. Installation and maintenance of a stable construction site access;3. Installation and maintenance of appropriate perimeter erosion and sediment control measures prior to land disturbance;4.Sediment discharge and tracking from each lot must be minimized throughout the land disturbing activities on the lot until permanent stabilization has been achieved;5. Clean-up of sediment that is either tracked or washed onto roads. Bulk clearing of sediment shall not include flushing the areas with water. Cleared sediment must be redistributed or disposed of in a manner that is in compliance with all applicable statutes and rules;6. Adjacent lots disturbed by an individual lot operator must be repaired and stabilized with a temporary or permanent surface stabilization, and 7.For individual residential lots, final stabilization meeting the criteria of this Chapter will be achieved when the individual lot operator completes final stabilization or has installed appropriate erosion and sediment control measures for an individual lot prior to occupation of the home by the homeowner and has informed the homeowner of the requirement for, and benefits of, final stabilization.

  Request: Use variance to allow outdoor storage. Also requested is a variance from fence height standards to allow an 8 foot tall fence.
  Case Manager: Eric Greulich

BLOOMINGTON BOARD OF ZONING APPEALS **CASE #: UV/V-47-13**
STAFF REPORT **DATE: October 24, 2013**
Location: 2660 S. Walnut St.

PETITIONER: **CSX Transportation**
31 E. Georgia Street, Indianapolis, IN

CONSULTANT: **ARCADIS U.S. Inc.**
132 E. Washington St, Indianapolis, IN

REQUEST: The petitioner is requesting a use variance to allow outdoor storage. Also requested is a variance to allow an 8' tall fence.

SITE DESCRIPTION: The petition site is located at 2660 S. Walnut St. and is zoned Planned Unit Development (PUD-30-90). It is part of the Walnut Station PUD which is located at the southwest corner of S. Walnut St. and W. Country Club Dr. The Clear Creek floodplain is also located to the west. The Walnut Station PUD was approved in 1990 to serve as a neighborhood shopping center. A branch bank, oil change facility, 11,550 sq. ft. shopping center, and a 12,900 sq. ft. CVS drug store have been developed within the PUD.

A former creosote yard was located on the north side of Country Club Drive and resulted in a substantial amount of creosote that has infiltrated the adjacent soil and bedrock in this area. CSX Railroad is working in conjunction with ARCADIS Engineering to clean up the creosote and remediate the contamination that has infiltrated the soil and ground water in this area. As part of the remediation work CSX needs to create an on-site storage area to temporarily collect contaminated material in storage drums until it is hauled away for permanent disposal.

There are 2 lots on the western portion of the PUD that have never been developed and it is within the southern most of these vacant lots that the petitioner is requesting a use variance to allow outdoor storage. The petitioner is proposing to construct a 20'x20' fenced enclosure area to temporarily store the collection barrels. The enclosure area would be located in a 40'x40' fenced compound. The barrels would be filled and collected from the adjacent monitoring and collection wells that have been dug at various locations adjacent to this site. The storage area would have an 8' tall fence surrounded by privacy slats to minimize view of the storage area. There would also be another 8' tall fence constructed along the front of the lot to prevent access to the work area. Each barrel would be stored on a containment pallet that would hold and contain any leaks. The barrels would be stored onsite for no more than 60 days before they are hauled away for permanent disposal. Access to the area would come from an existing driveway stub adjacent to CVS.

Outdoor storage is not a permitted use in this PUD, so the petitioner is requesting a Use Variance to allow outdoor storage. This use is only being requested while the remediation work is occurring and would not be permanent. The petitioner is also requesting a variance to allow for an 8' tall fence that will be used to secure the storage and remediation area.

The petitioner has secured permits from the Indiana Department of Natural Resources, Indiana Department of Environmental Management, and U.S. Army Corps of Engineers for the work related to this project. The Plan Commission heard this case at the October 7, 2013 meeting and voted unanimously to send this to the Board of Zoning Appeals with a positive recommendation.

SITE PLAN:

Floodplain: The 100-year floodplain of Clear Creek is located adjacent to this property. While there is nearby property owned by CSX that is zoned Institutional and would allow for Outdoor Storage, all of the areas zoned Institutional are also located within the floodplain and would therefore not make ideal locations for storage of this material. There would not be any fill placed with this project and no work within the floodplain is necessary for the storage area.

20.09.140 CRITERIA AND FINDINGS FOR USE VARIANCE:

Findings of Fact: Pursuant to IC 36-7-4-918.4. the Board of Zoning Appeals or the Hearing Officer may grant a variance from use if, after a public hearing, it makes findings of fact in writing, that:

(1) The approval will not be injurious to the public health, safety, morals, and general welfare of the community; and

Staff Finding: Staff finds no injury with the use variance request. This use will be for a limited time and does not allow a permanent use. The storage area will be fenced with a privacy fence to secure the area and buffer the view of the storage drums.

(2) The use and value of the area adjacent to the property included in the variance will not be affected in a substantially adverse manner; and

Staff Finding: Staff finds no adverse impacts to the use and value of the surrounding area associated with the proposed use variance. In contrast, the residents living in the area will benefit from the environmental remediation that is occurring as a result of the project.

(3) The need for the variance arises from some condition peculiar to the property involved; and

Staff Finding: Staff finds peculiar condition in that a majority of the petitioner's property is located in the floodplain. The only areas of the property that are outside of the floodplain do not allow for storage. Storage of environmentally sensitive material is discouraged within the floodplain and this site provides ease of accessibility. In addition, there are State cleanup regulations that do not allow the individual storage drums to be transported across a public road. This creates a clear burden on the petitioner to find an adjacent temporary storage location. The PUD did not foresee environmental cleanup as a possible land use and therefore did not list outdoor storage as a permitted use.

(4) The strict application of the terms of the Unified Development Ordinance will constitute an unnecessary hardship if applied to the property for which the variance is sought; and

Staff Finding: Staff finds the strict application of the Unified Development Ordinance will place an unnecessary hardship in that it would not allow the storage area to be located outside of the floodplain. Once again, the storage of environmental contaminants within the floodplain is detrimental to environmental preservation goals.

(5) The approval does not interfere substantially with the Growth Policies Plan.

Staff Finding: The Plan Commission found that this proposal does not substantially interfere with the Growth Policies Plan. The GPP designates this property as a Community Activity Centers. This request is only for a temporary use and not a permanent use on the property. The work to remediate this area will further many of the goals of the GPP, including "Nurture Environmental Integrity" by removing contaminants and pollution from the soil. This remediation will also allow for more redevelopment opportunities in this environmentally contaminated area and further the possibilities of the area being developed with future commercial uses associated with this Community Activity Center..

CRITERIA AND FINDINGS

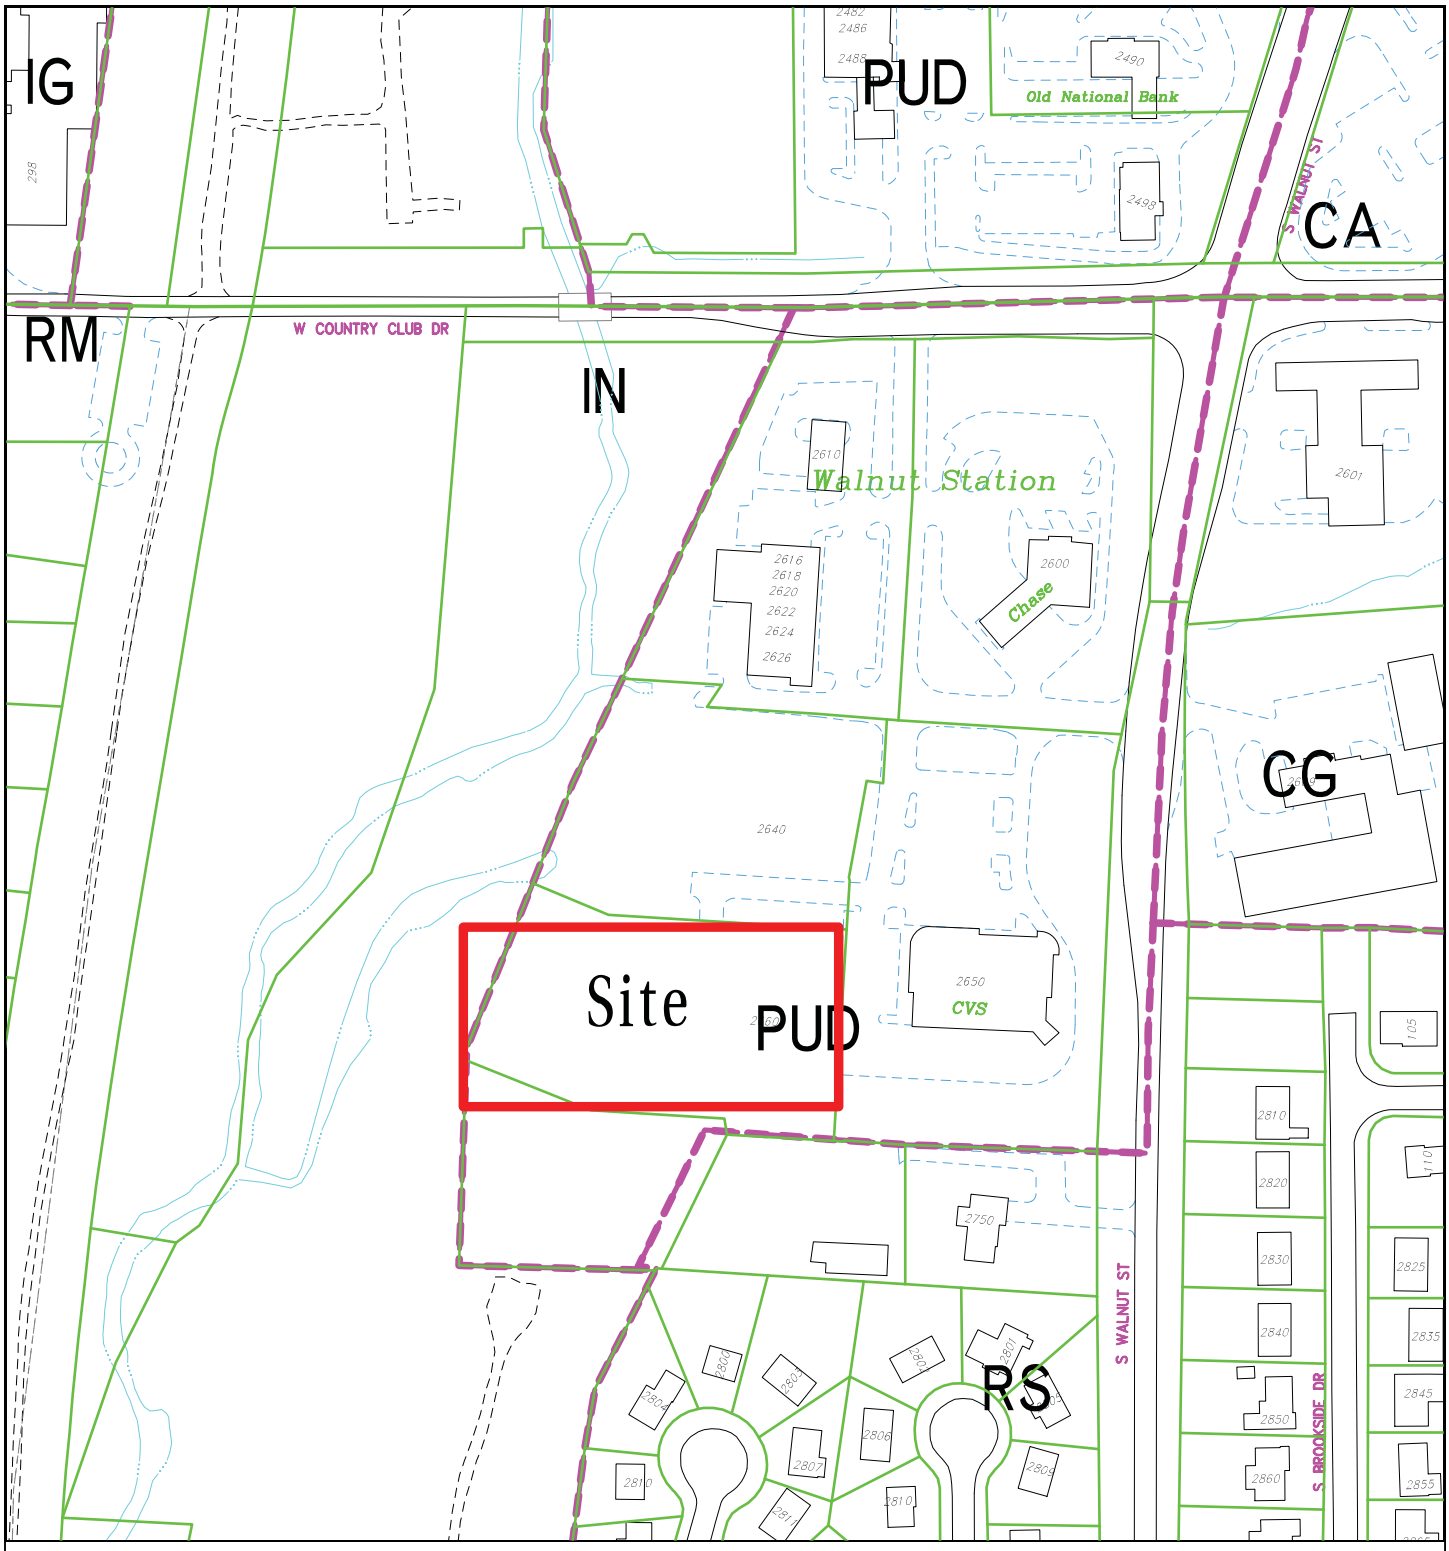
20.09.130 (e) Standards for Granting Variances from Development Standards:
A variance from the development standards of the Unified Development Ordinance may be approved only upon determination in writing that each of the following criteria is met:

1. *The approval will not be injurious to the public health, safety, morals, and general welfare of the community.*

   Staff's Finding: Staff finds no injury to the general welfare. The placement of the fence will protect the collection area, and the inclusion of privacy lattice within the fence slats will buffer the visual view of the area.

2. *The use and value of the area adjacent to the property included in the variance will not be affected in a substantially adverse manner.*

   Staff's Finding: Staff finds no adverse impact to adjacent properties for the sections of 8' tall fencing that are proposed. In fact, the area adjacent to the collection area will be best protected by securing the storage bins in this area with 8' tall fencing. The storage area will be not a long term use on the property and the fencing is only related to the remediation work. Upon completion of the remediation work, the storage area and fencing will all be removed.



3. *The strict application of the terms of the Unified Development Ordinance will result in practical difficulties in the use of the property; that the practical difficulties are peculiar to the property in question; that the variance will relieve practical difficulties.*

Staff's Finding: Staff finds peculiar condition because adjacent properties owned by CSX that do have restrictions for fence height are inappropriately located within the floodplain. Only allowing a four foot tall fence in this location will not achieve the correct security or visual buffering needed for this project.

CONCLUSIONS: Staff finds minimal impacts as a result of this request for a temporary use. The cleanup of this contaminated area will improve environmental resources and allow for further development opportunities within the PUD. The fence enclosure to surround and buffer the view of the storage area will mitigate visual impacts.

RECOMMENDATION: Based upon the written report, staff recommends approval of the Use Variance and the Development Standards Variance with the following conditions:

1. All fencing and storage area components must be removed upon completion of the project.
2. Fencing must include a privacy component to prevent view of the interior storage area.

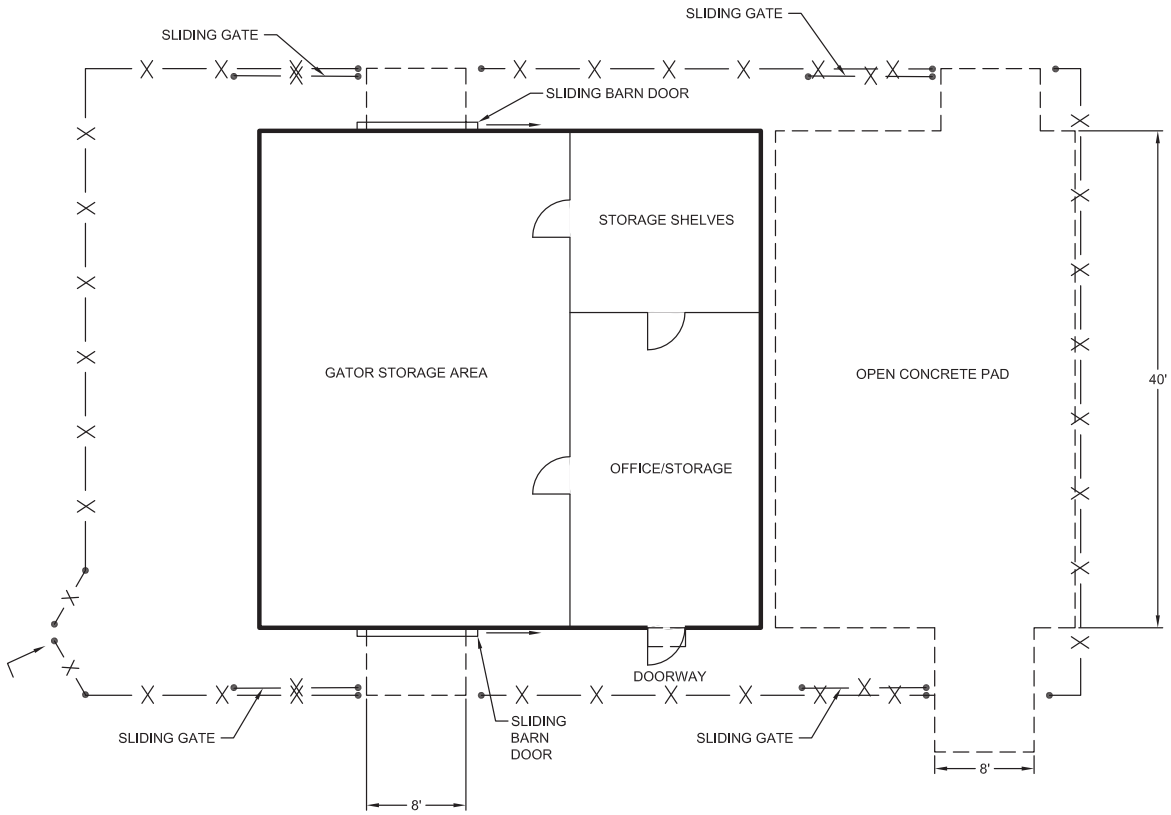
Subject: PETITIONER'S STATEMENT - USE VARIANCE REQUEST

Planning Commission:

CSX TRANSPORTATION, INC. (CSXT) is requesting a Use Variance for the property at 2660 South Walnut Street (Lot 3) to allow for temporary outside storage. CSXT is also requesting a Use Variance for the construction of a temporary security fence at the same property location. This property is part of the larger ongoing voluntary remediation project CSXT is performing at the former Indiana Creosote Company facility located at 240 East Country Club Road. The larger CSXT voluntary remediation project encompasses approximately 40 acres of land in the area and technical oversight is provided by the Indiana Department of Environmental Management (IDEM) Voluntary Remediation Program (VRP).

As part of the remediation project, CSXT is recovering free product creosote from the subsurface and by federal law (40 CFR Parts 261 and 262) must store the waste in the appropriate containers (55 gallon drums) before shipment off-site for incineration. A temporary storage location is necessary to comply with federal laws and CSXT is requesting the temporary storage location be on Lot 3. By DOT regulations (49 CFR Parts 172 and 173), the free product creosote cannot be transported by CSXT on Country Club Road to the west side, after it is recovered on the east side of Clear Creek; and therefore must remain on the east side of the project site. Because the material is required to stay on the east side of the creek, Lot 3 has been determined to be the most optimal location for that temporary storage. CSXT anticipates this remediation project to continue for several years before the IDEM VRP grants closure of the project (Certificate of Completion) and the property can be restored and available for redevelopment. Once the IDEM grants the Certificate of Completion, CSXT will remove all the temporary structures associated with the remediation project (i.e. buildings, fencing, concrete pads, monitoring wells, recovery wells, piping, etc.). This storage location will also allow for more expedient transportation of the recovered creosote (55 gallon drums) off-site and a quicker overall cleanup for the project.



UV/V-47-1□
□□tition□□□□Stat□□ □nt

CSXT is also requesting a Use Variance for the construction of a temporary security fence around the outside storage area. This fence will be an approximate 8 foot tall chain-link fence with privacy slats which is necessary to provide security and deter vandalism to the temporary storage facility in this area. In addition, an approximate 8 foot tall open chain-link fence (no privacy slats) will be installed along the northern boundary of Lot 3 to deter any vehicle movement to the southern portion of the site.

CSXT appreciates the continued cooperation and assistance the City of Bloomington has provided for this project. This excellent work relationship has allowed for the City's purchase of the railroad line (Rails-to-Trails), the Pedestrian Bridge property, and the McDoel Yard in the past, which has resulted in a great redevelopment story for both the City of Bloomington and CSXT. We look forward to working with you on completeing the cleanup of the remainder of the project and putting the property back into reuse.

Sincerely,

Daniel S. Dyer, CPG
Manager Environmental Remediation & Safety
