MESSAGE

As per our telephone conversation of Oct. 28, 1986, results from our sampling show the wastes to be hazardous for heavy metals and w/ listed organics. I suggest we amend our order to include a site clean-up (including soil & groundwater if necessary considering most of the material in the drums has leaked out)

based on our sample results. As our order to M1. Wolf only addresses making a hazardous waste determination, I feel it would be redendant to do it again. Results are being typed up and I will send them along to you.

Thanks,

REMOVE PART 2 AND FORWARD PARTS 1 AND 3
PART 3 WILL BE RETURNED WITH REPLY
