Re: Drinking Water Sampling Results  
Sample LA #2217

Dear [REDACTED],

IDEM has received the results of the analysis for the water sample collected on December 6, 2022, from your residential water well. The analysis was performed by IDEM's contract laboratory and tested for 18 per- and polyfluoroalkyl substances (PFAS) including the compounds perfluorooctanoic acid (PFOA) and perfluorooctane sulfonate (PFOS).

IDEM is pleased to inform you that the analytical results from your well water sample were less than the United States Environmental Protection Agency's (U.S. EPA's) Regional Screening Levels (RSLs) of 60 parts per trillion (ppt) for PFOA and 40 ppt for PFOS. Based on this sample, and the analysis conducted, there is no evidence of PFOA/PFOS in your well.

Please see the attached for your laboratory results. If you have questions regarding this matter, please contact Lynette Schrowe of the Remediation Services Branch at 317/234-8622 or via email at [lschrowe1@idem.in.gov](mailto:lschrowe1@idem.in.gov).

Sincerely,

Kevin Davis, Chief  
Remediation Services Branch  
Office of Land Quality
