Region V
77 West Jackson Blvd.
Chicago, IL 60604-3590

Subject: 3Q2023 Progress Report
Reilly Superfund Site, 1500 S. Tibbs Ave., Indianapolis, Indiana

Dear Mr. Novak:

This quarterly progress report is being submitted on behalf of 1500 South Tibbs LLC in accordance with Section IX A of the Administrative Order by Consent in the matter of Reilly Industries, Inc. (Reilly), 1500 South Tibbs Avenue, Indianapolis, Indiana 46242, U.S. EPA Docket No. V-W-'87-C-006, effective date July 6, 1987, as amended. This quarterly progress report also satisfies the requirements of Section XI of the RD/RA Consent Decree, Civil Action No. (lodged August 10, 1993), effective June 10, 1993 and Section XI of the Consent Decree for the Second Operable Unit, Civil Action No. IP93-1045-C, effective September 14, 1994 CD for OU3-4-5 Civil Action No. IP-93-1045-C. This report is being submitted on behalf of 1500 South Tibbs LLC, which is not a party to the referenced Administrative Order by Consent or Consent Decrees. 1500 South Tibbs LLC reserves all rights and defenses, including all applicable statutory and common-law defenses.

This quarterly report summarizes the following work elements:

- Groundwater operation and maintenance (O&M)
- Cover inspections and maintenance
- Sewer testing and repairs

1.0 Groundwater O&M

The groundwater pumping system at two locations (PW-1 and PW-2) has been on-line since October 3, 1994. Two additional wells (PW-3 and PW-4) were added during August 1997. PW-1 and PW-2 were replaced in 2002 and 2003. The system now consists of PW-1S, PW-1D, PW-2S, PW-3, and PW-4. The five-well system was on-line from April 2003 to March 2005. Wells PW-3 and PW-4 were shut down following approval from the EPA. **Figure 1** is a site map depicting the locations of pumping and monitoring wells.

The following table presents the total volume of groundwater pumped and average pumping rates for the operating wells during the quarter for PW-1S, PW-1D, and PW-2S. The pumping wells operated continuously (100% uptime) during the quarter.

Pumping Well	July (gallons / average gpm)	August (gallons / average gpm)	September (gallons / average gpm)
PW-1S	117,458 / 2.6	96,145 / 2.2	60,982 / 1.4
PW-1D	943,053 / 21.1	906,026 / 20.3	777,044 / 18.0
PW-2S	176,304 / 3.9	176,367 / 4.0	155,435 / 3.6

The quarterly groundwater monitoring event occurred on September 12-14, 2023 in accordance with the monitoring plan. **Table 1** presents the measured groundwater levels. **Attachment A** contains well monitoring data. The groundwater elevations were inputs to Surfer software to develop groundwater contours. **Figure 2** presents the groundwater contours for the shallow aquifer in both Operating Unit 1 (OU1) and Operating Unit 5 (OU5). Groundwater is generally flowing in an easterly direction except for the capture area around the pumping wells. **Figure 3** presents the deep groundwater contours for the OU1 deep aquifer, OU5 middle aquifer (which corresponds the OU1 deep aquifer), and OU5 deep aquifer. Groundwater is generally flowing in a southeasterly direction and is largely captured by PW-1D, and Rolls Royce pumping wells.

Table 2 presents the groundwater analytical results. **Attachment B** contains laboratory analytical data. The remediation goals (RG) for benzene (B), pyridines (P), and ammonia (A), collectively the compounds of concern (COC), are 0.005 mg/L, 0.035 mg/L for each pyridine, and 30 mg/L, respectively. **Figure 4** depicts the results from the OU1 and OU5 shallow aquifer. Levels of COC were measured above the RG in the OU1 shallow aquifer at RI-4S (P). **Figure 5** depicts the results from the OU1 deep, OU5 middle, and OU5 deep aquifers. Levels of COC were measured above the RG in the OU1 deep aquifer at RI-4D (B, P), RI-5S (P, B), and PW-1D (B). Levels of COC were measured above the RG in the OU5 middle aquifer at RI-15M (B). Levels of COC were measured above the RG in the OU5 deep aquifer at RI-15D (B).

2.0 Cover Inspections and Maintenance

Cover inspections are performed semi-annually and the second half inspection is planned to occur in 4Q2023.

The following table summarizes the amount of material that has been collected for off-site disposal since 2000. The volumes were initially reported in drums and are currently tracked in pounds, as some of the drums in the past were not full.

Annual Disposal from the South Landfill Area					
Year	TDM (lbs)	Year	TDM (lbs)	Year	TDM (lbs)
2000 / 2001	10 / 8 drums	2008 / 2009	363	2015	20
2002 / 2003	1,348 / 2,475	2010	1,280	2016	60
2004	1,430	2011 / 2012	375	2017	300
2005	1,455	2013	800	2018 - 2023	0
2006 / 2007	600	2014	1,825	Total = 18 drums + 12,331 lbs	

3.0 Sewer Testing and Repairs

No sewer testing or repairs were completed in 3Q2023. Updates on sewer testing and repair activities will be provided in future quarterly status reports.

Please feel free to contact me at (216) 554-0413 or via email at dave@dmpetersonpe.com if you have any questions or require additional information.

Sincerely,

David M. Peterson, PE
President

RE: Project: Aurorium/Vertellus 3Q23
Pace Project No.: 50353960

Dear David Peterson:

Enclosed are the analytical results for sample(s) received by the laboratory on September 14, 2023. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Indianapolis

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Olivia Deck

QUALIFIERS

Project: Aurorium/Vertellus 3Q23

Pace Project No.: 50353960

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Reported results are not rounded until the final step prior to reporting. Therefore, calculated parameters that are typically reported as "Total" may vary slightly from the sum of the reported component parameters.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

RE: Project: Aurorium/Vertellus 3Q23
Pace Project No.: 50353961

Dear David Peterson:

Enclosed are the analytical results for sample(s) received by the laboratory on September 14, 2023. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Indianapolis

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Olivia Deck
olivia.deck@pacelabs.com

QUALIFIERS

Project: Aurorium/Vertellus 3Q23

Pace Project No.: 50353961

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Reported results are not rounded until the final step prior to reporting. Therefore, calculated parameters that are typically reported as "Total" may vary slightly from the sum of the reported component parameters.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

N2 The lab does not hold NELAC/TNI accreditation for this parameter but other accreditations/certifications may apply. A complete list of accreditations/certifications is available upon request.

RE: Project: Aurorium/Vertellus 3Q23
Pace Project No.: 50353978

Dear David Peterson:

Enclosed are the analytical results for sample(s) received by the laboratory on September 14, 2023. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Indianapolis

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Olivia Deck

QUALIFIERS

Project: Aurorium/Vertellus 3Q23

Pace Project No.: 50353978

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Reported results are not rounded until the final step prior to reporting. Therefore, calculated parameters that are typically reported as "Total" may vary slightly from the sum of the reported component parameters.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

1d A matrix spike/matrix spike duplicate was not performed for this batch due to insufficient sample volume.

H7 Re-extraction or re-analysis could not be performed within method holding time.

L2 Analyte recovery in the laboratory control sample (LCS) was below QC limits. Results for this analyte in associated samples may be biased low.

M0 Matrix spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits.

N2 The lab does not hold NELAC/TNI accreditation for this parameter but other accreditations/certifications may apply. A complete list of accreditations/certifications is available upon request.

DG9U	40mL unpreserved amber vial	AG1H	1L HCl amber glass
VG9H	40mL HCl clear vial	AG1S	1L H2SO4 amber glass
VG9T	40mL Na Thio. clear vial	AG1T	1L Na Thiosulfate amber glass
VG9U	40mL unpreserved clear vial	AG1U	1liter unpres amber glass
I	40mL w/hexane wipe vial	AG2N	500mL HNO3 amber glass
WGKU	8oz unpreserved clear jar	AG2S	500mL H2SO4 amber glass
WG FU	4oz clear soil jar	AG2U	500mL unpres amber glass
JGFU	4oz unpreserved amber wide	AG3S	250mL H2SO4 amber glass
CG3H	250mL clear glass HCl	AG3SF	250mL H2SO4 amb glass -field filtered
CG3F	250mL clear glass HCl, Field Filter	AG3U	250mL unpres amber glass
BG1H	1L HCl clear glass	AG3B	250mL NaOH amber glass
BG1S	1L H2SO4 clear glass		

Plastic			
BP1B	1L NaOH plastic	BP4U	125mL unpreserved plastic
BP1N	1L HNO3 plastic	BP4N	125mL HNO3 plastic
BP1S	1L H2SO4 plastic	BP4S	125mL H2SO4 plastic
BP1U	1L unpreserved plastic		
BP1Z	1L NaOH, Zn, Ac		
BP2N	500mL HNO3 plastic	Syringe Kit	LL Cr+6 sampling kit
BP2C	500mL NaOH plastic	ZPLC	Ziploc Bag
BP2S	500mL H2SO4 plastic	R	Terracore Kit
BP2U	500mL unpreserved plastic	SP5T	120mL Coliform Sodium Thiosulfate
BP2Z	500mL NaOH, Zn Ac	GN	General Container
BP3B	250mL NaOH plastic	U	Summa Can (air sample)
BP3N	250mL HNO3 plastic	WT	Water
BP3F	250mL HNO3 plastic-field filtered	SL	Solid
BP3U	250mL unpreserved plastic	OL	Oil
BP3S	250mL H2SO4 plastic	NAL	Non-aqueous liquid
BP3Z	250mL NaOH, ZnAc plastic	WP	Wipe
BP3R	250mL Unpres FF SO4/OH buffer
